Absolutism and Ruling Class John P. LeDonne, 1991-09-26 This is the first comprehensive examination of the Russian ruling elite and its political institutions during an important period of state building from the emergence of Russia on the stage of world politics around 1700 to the consolidation of its position after the victory over Napoleon Instead of focusing on the great rulers of the period Peter Catherine and Alexander the work examines the nobility which alone could make their power effective LeDonne not only gives a full chronological account of the development of bureaucratic military economic and political institutions in Russia during this period but also skillfully analyzes the ways in which local agencies and the ruling class exercised control and shared power with the absolute monarchs

The Muscovite Town Anton Petrov, 2020-12-16 The question of the nature of the Muscovite town takes on greater importance than may seem at first glance Beyond the superficial description of the urban centre of the nature of townsmen and town administration lies the controversial question of economic development What stage of economic development had the Russian town reached on the evolutionary Marxist ladder In a state that purports to be Communist the question cannot be ignored

Publishing, Printing, and the Origins of the Intellectual Life in Russia, 1700-1800 Gary Marker, 2014-07-14 Gary Marker describes the pursuit of an effective public voice by political Church and literary elites in Russia as synonymous with the struggle to control the printed media showing that Russian publishing and printing evolved in a way that sharply diverged from Western experiences but that proved to be highly significant for Russian society. Flammable Cities Greg Bankoff, Uwe Lübken, Jordan Sand, 2012-01-19 In most cities today fire has been reduced to a sporadic and isolated threat. But throughout history the constant risk of fire has left a deep and lasting imprint on almost every dimension of urban society. This volume, the first truly global study of urban conflagration, shows how fire has shaped cities throughout the modern world from Europe to the imperial colonies, major trade entrepôts and non-European capitals right up to such present-day megacities as Lagos and Jakarta. Urban fire may hinder commerce or even spur it; it may break down or reinforce barriers of race, class and ethnicity; it may serve as a pretext for state violence or provide an opportunity for displays of state benevolence. As this volume demonstrates, the many and varied attempts to master, marginalize or manipulate fire can turn a natural and human hazard into a highly useful social and political tool.

Liberal City, Conservative State Robert W. Thurston, 1987 This book examines Moscow's politics and urban history between the failed 1905 revolution and the outbreak of the First World War.

Russia Geoffrey A. Hosking, 1997 Discusses the sixteenth-century roots of the lack of a unified Russian identity, the division between the gentry and the peasantry and the widening gap in the eighteenth and nineteenth centuries which led to revolution and continues to affect Russia today.

Indian Merchants and Eurasian Trade, 1600-1750 Stephen Frederic Dale, 1994 In this remarkable 1994 work of comparative economic history, Stephen Dale studies the activities and economic significance of the Indian mercantile communities which traded in Iran, Central Asia and Russia in the seventeenth and eighteenth centuries. The author uses Russian sources hitherto largely ignored to show that these merchants represented part of the hegemonic trade diaspora of the Indian world economy, thus challenging the conventional interpretation of world economic history that European merchants overwhelmed their Asian counterparts in the early modern era. The book not only demonstrates the vitality of Indian mercantile capitalism but also offers a unique insight into the social characteristics of an Indian expatriate trading community in the Volga-Caspian port of Astrakhan.

Disease, Health Care and Government in Late Imperial Russia Charlotte E. Henze,2010-12-14

This book addresses fundamental issues about the last decades of Tsarist Russia contributing significantly to current debates about how far and how successfully modernisation was being implemented by the Tsarist regime It focuses on successive outbreaks of cholera in the city of Saratov on the Volga in particular contrasting the outbreak of 1892 widely regarded at the time as a national fiasco and a transformative episode for the Russian Empire with the cholera epidemics of 1904 1910 when despite completely new scientific discoveries and administrative arrangements Russia suffered another national outbreak of the disease The book sets these outbreaks fully in their social economic political and cultural context and explains why a medical and social disaster which had long since been overcome in other parts of Europe continued much later in Russia It explores autocratic government urban renewal public health and disaster management including the management of widespread public hysteria and social unrest The book further analyses the assimilation of Western medical knowledge and the resulting institutional and epistemological changes Overall it demonstrates that Russia's medical history was inseparably linked to the nature of the tsarist regime itself in its confrontation with modernity *Russian Overseas Commerce with Great Britain During the Reign of Catherine II* Herbert H. Kaplan,1995 Finally Kaplan persuasively argues that Britain's military supremacy crucially depended on its receiving an uninterrupted supply of Russian manufactured and natural resources

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott,2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam
