Rendering In Pen And Ink:

Rendering in Pen and Ink Arthur L. Guptill, 1997-08-01 Arthur L. Guptill's classic *Rendering in Pen and Ink* has long been regarded as the most comprehensive book ever published on the subject of ink drawing. This is a book designed to delight and instruct anyone who draws with pen and ink, from the professional artist to the amateur and hobbyist. It is of particular interest to architects, interior designers, landscape architects, industrial designers, illustrators, and renderers. Contents include a review of materials and tools of rendering, handling the pen and building tones, value studies, kinds of outline and their uses, drawing objects in light and shade, handling groups of objects, basic principles of composition using photographs, study of the work of well-known artists on the spot, sketching, representing trees and other landscape features, drawing architectural details, methods of architectural rendering, examination of outstanding examples of architectural rendering, solving perspective and other rendering problems, handling interiors and their accessories, and finally special methods of working with pen, including its use in combination with other media. The book is profusely illustrated with over 300 drawings that include the work of famous illustrators and renderers of architectural subjects such as Rockwell Kent, Charles Dana Gibson, James Montgomery Flagg, Willy Pogany, Reginald Birch, Harry Clarke, Edward Penfield, Joseph Clement Coll, F. L. Griggs, Samuel V. Chamberlain, Louis C. Rosenberg, John Floyd Yewell, Chester B. Price, Robert Lockwood, Ernest C. Peixotto, Harry C. Wilkinson, Bertram Grosvenor Goodhue, and Reginald Birch. Burdette Long, Best of all, Arthur Guptill enriches the text with drawings of his own.

Patel, Emeritus Professor of Architecture from Indian Institute of Technology.

Roorkee Oldest Technical Institution of Asia It contains about 45 illustration pictures of buildings rendered with colours pen and ink It is a book for Architects Illustrators Artists and Interior Designers This book intended to develop a student studying architecture to demonstrate artistic skills in the core course needed to become an architect Architectural Graphics most especially in the application of colours As an experience teacher of all levels of education from primary to university believed that the daily practice of a good architect relies more on hand created drawings before it is done with the use of software Hand created drawings gives a person training to be an architect to make use of the simplest intuitive connection between the mind and the hand It also allows a consolidation of ideas developing the process of creative thinking AutoCAD was created to aid architectural design for professional practice not to be a tool to develop an architect The power of creativity relies on what you can create with your hand An architect hand created drawing should be his pride and a manifesto to fire the imagination of his client Even in the age of computer application the use of hand in architectural graphics has become more precious Using digital tools certainly has improved the way in which building design is organized and documented but the computer cannot become a complete replacement for the way in which architects conceptualize and communicate their designs Hand drawing is a gift that can't be ignored We need to keep doing it We are not machines but humans and to be an architect one must be an artist and to be an artist you must be creative and to be creative you must be at one with the house Hand drafting is an art according to Walter Gropius says in one of his quotes Children should be introduced right from the start to the potentialities of their environment to the physical and psychological laws that govern the visual world and to the supreme enjoyment that comes from participating in the creative process of giving form to one's living space Van Nostrand Reinhold *Manual of Rendering with Pen and Ink* Robert W.
