## **New Creators Of Empowered Workers:**

**Empowering Workers in an Age of Automation** Tom Parr, 2025-02-14 Empowering Workers in an Age of Automation explores how labour market policymakers should respond to the threats and opportunities that arise from automation artificial intelligence and other forms of technological progress The book s aim is twofold First it is to develop and defend a novel philosophical framework for theorizing about the demands of social justice in the labour market which Parr calls the empowerment model At the heart of this view is a concern for fairness and more specifically a concern for the growing inequality in prospects between members of the working class and their middle and upper class counterparts Second it is to examine a range of concrete political controversies relating to labour markets and the future of work in the light of the empowerment model The analysis presented is wide ranging and includes discussion of technological unemployment the four day work week the gender earnings gap working from home and role of higher education Throughout the text Parr is keen to caution against sensationalist narratives and instead emphasizes the more prosaic but still hugely consequential ways in which technology is changing how we work To do this he draws on a wealth of empirical research and extensively from findings in labour economics The result is a book that takes seriously and aims to shed light on some of the most pressing challenges that we actually face
