Creative Thinking Styles Ibrahim H. Hussney, What we witness today in the diversity of organizations businesses and companies coupled with the expansion of their activities aligns with the tremendous and rapid industrial and technological revolution Especially regarding communication rapid updates and the shift towards digital

business management This casts a daunting shadow upon those unable to keep pace with this astonishing progress This must compel everyone to break free from the shackles of confusion and the constraints of incapacity Working on bridging the growing knowledge gap is essential This imperative should drive all organizations businesses and companies towards embracing Information and Knowledge Technology widely entering the era of the knowledge economy This transition involves establishing specialized units for information and knowledge management operating around the clock to keep up with consecutive developments that impact the business trajectory The undeniable truths before us today show that strategic management and strategic thinking have become the topics of paramount interest in the business landscape This heightened attention is because of the intense competition in markets the scarcity of resources and the rapid emergence of local and international changes These factors cause a discerning management capable of making decisions that align with events or changes affecting organizations businesses and companies We found ourselves today in dire need of exceptional talents who shape events craft sustainable strategies set achievable goals and manage challenging situations with their advanced tools All of this can only come through a shift in our perspective moving away from the confines of routine thinking to embrace the vast realm of innovation Thinking outside the box is required from everyone today It is the foundation and effective solution for all management problems in its broadest sense We frequently heard this term prompting some to question its meaning But it refers to stepping out of the confines of the issue or problem one is facing It involves ceasing the repetitive attempts at solving it and confronting the situation as if it did not attach one to it Just like a person cannot evaluate the exterior paint of a building while being inside in this scenario vision is inherently limited Creative Thinking of School Students S.s.
