It offers a systematic overview of conceptual foundations, political implications and tensions at the global, regional and local levels, as well as key policies, practices, examples and discourses underlining all segments of peacebuilding and statebuilding praxis. Approaching peacebuilding from disciplinary perspectives across the social sciences, the Handbook is organized around four major thematic sections. Section one explores how peacebuilding, statebuilding and peace formation is conceived by different disciplines and IR approaches, thus offering an overview of the conceptual bedrock of major theories and approaches. Section two situates these approaches among other major global issues including globalization, civil society, terrorism and technology to illustrate their global, regional and local resonance. Section three looks at key themes in the field including peace agreements, democratization, security reform, human rights, environment and culture.
