Access Denied George Campbell Jr., Ronni Denes, Catherine Morrison, 2000-05-04 Since the Civil Rights Era of the 1960s minority groups have seen a tremendous amount of progress but African Americans Latinos and American Indians still remain severely underrepresented in science engineering and mathematics And although government industry and private philanthropies have supported more than 200 pre college and college level initiatives to increase the access and retention of minority students the outcomes of these programs have not been well documented This book from the National Action Council for Minorities in Engineering NACME presents definitive essays by leading research scholars academics and industry representatives on the participation of minorities in science mathematics and engineering Its extensive coverage includes essays on current demographics entering the education system influences on minority participation barriers to success and preparation for academic careers It is ideal for scholars researchers educators and policymakers who study and strive to break the barriers of discrimination

The New Modern Times David B. Bills, 1995-01-17 The New Modern Times assesses historical contemporary and projected trends in the American world of work The contributors represent a range of disciplines sociology history education economics women s studies and planning yet all share the perspective that an understanding of the workplace is basic to an understanding of where our society has been where it is now and where it is going The book focuses on many of the broad causes and consequences of trends in the institutional demographic and technological spheres of American society that are continuing to transform both our working and non working lives The authors balance careful empirical accounts with a willingness to look ahead to future transformations of the workplace and to draw out the current policy implications of their analyses A strong interdisciplinary approach addresses issues such as changing skill levels the social consequences of new technologies the emerging economic role of women and fundamental changes in the terms of employment In doing so the book offers new directions for research and new ways to think about some of the most basic processes that continue to transform the American landscape

The God Dilemma V.C. Thomas, 2009-08-25 Todays modern technology and scientific knowledge contradicts all religious dogma created in ancient times by ignorant and superstitious people who had just learned to write Modern science can test the strength of ones faith and it can make him a skeptic causing him to discard the religious beliefs of his family for generations past Deep religious

experiences or self induced delusions can be explained by physical psychological biological and medical sciences today Evil or Sin is the result of social and mental conditions and can be corrected with education and medication today and without the help of an imaginary God To quote Mark Twain Faith is to believe in what you know for sure is not true The GOD Dilemma is an unscientific investigation to justify believing in religion today and in particular the Christian faith It argues that scientific and logical discussions about religion and the existence of God are futile however we cannot stop thinking about it Humans are maybe born with a faith in Gods existence and with a conscience that tells them which is morally and ethically right and which is not Author Thomas used to believe in religion God and Christianity through his teenage years but even if he learned to ignore it during his 50 adult years he never consciously discarded his Christian faith He now shares his investigations and attempts to believe in Jesus Christ once again despite todays knowledge of the universe and evolution and by ignoring the sanctimonious behavior of fundamentalist US Christians In the international scene Thomas believes that the US wars since WWII cannot be justified by the life and the teachings of Jesus Christ There is an underlying moral claim by fundamentalist Christian Americans that its actions are justified by Jesus and Christianity The new phenomenon called Christian Zionism which requires the removal of Palestinians from their homeland to create and expand Israel to enable the second coming of Christ categorically contradicts the teachings of Jesus in the four Gospels Zionism is based on the Old Testament Bible OTB and Revelations in the New Testament both of which are scientifically ridiculous The OTB is also historically questionable about a God interacting with his only chosen people in Middle East and morally criminal God sponsored and assisted armed robbery and genocide to create Israel ancient and modern by todays legal and ethical standards Why has the life and teachings of Jesus Christ not produced universal love and non violence among Christians Why are American Christians the most active supporters of or not speaking out against the wars bombing and destruction by the USA since WWII Are Ashkenazi European Jews really the descendants of Semitic slaves from Egypt What were the reasons for anti Semitism and the Holocaust in Christian Europe of the past Why is the European Union and the US punishing the Palestinians for the Holocaust crimes in Europe Can Gods orders in the Bible be legally used by the United Nations to recreate Israel again in the 20th century after 3000 years by getting rid of Palestinians The book seeks to inform and provoke critical thinking of the readers through this investigation into religion and God and in particular the violent intolerant and self righteous behavior of Christians for centuries past and even in todays enlightened age using the source of the Christian religion the Bible

Pursuing the Unity of Science Harmke Kamminga,Geert Somsen,2016-05-20 From 1918 to the late 1940s a host of influential scientists and intellectuals in Europe and North America were engaged in a number of far reaching unity of science projects In this period of deep social and political divisions scientists collaborated to unify sciences across disciplinary boundaries and to set up the international scientific community as a model for global political co operation They strove to align scientific and social objectives through rational planning and to promote unified science as the driving force of

human civilization and progress This volume explores the unity of science movement providing a synthetic view of its pursuits and placing it in its historical context as a scientific and political force Through a coherent set of original case studies looking at the significance of various projects and strategies of unification the book highlights the great variety of manifestations of this endeavour These range from unifying nuclear physics to the evolutionary synthesis and from the democratization of scientific planning to the utopianism of H G Wells s world state At the same time the collection brings out the substantive links between these different pursuits especially in the form of interconnected networks of unification and the alignment of objectives among them Notably it shows that opposition to fascism using the instrument of unified science became the most urgent common goal in the 1930s and 1940s In addressing these issues the book makes visible important historical developments showing how scientists participated in and actively helped to create an interwar ideology of unification and bringing to light the cultural and political significance of this enterprise **Face/On** Sharrona

Pearl,2017-04-12 Are our identities attached to our faces If so what happens when the face connected to the self is gone forever or replaced In *Face On* Sharrona Pearl investigates the stakes for changing the face and the changing stakes for the face in both contemporary society and the sciences The first comprehensive cultural study of face transplant surgery *Face On* reveals our true relationships to faces and facelessness explains the significance we place on facial manipulation and decodes how we understand loss reconstruction and transplantation of the face To achieve this Pearl draws on a vast array of sources bioethical and medical reports newspaper and television coverage performances by pop culture icons hospital records personal interviews films and military files She argues that we are on the cusp of a new ethics in an opportune moment for reframing essentialist ideas about appearance in favor of a more expansive form of interpersonal interaction Accessibly written and respectfully illustrated *Face On* offers a new perspective on face transplant surgery as a way to consider the self and its representation as constantly present and evolving Highly interdisciplinary this study will appeal to anyone wishing to know more about critical interventions into recent medicine makeover culture and the beauty industry *History of the*

Sciences,Board on Army Science and Technology,Committee on Network Science for Future Army Applications,2005-12-15 The military is currently attempting to develop itself into a force capable of networkcentric operations While this effort has highlighted the military s dependence on interacting networks it has also shown that there is a huge gap between what we need to know about networks and our fundamental knowledge about network behavior This gap makes the military vision of

NCO problematic To help address this problem the Army asked the NRC to find out whether identifying and funding a new field of network science could help close this gap This report presents an examination of networks and the military an analysis of the promise content and challenges of network science and an assessment of approaches to creating value from network science
