Remembering Water:

Water Inspectors Jill Shinkle, 2001 Nine activities designed to help children ages 10-15 become acquainted with the characteristics of water: taste, salinity, temperature, hardness, clarity, etc. Students construct scientific instruments such as a Meyer Water Sampler, hydrometer, and Secchi Disk; play water charades; and search for aquatic life. Gives suggestions on how activities might be used by the Webelos, Boy Scouts, Boys and Girls Clubs, Junior Girl Scouts, 4-H, and Campfire programs.

Media and Water Joanne Garde-Hansen, 2021-01-14 As flooding, drought, and water scarcity become more pronounced due to climate change, so the way in which these events are presented in the media assumes greater significance. In particular, the media plays an important role in shaping the public perception and understanding of water issues and debates around extreme weather events. More generally, Joanne Garde-Hansen's book offers a sustained and comprehensive exploration of media representations of water. Drawing on a wide range of media, including newspapers, digital photography, radio, television, and video, as well as empirical research on media and memory, she examines how drought, flooding, and water management have been portrayed in the media, both historically and in the contemporary world. The use of the media by water institutions to manage public perceptions and the use of digital media by the public to engage with water companies is also included. A particular feature of the book is an examination of water and gender in developed nations. One of the first books to look at media representations of water, this pioneering work provides valuable insights for both scholarly and professional water research.

Mechanical Bodies, Computational Minds Stefano Franchi, Güven Güzeldere, 2005 Researchers in artificial intelligence and scholars in the humanities consider the past, present, and future of artificial intelligence from a multidisciplinary perspective.

Notes on Water David Appelbaum, 2017-09-26 This poetical study of water ranges from classical myth and literature to modern physics and microbiology. Because water exists in three forms or phases: liquid, solid, and gas, each needs its own constellation of ideas. Its subtle movement is the hidden source of question, questioner, and the phenomenon of life. Its power is transformation, the unspoken theme of the book.

Living with water Charlotte Bates, Kate Moles, 2023-02-07 Living with water brings together sociologists, geographers, artists, writers, and poets to explore the ways in which water binds, immerses, and supports us. Drawing from international research on river crossings, boat dwelling, wild swimming, sea fishing, and drought impacts, and navigating urban waters, glacial lagoons, barrier reefs, and disappearing tarns, the collection illuminates the ways that we live with and without water and explores how we can think and write with water on land. Water offers a way of attending to emerging and enduring social and ecological concerns and making sense of them in lively and creative ways. By approaching Living with water from different disciplinary and methodological perspectives and drawing on research from around the world, this collection opens up discussions that reinvigorate and renew previously landlocked debates. This book is relevant to United Nations Sustainable Development Goal 6: Clean water and sanitation.

Imagined Theatres Daniel Sack, 2017-04-07 Imagined Theatres collects theoretical dramas written by some of the leading

scholars and artists of the contemporary stage These dialogues prose poems and microfictions describe imaginary performance events that explore what might be possible and impossible in the theatre Each scenario is mirrored by a brief accompanying reflection asking what they might mean for our thinking about the theatre These many possible worlds circle around questions that include In what way is writing itself a performance How do we understand the relationship between real performances that engender imaginary reflections and imaginary conceptions that form the basis for real theatrical productions Are we not always imagining theatres when we read or even when we sit in the theatre watching whatever event we imagine we are seeing
