Longer Views Samuel R. Delany, 2016-03-15 Six essays from the critic and award winning author exploring topics such as theater LGBTQ scholarship cyborgs metaphors and Star Wars Reading is a many layered process like writing observes Samuel R Delany a Nebula and Hugo Award winning author and a major commentator on American literature and culture In this collection of six extended essays Delany challenges what he calls the hard edged boundaries of meaning by going beyond the customary limits of the genre in which he s writing By radically reworking the essay form Delany can explore and express the many layers of his thinking about the nature of art the workings of language and the injustices and ironies of social political and sexual marginalization Thus Delany connects in sometimes unexpected ways topics as diverse as the origins of modern theater the context of lesbian and gay scholarship the theories of cyborgs how metaphors mean and the narrative structures in the Star Wars trilogy Over the course of his career Kenneth James writes in his extensive introduction Delany has again and again thrown into question the world models that all too many of us unknowingly live by Indeed Delany challenges an impressive list of world models here including High and Low Art sanity and madness mathematical logic and the mechanics of mythmaking the distribution of wealth in our society and the limitations of our sexual vocabulary Also included are two essays that illustrate Delany s unique chrestomathic technique the grouping of textual fragments whose associative interrelationships a reader must actively trace to read them as a resonant argument Whether writing about Wagner or Hart Crane Foucault or Robert Mapplethorpe Delany combines a fierce and often piercing vision with a powerful honesty that beckons us to share in the perspective of these Longer Views An intellectually adventurous book Every page of every essay here rewards a second reading and a third Delany has a fearsomely stocked intellect and a wider range of experience than most writers can even imagine He is brilliant driven prolific The Nation One of science fiction s grand masters Delany s elegant command of language and deep insight into other authors works are delightful to behold Booklist Rare personal frankness and stunning erudition Recommended for readers who enjoy the challenge of being led into remote regions of a gifted mind Library Journal

The Blackademic Life Lavelle Porter, 2019-10-15 The Blackademic Life critically examines academic fiction produced by black writers Lavelle Porter evaluates the depiction of academic and campus life in literature as a space for black writers to produce counternarratives that celebrate black intelligence and argue for the importance of higher education particularly in the humanistic tradition Beginning with an

examination of W E B Du Bois's creative writing as the source of the first black academic novels Porter looks at the fictional representations of black intellectual life and the expectations that are placed on faculty and students to be racial representatives and spokespersons whether or not they ever intended to be The final chapter examines black academics on stage and screen including in the 2014 film *Dear White People* and the groundbreaking television series *A Different World*

The Machine that Sings Gordon A. Tapper, 2013-10-18 Examining how Crane's corporeal aesthetic informs poems written across the span of his career *The Machine That Sings* focuses on four texts in which Crane's preoccupation with the body reaches its apogee Tapper treats *Voyages* *The Wine Merchant* and *Possessions* as a triptych of erotic poems in which Crane plays out alternative resolutions to the dialectic between purity and defilement a conceptual dynamic which Tapper argues is central to both Crane's poetics of difficulty and his representations of homosexual desire Tapper concentrates on the three sections of *The Bridge* most concerned with recuperating animality National Winter Garden The Dance and Cape Hatteras

The Subject of Race in American Science Fiction Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his

Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today

The Individual and Utopia Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual's relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world The Individual and Utopia enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature

Visser, 2021-06-03 The life of Antonin Artaud 1896 1948 was tormented by physical and mental illnesses Already in his earlier works Artaud tried to express his physical and mental suffering but perceived in describing his feelings the obstructive and illness inducing role of language This is the first book written in English that analyses the role of a healing language with which Artaud engaged in his later writings Joeri Visser guides us through the years in which Artaud suffered increasingly from mental instability and considered the act of writing his only means of survival In doing so Visser unfolds a literary and a philosophical analysis of how language and life work together and how a creative play with language can help us to reengage sustainably with the joyous as well as the terrible forces of life

Sims, 2013-06-04 This project examines the representation of anxiety about technology that humans feel when encountering artificial intelligences in four science fiction novels Do Androids Dream of Electric Sheep Neuromancer 2001 A Space Odyssey and Cloud Atlas By exploring this anxiety something profound can be revealed about what it means to be a person living in a technologically saturated society While many critical investigations of these novels focus on the dangerous and negative implications of artificial intelligence this work uses Martin Heidegger's later writings on technology to argue that AIs might be more usefully read as catalysts for a reawakening of human thought
