presented in this book are based on a corpus of 1677 twentieth century French borrowings collected from the Oxford English Dictionary Online On the basis of their meanings the words under consideration have been assigned to different subject fields in order to give a tour d horizon of the manifold areas and spheres of life enriched by French in recent times The first part of the present investigation concentrates on the phonological and orthographical reception of the various borrowings The focus of this study is on the semantic development of the French borrowings in comparison to their sources in the donor language Emphasis has been placed upon analysing whether a particular meaning a borrowing assumes after its first attested use is taken over from French or whether it represents an independent semantic change within English
