new questions about realism and the creative power of narratives Rosa Mucignat takes a fresh look at the relationship between representation and reality As Mucignat points out worlds evoked in fiction all depend to a greater or lesser extent on the world we know from experience but they are neither parasites on nor copies of those realms Never fully aligned with the real world stories grow out of the mismatch between reality and representation those areas of the fictional space that are not located on actual maps but still form a fully structured imagined geography Mucignat offers new readings of six foundational texts of modern Western culture Goethe's *Wilhelm Meister's Apprenticeship* Jane Austen's *Mansfield Park* Alessandro Manzoni's *The Betrothed* Stendahl's *The Red and the Black* Charles Dickens's *Great Expectations* and Gustave Flaubert's *Sentimental Education* Using these texts as source material and supporting evidence for a new and comprehensive theory of space in fiction she examines the links between the nineteenth century novel's interest in creating substantial life like worlds and contemporary developments in science art and society Mucignat's book is an evocative analysis of the way novels marshal their technical and stylistic resources to produce imagined geographies so complex and engrossing that they intensify and even transform the reader's experience of real life places
