New Geopolitics Of Eurasia And Turkey's Position:

The New Geopolitics of Eurasia and Turkey's Position Bulent Aras,2013-01-11 This work explores the geopolitical struggles that are currently underway in the newly independent states of the Caucasus region showing how many players in the region are coalescing into two opposing blocs The growing political military and economic ties amongst the countries of these two blocs stem from a number of developments in the region most notably the fall of the Soviet Union and consequently the end of the Cold War and its bi polar global alliance structure These blocs are competing for influence in the region and the rights to exploit and transport the rich energy resources that have been found in the Caspian Sea The text shows how many actors have been willing to co operate in other non energy related issues in the hope of receiving a financial reward when countries do decide on these matters

Heartlands of Eurasia Anita Sengupta,2009-07-16 Heartlands of Eurasia explores how received metageographical knowledge informs the understanding of global processes and is subsequently transformed into geopolitical reasoning with foreign policy implications It provides a detailed examination of writings from both within the region and outside that look into the significance of Halford Mackinder s heritage in the context of a vastly changed world situation In particular it attempts to examine how policy makers and strategic thinkers have used these geopolitical concepts as justification for their policy in the region Finally it attempts an analysis of the extent to which this policy thinking was translated into practice While the study looks into how the vision of the pivotal significance of a vast expanse of land finds its echoes in contemporary narratives it also underlines the very creative ways in which Mackinder s ideas have been reinterpreted in keeping with the changing global dynamics Making use of the way in which the region has been traditionally defined and the way in which the people defined themselves the study brings into focus a debate on the usefulness of region or area based studies that are located in geographical imaginations Anita Sengupta uses this connection to examine the following issues geopolitical imaginations and their relevance in identifying areas in the present context the intersection between how areas are defined from an outsider perspective and how people define themselves the extent to which these definitions have influenced policy and the possibility or feasibility of the development of alternative geostrategic discourses Mackinder himself did not specify the geographical area identified first as the pivot and later the heartland but his ideas were focused on the closed heartland of Euro Asia an area that was unassailable by sea power This study therefore centers its debates around the Eurasian space in general though the focus is on the Central Asian region and Uzbekistan in particular The book is ideal for specialists working on the Eurasian region graduate students interested in geopolitics as well as Eurasian and Central Asian studies and undergraduates studying political science and international relations

Dynamics of the Changing Global Security Order Lorenzo Fiorito,Nesrin Kenar,Senthan Selvarajah,2023-10-16 Dynamics of the Changing Global Security Order Emerging Trends and Key Issues in Asia presents knowledge insights and understanding of why and how the US led unipolar world order is shifting more in a multipolar direction It demonstrates the

influence of power contests involving economic and military weaponry on this new development It reveals the impact this transformation will have on international security and the challenges crises and risks that humanity faces This volume systematically explores its hypothesis through newly evolving theoretical positions such as geoeconomics socio economic political and cultural implications tensions at the national regional and global levels as well as debates trends policies practices and examples concerning power and international relations praxis Revolutionaries and Reformers Barry Rubin,2012-02-01 Islamist movements seeking power today are faced with difficult choices regarding strategy ranging from armed struggle to electoral efforts An emerging alternative consists of a rethinking of Islamist politics where the goal of a totally Islamic polity would be abandoned in favor of some form of Islamic oriented society In this reformulation Islamist politics would function as a pressure group to make society more Islamic reinforcing the walls of semi separate internal communities and reinterpreting Islam in more liberal ways The September 11 2001 terror attack on the United States however demonstrates that the radical approach remains attractive to many Islamists Addressing these issues the contributors look at the countries where Islamist movements have been most important Case studies of revolutionary and reformist groups are followed by chapters discussing future alternatives for Islamist politics presenting arguments both advocating and critical of a potential liberal reformist interest group Islamism *The Turkish Economy in Crisis* Ziya Onis,Barry Rubin,2004-08-02 This book provides a set of critical perspectives on the economic crises of 2000 and 2001 focusing on both the origins and consequences of the crises Attention is drawn to the role of domestic actors as well as key external actors such as the International Monetary Fund in precipitating the twin crises **Turkish Foreign Policy** H. Kösebalaban,2011-04-11 This book explores how Turkey s contested national identity has affected its foreign policy since the late Ottoman era The book takes a constructivist approach asserting that identity matters for foreign policy decisions but it separates itself from statist approaches by bringing identity question into domestic politics The Dynamics of Sunni-Shia Relationships Sabrina Mervin,Rainer Brunner,Jean-François Legrain,Joseph Alagha,Reidar Visser,Thomas Pierret,Roel Meijer,Joas Wagemakers,Stéphane A. keep the price level stable industrial nations are paying attention to the security of energy supplies In brief terms this means that having more than one supplier of natural gas and more than one transport route would be strategically important This also affects political issues and international law and regulations economics science and technology The purpose of this book is to address opportunities extended from science and research pertaining to the exploitation and international trading of natural gas that involves transit countries This especially relates to the transport and handling of gas from remote regions and pipelines that are

