Susan Seddon Boulet Michael Babcock, 2000 Susan Seddon Boulet American b Brazil 1941 1997 lived life in search of the magnificent As a child growing up on a Brazilian farm she developed an abiding affection for animals making them her first artistic subjects and portraying them in colorful lively sketches From these simple roots creating art became central to her life Boulet developed a unique style an inspired vision suffused with detail texture and color Her artwork reflects her innermost journey beginning with fairy tales and evolving into powerful archetypal figures that welled up from what Carl Jung once called the deepest springs of life In the decades since Boulet's death her artwork has continued to move and inspire people all over the world Boulet is also known for her finely detailed portraits within portraits explorations of mysterious dreams visions and spiritual symbols For these paintings she drew inspiration from folklore and myth as well as shamanic and Native American traditions Working primarily with oil pastels and ink Boulet brought into being a numinous dimension displayed in vivid breathing detail Her highly personal style offers glimpses of other worlds Seen for the first time her images can feel familiar known at some profound level they often resonate with those in search of a personal truth Even as Boulet explored the darker aspects of the psyche in her work and began her long struggle with cancer she retained the energy honesty and warmth that endeared her to so many This retrospective by Michael Babcock recounts her artistic development and celebrates her extraordinary personal journey It includes more than two hundred reproductions of her paintings some never before published *Quick Bibliography Series*, 1976 Animals and Nature Rod Preece, 2011-11-01 No one tradition alone offers a sufficient respect for other species Taken together they may offer a prospect for saner human animal relations From the book Western conceptions of objectivity and individuality have resulted in a readier appreciation of the worth of the animals and nature than has been recognized This provocative book takes issue with the popular view that the Western cultural tradition in contrast to Eastern and Aboriginal traditions has encouraged attitudes of domination and exploitation towards nature particularly animals Preece argues that the Western tradition has much to commend it and that descriptions of Aboriginal and Oriental orientations have often been misleadingly rosy simplified and codified according to

current fashionable concepts Animals and Nature is the result of six years intensive study into comparative religion literature philosophy anthropology mythology and animal welfare science Ami, Child of the Stars Enrique Barrios,1989 Visiting a young boy on earth an extraterrestrial delivers an environmental message of hope from the stars *Bibliography of Agriculture* ,1990 **Ethics and Animals** Harlan B. Gleason,1988

Between the Species ,1989 Eco-Terrorism Donald R. Liddick,2006-10-30 Radical environmentalism and its progeny eco terrorism is a modern phenomenon It is a movement far removed from the elite conservationists of the late 1800s and the mainstream environmental groups that emerged later Drawn from the same pool of concerned individuals who comprise

memberships in groups like Greenpeace the Sierra Club and the Wilderness Society disaffected environmentalists have turned from political lobbying to direct action in the form of widespread property destruction and other types of crime and terror Here the author exposes the activities of radical groups determined to make their mark in the movement to protect the earth and its creatures from those they view as predators He covers the major groups as well as less well known ones and provides a careful portrait of who they are what they do and how to address them The growth from the 1980s through the present day of organizations involved in eco terror is noticeable and significant Such groups have caused millions of dollars worth of damage throughout the country The FBI estimates that the ALF ELF have committed more than 600 criminal acts in the United States since 1996 resulting in damages in excess of 43 million Tactics include pulling up survey stakes tree spiking arson and other methods Most groups will claim responsibility for their actions just as other types of terrorist groups will take responsibility for theirs Eco Terrorism takes an objective look at the most radical groups and their terrorist activities in the United States including case examples and analysis of the methods and rhetoric the groups employ It uncovers the losses both to individuals and the community as a result of these methods and it describes the ideologies motivations history and activities of the political movements that have been labeled environmental terrorism
