**Materials** Jingwei Zhao,Zhengyi Jiang,Leszek Adam Dobrzański,Chong Soo Lee,2021-01-13 Product miniaturization is a  
trend for facilitating product usage enabling product functions to be implemented in microscale geometries and aimed at  
reducing product weight volume cost and pollution Driven by ongoing miniaturization in diverse areas including medical  
devices precision equipment communication devices micro electromechanical systems and microsystems technology the  
demands for micro metallic products have been tremendously increased Such a trend requires the development of advanced  
technology for the micromanufacturing of metallic materials with regard to producing high quality micro metallic products  
that possess excellent dimensional tolerances the required mechanical properties and improved surface quality  
Micromanufacturing differs from conventional manufacturing technology in terms of materials processes tools and machines  
and equipment due to the miniaturization nature of the whole micromanufacturing system which challenges the rapid  
development of micromanufacturing technology Such a background has prompted and encouraged us to publish a scholarly  
book on the topic of the micromanufacturing of metallic materials with the purpose of providing readers with a valuable  
document that can be used in the research and development of micromanufacturing technology This book will be useful for  
both theoretical and applied research aimed at micromanufacturing technology and will serve as an important research tool  
providing knowledge to be returned to the community not only as valuable scientific literature but also as technology
