Heller, 2013-12-19 First Published in 1997 North American Women Artists of the Twentieth Century A Biographical Dictionary was created to fill a gap of there being a comprehensive reference work like this available even though the bibliography in English on various aspects of the history of women artists has grown exponentially during the past ten years As researchers the editors have been frustrated many times by being unable to locate basic information about many of the artists included in this volume especially those working outside the United States This leads directly to another reason for producing this particular kind of reference book to try and create a better understanding between and among the artists and art audiences in these countries New York Magazine , 1981-11-23 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The British Library General Catalogue of Printed Books to 1975** British Library, 1984 **The Exile Into Eternity** Douglas Radcliff-Umstead, 1987 This book examines the literary world created by Giorgio Bassani in the collected volume of his narrative works Il romanzo de Ferrara The Romance of Ferrara 1974 The first to follow Bassani s intellectual development from the time of his youth this critical study also offers a close look at the individual works including his masterpiece Il giardino dei Finzi Contini The

Garden of the Finzi Continis *Theology in Built Environments* Sigurd Bergmann, 2017-07-12 Built space is both a physical entity as well as a socially and historically constructed place. It constantly interacts with human beings affecting their behavior, thinking, and feeling. Doing religious work in a particular environment implies acknowledging the surroundings to be integral to theology itself. The contributors to this volume view buildings, scriptures, conversations, prayers, preaching, artifacts, music, and drama, and built and natural surroundings as contributors to a contextual theology. The view of the environment in which religion is practiced, as integrated with theology, represents not just a new theme but also a necessity if one is to understand religion's own depth. Reflections about space and place and how they reflect and affect religious experience provide a challenge and an urgent necessity for theology. This is particularly important if religious practitioners are to become aware of how theology is given expression in the existential spatiality of life. Can space set theology free? This is a challenging question, one that the editor hopes can be answered at least in part in this volume. The diversity of theoretical concepts in aesthetics, cultural theory, and architecture are not regarded as a problem to be solved by constructing one overarching dominant theory. Instead, this diversity is viewed in terms of its positive potential to inspire discourse about theology and aesthetics. In this discourse, theology does not need to become fully dependent on one or another theory but should always clearly present its criteria for choosing this or that theoretical framework. This volume shows clearly how different modes of design in sacred spaces capture a sense of the religious. **Michael - Orleans**, 1998 **Art and architecture of the early 20th century** Dorothea Eimert, 2024-11-12 The beginning of the twentieth century was a period marked by intense aesthetic and ideological research. Caught up in the chaos of historical world conflicts, artists went beyond the simple role of witnesses to become true players in the unstable atmosphere. Well aware of their influence, painters, sculptors, and architects, each with their own media, attempted to inform the public about contemporary issues or solve problems caused by cultures advancing at a rapid assembly-line speed. Picasso's masterpiece *Guernica* remains to this day the ultimate symbol of pacifistic revolts. Lavishly illustrated, this book will help the reader understand the period when artists adjusted to the accelerating pace of their world by creating works of timeless modernity.
