Mountains Within Me:

The Mountains Within Ram Thakur, 2021-11-22 The story of *The Mountains Within* is prototypical of the people who grew into first ever consciousness of their own identities from the obscurity of innumerable socio cultural microcosms that had existed at the subterranean level for centuries and millennia over the length and breadth of India before the Independence The story moves from present to past to future with the main protagonist's grand daughter setting out to reconstruct the life story of her grand father she admires The story is contemporary and relevant to a whole lot of Indians who finished their journeys of existence at the beginning of the new millennium As they sit back vacuous and dazed after the retirement they cannot help ruminating over the past vis vis their own lives No matter how objective their self appraisal they cannot escape being dubbed a generation of ineffectual crusaders who fell from grace by succumbing to hypocrisies both personal and collective They cannot exonerate themselves from the stigma of making a mess of a newly liberated country through moral turpitude and lack of individual will They cannot face up to the younger generation of today and convince them they had no role to play in the fabrication of myths such Mera Bharat Mahaan There are no Nuremberg Trials for the crimes we commit within our minds and souls However if history is continuity between the past and the present then *The Mountains Within* does leave some doors open for Nuremberg Trials of the mind and the souls for these Indians

Little More About Me Pam Houston,2000-10 The author of *Cowboys Are My Weakness* and *Waltzing the Cat* turns to nonfiction with essays that celebrate real life adventures spanning five years and five continents Through her stories readers meet some good dogs a few good men and the occasional grizzly as Houston proves that fiction has nothing on real life

Ecology, Community and Lifestyle Arne Naess,Arne Næss,1990-10-26 The basic thesis of the work is that environmental problems are only to be solved by people people who will be required to make value judgements in conflicts that go beyond narrowly conceived human concerns Thus people require not only an ethical system but a way of conceiving the world and themselves such that the intrinsic value of life and nature is obvious a system based on deep ecological principles The book encourages readers to identify their own series of such parameters their own ecosophies Ecology Community and Lifestyle will appeal to philosophers specialists working on environmental issues and the more general reader who is interested in learning some of the foundational ideas of the rapidly expanding field of environmental philosophy
