Meta Programming In Logic Programming:

Logic Program Synthesis and Transformation - Meta-Programming in Logic Laurent Fribourg, Franco Turini, 1994-11-30

This volume constitutes the combined proceedings of the 4th International Workshops on Logic Program Synthesis and Transformation LOPSTR 94 and on Meta Programming META 94 held jointly in Pisa Italy in June 1994 This book includes thoroughly revised versions of the best papers presented at both workshops The main topics addressed by the META papers are language extensions in support of meta logic semantics of meta logic implementation of meta logic features performance of meta logic and several applicational aspects The LOPSTR papers are devoted to unfolding folding partial deduction proofs as programs inductive logic programming automated program verification specification and programming methodologies

Meta-Logics and Logic Programming Krzysztof Apt, Franco Turini, 2003-02-01 Investigating meta programming within the logic programming paradigm Meta Logics and Logic Programming presents original research on an important extension of logic programming that makes it more amenable for knowledge representation and programming in general The 12 contributions many written especially for this book explore the foundations language design issues and applications of meta programming in logic programming Meta programming the process of writing computer programs that can manipulate representations of other programs has been key both in the foundations of computer science and in its practical developments Examples of meta programs include compilers interpreters program analyzers and partial evaluators The choice of logic programming as a basis for meta programming offers several practical and theoretical advantages among them the possibility of tackling critical foundational problems of meta programming within a strong theoretical framework and the surprising ease of programming The usual framework of logic programming and more generally first order logic however has to be modified and extended to formally deal with meta programs extensions the editors call meta logics Along with an exploration of meta programming in logic programming the definitions formal properties and use of these extensions constitute one of the book's main themes The first part of the book Foundations focuses on the representation problem how object programs are represented within meta programs The second part Language Support for Meta Logics is concerned with language extensions that make meta programming easier and more elegant The third part Meta Logics for Knowledge Management deals with the use of meta logic for advanced knowledge representation purposes

Meta-Programming in Logic Alberto Pettorossi, 1992 This volume contains lectures and papers delivered at Meta 92 the Third International Workshop on Metaprogramming in Logic held in Uppsala Sweden June 1992 The topics covered include foundations of metaprogramming in logic proposals for metaprogramming languages techniques for knowledge representation and belief systems and program transformation and analysis in logic Particular topics include belief revision systems intensional deduction belief systems and metaprogramming principles of partial deduction termination in logic programs semantics of the vanilla meta interpreter a complete resolution method for metaprogramming semantics of demo hierarchical

META 88, *Handbook of Logic in Artificial Intelligence and Logic Programming: Volume 5: Logic Programming* Dov M. Gabbay, C. J. Hogger, J. A. Robinson, 1998-01-08 The Handbook of Logic in Artificial Intelligence and Logic Programming is a multi volume work covering all major areas of the application of logic to artificial intelligence and logic programming The authors are chosen on an international basis and are leaders in the fields covered Volume 5 is the last in this well regarded series Logic is now widely recognized as one of the foundational disciplines of computing It has found applications in virtually all aspects of the subject from software and hardware engineering to programming languages and artificial intelligence In response to the growing need for an in depth survey of these applications the Handbook of Logic in Artificial Intelligence and its companion the Handbook of Logic in Computer Science have been created The Handbooks are a combination of authoritative exposition comprehensive survey and fundamental research exploring the underlying themes in the various areas Some mathematical background is assumed and much of the material will be of interest to logicians and mathematicians Volume 5 focuses particularly on logic programming The chapters which in many cases are of monograph length and scope emphasize possible unifying themes **Computational Logic: Logic Programming and Beyond**

Antonis C. Kakas, Fariba Sadri, 2003-08-02 Alan Robinson This set of essays pays tribute to Bob Kowalski on his 60th birthday an anniversary which gives his friends and colleagues an excuse to celebrate his career as an original thinker a charismatic communicator and a forceful intellectual leader The logic programming community hereby and herein conveys its respect and thanks to him for his pivotal role in creating and fostering the conceptual paradigm which is its raison d'être The diversity of interests covered here reflects the variety of Bob's concerns Read on It is an intellectual feast Before you begin permit me

to send him a brief personal but public message Bob how right you were and how wrong I was I should explain When Bob arrived in Edinburgh in 1967 resolution was as yet fairly new having taken several years to become at all widely known Research groups to investigate various aspects of resolution sprang up at several institutions the one organized by Bernard Meltzer at Edinburgh University being among the first For the half dozen years that Bob was a leading member of Bernard's group I was a frequent visitor to it and I saw a lot of him We had many discussions about logic computation and language

