Remembering Independence Carola Lentz, David Lowe, 2018-04-19 Remembering Independence explores the commemoration and remembrance of independence following the great wave of decolonisation after the Second World War Drawing on case studies from Africa Asia and with reference to the Pacific the authors find that remembering independence was and still is highly dynamic From flag raising moments to the present day the transfer of authority from colonial rule to independent nation states has served as a powerful mnemonic focal point Remembering independence in state as well as non state constructions connects to changing contemporary purposes and competing politic visions Independence is a flexible idea both a moment in time and a project a carrier of hopes and ideals of social justice and freedom but also of disappointments and frustrated futures This richly illustrated volume draws attention to the broad range of media employed in remembering independence ranging from museums and monuments to textual oral and ritual formats of commemorative events such as national days Combining insights from history and anthropology this book will be essential reading for all students of the history of empire decolonisation nation building and post colonial politics of memory **Japanese**

Guinea today **Remembrance of Pacific Pasts** Robert Borofsky, 2020-02-29 How does one describe the Pacific's pasts? The easy confidence historians once had in writing about the region has disappeared in the turmoil surrounding today's politics of representation. Earlier narratives that focused on what happened when are now accused of encouraging myths of progress. *Remembrance of Pacific Pasts* takes a different course. It acknowledges history's multiplicity and selectivity, its inability to represent the past in its entirety as it really was, and instead offers points of reference for thinking with and about the region's pasts. It encourages readers to participate in the historical process by constructing alternative histories that draw on the volume's chapters. The book's thirty-four contributions, written by a range of authors spanning a variety of styles and disciplines, are organized into four sections. The first presents frames of reference for analyzing the problems, poetics, and politics involved in addressing the region's pasts today. The second considers early Islander-Western contact, focusing on how each side sought to physically and symbolically control the other. The third deals with the colonial dynamics of the region, the tensions of empire that permeated imperial rule in the Pacific. The fourth explores the region's postcolonial politics through a discussion of the varied ways independence and dependence overlap today. *Remembrance of Pacific Pasts* includes many of the region's most distinguished authors, such as Albert Wendt, Greg Denning, Epeli Hau'ofa, Marshall Sahlins, Patricia Grace, and Nicholas Thomas. In addition, it features chapters by well-known writers from outside Pacific Studies: Edward Said, James Clifford, Richard White, and Gyan Prakash, which help place the region's dynamics in comparative perspective. By moving Pacific history beyond traditional empirical narratives to new ways for conversing about history, by drawing on current debates surrounding the politics of representation to offer different ways for thinking about the region's pasts, this work has relevance for students and scholars of history, anthropology, and cultural studies, both within and beyond the region.

War at the Margins Lin Poyer, 2022-09-30 *War at the Margins* offers a broad comparative view of the impact of World War II on Indigenous societies. Using historical and ethnographic sources, Lin Poyer examines how Indigenous communities emerged from the trauma of the wartime era with social forms and cultural ideas that laid the foundations for their twenty-first-century emergence as players on the world's political stage. With a focus on Indigenous voices and agency, a global overview reveals the enormous range of wartime activities and impacts on these groups, connecting this work with comparative history, Indigenous studies, and anthropology. The distinctiveness of Indigenous peoples offers a valuable perspective on World War II as those on the margins of Allied and Axis empires and nation-states were drawn in as soldiers, scouts, guides, laborers, and victims. Questions of loyalty and citizenship shaped Indigenous combat roles, from integration in national armies to service in separate ethnic units to unofficial use of their special skills, where local knowledge tilted the balance in military outcomes. Front lines crossed Indigenous territory most consequentially in northern Europe, Southeast Asia, and the Pacific Islands, but the impacts of war go well beyond combat. Like others around the world, Indigenous civilian men and women suffered bombing and invasion, displacement, forced labor, military occupation, and economic and social disruption. Infrastructure

construction and demand for key resources affected even areas far from front lines World War II dissolved empires and laid the foundation for the postcolonial world Indigenous people in newly independent nations struggled for autonomy while other veterans returned to home fronts still steeped in racism National governments saw military service as evidence that Indigenous peoples wished to assimilate but wartime experiences confirmed many communities commitment to their home cultures and opened new avenues for activism By century s end Indigenous Rights became an international political force offering alternative visions of how the global order might make room for greater local self determination and cultural diversity In examining this transformative era War at the Margins adds an important contribution to both World War II history and to the development of global Indigenous identity **World War II Remembered** Kendal at Hanover Residents Association,2012-02-08 An exceptional human document of proud men and women who know what it meant to serve

casualties Horowitz examines approximately 150 such riots in about fifty countries mainly in Asia Africa and the former Soviet Union as well as fifty control cases With its deep and thorough scholarship incisive analysis and profound insights *The Deadly Ethnic Riot* will become the definitive work on its subject Furious and sadistic the riot is nevertheless directed against a precisely specified class of targets and conducted with considerable circumspection Horowitz scrutinizes target choices participants and organization the timing and supporting conditions for the violence the nature of the events that precede the riot the prevalence of atrocities during the violence the location and diffusion of riots and the aims and effects of riot behavior He finds that the deadly ethnic riot is a highly patterned but emotional event that tends to occur during times of political uncertainty He also discusses the crucial role of rumor in triggering riots the surprisingly limited role of deliberate organization and the striking lack of remorse exhibited by participants Horowitz writes clearly and eloquently without compromising the complexity of his subject With impressive analytical skill he takes up the important challenge of explaining phenomena that are at once passionate and calculative Donald L Horowitz's comprehensive consideration of the structure and dynamics of ethnic violence is the first full scale comparative study of what the author terms the deadly ethnic riot an intense sudden lethal attack by civilian members of one ethni