Israel's Foreign Policy Beyond the Arab World Jean-Loup Samaan, 2017-11-28 For over 60 years Israel's foreign policy establishment has looked at its regional policy through the lens of a geopolitical concept named the periphery doctrine The idea posited that due to the fundamental hostility of neighboring Arab countries Israel ought to counterbalance this threat by engaging with the periphery of the Arab world through clandestine diplomacy Based on original research in the Israeli diplomatic archives and interviews with key past and present decision makers this book shows that this concept of a periphery was and remains a core driver of Israel's foreign policy The periphery was borne out of the debates among Zionist circles concerning the geopolitics of the nascent Israeli State The evidence from Israel's contemporary policies shows that these principles survived the historical relationships with some countries Iran Turkey Ethiopia and were emulated in other cases Azerbaijan Greece South Sudan and even to a certain extent in the attempted exchanges by Israel with Gulf Arab kingdoms The book enables readers to understand Israel's pessimistic or realist in the traditional sense philosophy when it comes to the conduct of foreign policy The history of the periphery doctrine sheds light on fundamental issues such as Israel's role in the regional security system its overreliance on military and intelligence cooperation as tools of diplomacy and finally its enduring perception of inextricable isolation Through a detailed appraisal of Israel's periphery doctrine from its birth in the fifties until its contemporary renaissance this book offers a new perspective on Israel's foreign policy and will appeal to students and scholars of Middle East Politics and History and International Relations

When Empire Meets Nationalism Didier Chaudet, Florent Parmentier, 2016-02-11 This innovative study presents an in depth political and sociological analysis of the internal power politics and imperial forms developed by the Russian neo eurasianists and the neo conservatives in the United States It traces the growth of nationalism and the concept of Empire in relation to the ideologies and foreign policy of both Russia and the USA Beginning with a genealogy of the two movements the authors present the intricacy of imperial rhetoric and nationalist ideologies in modern states compared with the distinctive definition of Empire as a politico historical form The extent to which these ideas have shaped the foreign policy of Russia and the USA is then related to events in Central Asia Afghanistan Iran Iraq Saudi Arabia and Turkey The analysis of each case provides a better

understanding of the imperial character of these foreign policies in relation to their nationalist foundations The combination of political theory and geopolitics makes this cutting edge research a must read to all interested in the evolving discourse surrounding Empire The Search for Security in the South Caucasus , The Age of Diversity Jean-Louis Roy,2016-11-01 In twenty five years 80% of the world population will live in Asia and Africa What changes culturally I particular should be expected in this century This is the vast and fascinating question Jean Louis Roy tries to answer with the help of correspondents from Africa Asia the Americas and Europe The author argues that shifting wealth from the West to Asia Latin America and Africa causes the reconfiguration of the economic map This tilting also transforms the global cultural space The dominant cultural position occupied by the Atlantic area will not disappear overnight However it is important to note that emerging countries are working earnestly well served by the tools of the digital age For example China is already the world leader in the art market and Nigeria the second in international film production after India Diversity emerges from all sides Welcome to the twenty first century *Iranian Foreign Policy Since 2001* Thomas Juneau,Sam Razavi,2013-07-24 Examining Iranian foreign policy with a focus on the years since 2001 this book analyses the defining feature of Iran s international and regional posture its strategic loneliness and the implications of this for the Islamic Republic s foreign policy Iranian Foreign Policy since 2001 offers an in depth analysis of the key drivers behind Iran s foreign policy power strategic culture and ideology In addition the authors examine Iran s relations with key countries and regions including its often tenuous relations with China Russia and America as well as its bilateral relations with non state actors such as Hezbollah The common thread running throughout the volume is that Iran is alone in the world regardless of its political manoeuvrings the Islamic Republic s regional and international posture is largely one of strategic loneliness Assimilating contributions from the US Canada Europe and Iran this book provides an international perspective both at the theoretical and practical levels and is essential reading for those with an interest in Middle Eastern Politics International Relations and Political Science more broadly

Valeria Talbot,2018-04-23 Over the last few years Turkey seems to have embraced the East again Ankara s closer relations with Eurasian countries go hand in hand with the global shift eastwards towards the ever growing and most dynamic region in the world It is therefore the result of an increasing differentiation of Turkey s foreign relations driven by strategic economic and energy interests Stronger ties with Eurasian countries i e Russia and China are also the litmus test for the ups and downs in relations with Washington and Brussels While Ankara still retains strong ties with the West it is laying the groundwork to further widen its interests to the East This report aims to analyse the multi faceted aspects of Ankara s Eurasian shift highlighting the domestic drivers of Turkey s Eurasianism the interests at stake the areas of cooperation and competition and last but not least the implications for the EU
