Hebert, 2018-03-08 This book studies the three concepts of translation education and innovation from a Nordic and international perspective on Japanese and Korean societies. It presents findings from pioneering research into cultural translation Japanese and Korean linguistics urban development traditional arts and related fields. Across recent decades Northern European scholars have shown increasing interest in East Asia. Even though they are situated on opposite sides of the Eurasia landmass the Nordic nations have a great deal in common with Japan and Korea including vibrant cultural traditions strong educational systems and productive social democratic economies. Taking a cross cultural and interdisciplinary approach and in addition to the examination of the three key concepts the book explores several additional intersecting themes including sustainability nature humour aesthetics cultural survival and social change discourse and representation. This book offers a collection of original interdisciplinary research from the 25th anniversary conference of the Nordic Association for Japanese and Korean Studies 2013. Its 21 chapters are divided into five parts according to interdisciplinary themes: Translational Issues in Literature Analyses of Korean and Japanese Languages Language Education Innovation and New Perspectives on Culture and The Arts in Innovative Societies. **Faulkner: International Perspectives** Doreen Fowler, 1984 Essays on William Faulkner's work from foreign perspectives. **International Perspectives on Chicana/o Studies** Catherine Leen, Niamh Thornton, 2013-10-15 This volume examines how the field of Chicana/o studies has developed to become an area of interest to scholars far beyond the United States and Spain. For this reason the volume includes contributions by a range of international scholars and takes the concept of place as a unifying paradigm. As a way of overcoming borders that are both physical and metaphorical it seeks to reflect the diversity and range of current scholarship in Chicana/o studies while simultaneously highlighting the diverse and constantly evolving nature of Chicana/o identities and cultures. Various critical and theoretical approaches are evident from eco criticism and autoethnography in the first section to the role of fiction and visual art in exposing injustice in section two to the discussion of transnational and transcultural exchange with reference to issues as diverse as the teaching of Chicana/o studies in Russia and the relevance of Anzaldúa's writings to post 9/11 U.S. society. **International Perspectives on Shojo and Shojo Manga** Masami Toku, 2015-06-05 This collaborative book explores the artistic and aesthetic development of shojo or girl manga and discusses the significance of both shojo manga and the concept of shojo or girl culture. It features contributions from manga critics educators and researchers from both manga's home country of Japan and abroad looking at shojo and shojo manga's influence both locally and globally. Finally it presents original interviews of shojo manga ka or artists who discuss their work and their views on this distinct type of popular visual culture. **National Galleries** Simon

Knell, 2016-01-22 Are national galleries different from other kinds of art gallery or museum What value is there for the nation in a collection of international masterpieces How are national galleries involved in the construction national art National Galleries is the first book to undertake a panoramic view of a type of national institution which are sometimes called national museums of fine art that is now found in almost every nation on earth Adopting a richly illustrated globally inclusive comparative view Simon Knell argues that national galleries should not be understood as great galleries but as peculiar sites where art is made to perform in acts of nation building A book that fundamentally rewrites the history of these institutions and encourages the reader to dispense with elitist views of their worth Knell reveals an unseen geography and a rich complexity of performance He considers the ways the national galleries entangle art and nation and the differing trajectories and purposes of international and national art Exploring galleries artists and artworks from around the world National Galleries is an argument about how we think about and study these institutions Privileging the situatedness of each national gallery performance and valuing localism over universalism Knell looks particularly at how national art is constructed and represented He ends with examples that show the mutability of national art and by questioning the necessity of art nationalism