Programming Language Implementation and Logic Programming Pierre Deransart, Jan Maluszynski, 1990-08-08 This volume consists of the papers accepted for presentation at the second international workshop on Programming Language Implementation and Logic Programming PLILP 90 held in Linköping Sweden August 20-22 1990 The aim of the workshop was to identify concepts and techniques used both in implementation of programming languages regardless of the underlying programming paradigm and in logic programming The intention was to bring together researchers working in

these fields The volume includes 26 selected papers falling into two categories Papers in the first category present certain ideas from the point of view of a particular class of programming languages or even a particular language The ideas presented seem to be applicable in other classes of languages Papers in the second category directly address the problem of integration of various programming paradigms The proceedings of the predecessor workshop PLILP 88 held in Orlans France May 16 18 1988 are available as Lecture Notes in Computer Science Vol 348

Logic Program Synthesis and Transformation Norbert E. Fuchs, 2003-05-20 This volume contains the papers from the Seventh International Workshop on Logic Program Synthesis and Transformation LOPSTR 97 that took place in Leuven Belgium on July 10 12 1997 back to back with the Fourteenth International Conference on Logic Programming ICLP 97 Both ICLP and LOPSTR were organised by the K U Leuven Department of Computer Science LOPSTR 97 was sponsored by Compulog Net and by the Flanders Research Network on Declarative Methods in Computer Science LOPSTR 97 had 39 participants from 13 countries There were two invited talks by Wolfgang Bibel Darmstadt on A multi level approach to program synthesis and by Henning Christiansen Roskilde on Implicit program synthesis by a reversible metainterpreter Extended versions of both talks appear in this volume There were 19 technical papers accepted for presentation at LOPSTR 97 out of 33 submissions Of these 15 appear in extended versions in this volume Their topics range over the fields of program synthesis program transformation program analysis tabling metaprogramming and inductive logic programming

Logic-Based Program Synthesis and Transformation Pierre Flener, 2003-05-21 This book presents the thoroughly refereed post workshop proceedings of the 8th International Workshop on Logic Based Program Synthesis and Transformation LOPSTR 98 held in Manchester UK in June 1998 The 16 revised full papers presented were carefully reviewed and selected during three rounds of inspection from a total of initially 36 extended abstracts submitted Also included are eight short papers Among the topics covered are logic specification mathematical program construction logic programming computational logics inductive program synthesis constraint logic programs and mathematical foundations

Concurrency and Parallelism, Programming, Networking, and Security Joxan Jaffar, Roland H.C. Yap, 1996-11-19 This book constitutes the refereed proceedings of the Second Asian Conference on Computing Science ASIAN 96 held in Singapore in December 1996 The volume presents 31 revised full papers selected from a total of 169 submissions also included are three invited papers and 14 posters The papers are organized in topical sections on algorithms constraints and logic programming distributed systems formal systems networking and security programming and systems and specification and verification

Logic Program Synthesis and Transformation John P. Gallagher, 1997-03-12 This book constitutes the strictly refereed post workshop proceedings of the Sixth International Workshop on Logic Program Synthesis and Transformation LOPSTR 96 held on board a ship sailing from Stockholm to Helsinki in August 1996 The 17 revised full papers were carefully selected from a total of initially 27 submissions The topics

covered range over the areas of synthesis of programs from specifications verification transformation specialization and analysis of programs and the use of program schemata in program development

Embracing the Melody of Term: An Psychological Symphony within **Meta Programming In Logic Programming**

In some sort of used by screens and the ceaseless chatter of instant communication, the melodic elegance and mental symphony developed by the published word frequently diminish into the background, eclipsed by the constant sound and disturbances that permeate our lives. But, set within the pages of **Meta Programming In Logic Programming** a charming fictional value full of natural emotions, lies an immersive symphony waiting to be embraced. Constructed by a masterful musician of language, this interesting masterpiece conducts visitors on a psychological journey, well unraveling the hidden tunes and profound affect resonating within each cautiously constructed phrase. Within the depths with this poignant analysis, we can investigate the book is central harmonies, analyze their enthralling writing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
