production Suspending Modernity follows the evolution of Albini's most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period Modern Architecture Alan Colguhoun, 2002 In this study of the international modern movement in architecture Alan Colquhoun explores the complex motivations behind its revolutionary new style and assesses its triumphs and failures Topophilia and Topophobia Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat which have been coined by discerning modern thinkers as topophilia and topophobia Whilst such affiliations with the topos our manmade as well as natural habitat have been traced back to antiquity a wide range of twentieth century cases are studied here and reflected upon by dwelling on this framework The book provides a timely reminder that the qualitative aspects of the topos sensual as well as intellectual should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the millennium Topophilia and Topophobia offers speculative and historical reflections on the human habitat of the century that has just passed authored by some of the world's leading scholars and architects including Joseph Rykwert Yi Fu Tuan Vittorio Gregotti and Jean Louis Cohen Human habitats ranging broadly from the cities of the twentieth century highbrow modern architecture both in Western countries and in Asia to non architect planner designed vernacular settlements and landscapes are reviewed under the themes of topophilia and topophobia across the disciplines of architecture landscape studies philosophy human geography and urban planning Site Matters Carol Burns, Andrea Kahn, 2005-07-08 This volume through theoretical essays and empirically grounded pieces on Le Corbusier s designs contemporary suburbs and the planning agendas of the World Trade Center site provides theory on the appreciation of site and context in architecture An Introduction to Architectural Theory Harry Francis Mallgrave, David J. Goodman, 2011-03-16 A sharp and lively text that covers issues in depth but not to the point that they become inaccessible to beginning students An Introduction to Architectural Theory is the first narrative history of this period charting the veritable revolution in architectural thinking that has taken place as well as the implications of this intellectual upheaval The first comprehensive and critical history of architectural theory over the last fifty years surveys the intellectual history of architecture since 1968 including criticisms of high modernism the rise of postmodern and poststructural theory critical regionalism and tectonics Offers a comprehensive overview of the significant changes that architectural thinking has undergone in the past fifteen years Includes an analysis of where architecture stands and where it will likely move in the coming years Exhibiting Italian Art in the United States from Futurism to Arte Povera Raffaele Bedarida, 2022-06-28 This volume explores how Italian institutions dealers critics and artists constructed a modern national identity for Italy by exporting literally and figuratively contemporary art to the United States in key moments between 1929 and 1969 From artist Fortunato Depero opening his Futurist House in New York City to critic Germano Celant launching Arte Povera in the United States Raffaele Bedarida examines the thick web of individuals and cultural environments beyond the two more canonical movements that shaped this project By interrogating standard narratives of Italian Fascist propaganda on the one hand and American Cold War imperialism on the other this book establishes a more nuanced transnational approach The central thesis is that beyond the immediate aims of political propaganda and conquering a new market for Italian art these art exhibitions publications and the critical discourse aimed at American audiences all reflected back on their makers they forced and helped Italians define their own modernity in relation to the world's new dominant cultural and economic power The book will be of interest to scholars working in art history social history exhibition history and Italian Vittorio Gregotti. The resulting collection of essays will contribute to the burgeoning genre of studies on cinema and the city by focusing on one particularly rich case study both for the nature of the films discussed and the complexities of the city and its representation. The volume will also reach beyond film studies in so far as the subject draws on and informs other approaches to Rome s cultural history geography art history urban history classics The essays address topics ranging from the interwar period to the present A diverse set of cinematic interactions and interventions are placed within the context of the evolving architectural social and political fabric of Rome in a period of rapid and often traumatic historical change Implicit in the conception of the conference was the idea that cinematic representations of the city inherit and rework established habits of visualisation used to produce images of the Eternal city Three other tropes which constitute key elements in Rome's international reputation can be seen as being embedded in cinematic narratives Firstly the trope of transformation artisic narratives Firstly the trope of transformation artisic psychological spiritual secondly the city's reputation as a cosmopolitan crossroad Thirdly Rome's status as a locus classicus for the juxtaposition of the ancient and the modern which was given a new relevance and complexity in films which sought to focus on aspects of contemporary life be it in the Fascist era or the extreme contrasts of poverty and international bohemianism of the postwar era House Life Donna Birdwell-Pheasant, Denise Lawrence-Züniga, 2020-06-04 This book which fills a gap on the materiality of lived relations examines households within the context of their immediate physical surroundings of home and shows how human interactions are reflected in built forms Houses are dynamic participants in
