integration into the everyday life of every person are radically changing the previous *modus vivendi* in the society. The emergence of the Internet and the continuous development of digital technologies have brought into fore a number of new legal problems and issues that require a timely solution and proper and effective legal regulation by the EU as one of the leading regulators of the digital world. The technological developments have opened a new window to the borderless world of the Internet giving a person an opportunity to exercise his/her fundamental rights at a new and unprecedented level. This unique book thus presents the key information and solves the related problems concerning the legal regulation of the usage of modern technologies in everyday life. The book is conceived in a form of a collective monograph prepared by an international team of renowned researchers from famous European Universities: Heidelberg University, Palacký University in Olomouc, Tallinn University of Technology, Comenius University in Bratislava and Shevchenko University in Kyiv and scientific legal societies as well as top level experts from practice. This team is representing the countries with the highest level of integration of modern technologies: Estonia, Germany, Czech Republic, Slovakia or has a unique experience with provision of cyber security in the extreme conditions. The book creates a main output from the research project with the title *The EU and the Challenges of Modern Society* legal issues of digitalization, robotization, cyber security and prevention of hybrid threats granted by the EACEA in the category of Jean Monnet network. The publication of the book is supported by the financial subsidy in the amount of 3 000 Euro sent by Palacký University to the Publisher Intersentia. Topics that the authors focus on: The European approach to the right to Internet access, Artificial Intelligence and the Challenges for the Theory of Human Rights, GDPR and the Right to Personal Data and Privacy in a Modern Society, Consumer Protection in the on line World, Future challenges in consumer protection, Competition Law in a Digital Economy, EU Regulation of On line Platforms, Pricing Algorithms and Anticompetitive Agreements, EU legal framework of software security vulnerabilities, New Cybersecurity Rules for Markets in Crypto Assets in the EU Law. The primary readers/users are legal experts in European law, legal researchers and scientific societies dealing with EU matters, IT specialists, personal data specialists, scholars and students in European countries and America, UK, USA, EU and candidate countries etc. compulsory source for students: the Palacký University, Czech Republic, Heidelberg University, Germany, Tallinn Technical University, Estonia, Comenius University in Bratislava, Slovakia, Kyiv Shevchenko University, Ukraine. Benefits the analysis of the most important and thorny legal issues of the process: digitalisation, robotization and providing of cyber security, the proposals *de lege ferenda* concerning the optimal ways of legal regulation of the mentioned process. Great number of key legislative acts were adopted at the level of the EU. The conclusions will summarise the key ideas of the authors and the proposals *de lege ferenda* concerning the whole text. The same refers to the preface which will be prepared by the Vice President of the European Commission Vera Jourová responsible for Values and Transparency which will relate to the whole text.

*Ancient Memory* Katharine Mawford, Eleni Ntanou, 2021-07-05. Although the recent memory boom has led to increasing interdisciplinary interest there is a significant

gap relating to the examination of this topic in Classics In particular there is need for a systematic exploration of ancient memory and its use as a critical and methodological tool for delving into ancient literature The present volume provides just such an approach theorising the use and role of memory in Graeco Roman thought and literature and building on the background of memory studies The volume s contributors apply theoretical models such as memoryscapes civic and cultural memory and memory loss to a range of authors from Homeric epic to Senecan drama and from historiography to Cicero s recollections of performances The chapters are divided into four sections according to the main perspective taken These are 1 the Mechanics of Memory 2 Collective memory 3 Female Memory and 4 Oblivion This modern approach to ancient memory will be useful for scholars working across the range of Greek and Roman literature as well as for students and a broader interdisciplinary audience interested in the intersection of memory studies and Classics      **Critical Connections** United States.
