crisis to the consumption practices and cultural narratives spawned by the petrocultural politics of Cold War capitalism In a series of illuminating case studies including 1970s energy conservation debates popular car films and the creation of oil futures trading Wellum chronicles the consolidation of a neoliberal capitalist order in the United States through an energy politics marked by anxious futurity petro populist sentiment and financialized energy markets He shows how experiences of energy shortages and fears of future energy crises unsettled American national identity and power yet also informed Reagan era confidence in free markets and US global leadership In taking a cultural approach to the 1970s energy crisis Wellum offers a challenging meditation on the status of crisis in modern history contemporary life and critical thought and how we rely on crises to make sense of the world
