A New Handbook of Christian Theologians Donald W. Musser, 1996-09-01 In recent years the flow of Christian theology has been channeled in diverse streams represented by such trends and movements as black theology liberation theology feminist theology and womanist theology To survey this abundance and diversity of current Christian theology this book examines the theologies of representative theologians Particularly to help students navigate the sea of information the editors have identified various routes for reading and have traced several threads or issues common to many of the essays thus demarcating such recurrent concerns as the ways in which the theologians consider the sources and goals for theology their variant assumptions and conclusions about the nature of God their divergent approaches to understanding the person and purpose of the Christ and their distinct expectations for the destiny of history and faith *New & Enlarged Handbook of Christian Theology* Donald W. Global Ethics Sumner B Twiss, 2018-03-08 Inspired by the 1993 Parliament of the World's Religions this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. The contributors draw from both communities of discourse in addressing questions of method and theory and global moral issues such as human rights, distributive justice, politics of war, international business, the environment and genocide in a cross-cultural context. Inspired by the 1993 Parliament of the World's Religions this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. Its design is premised on two important insights. First, interreligious dialogue offers to comparative religious ethics a new, more persuasive rationale, agenda of issues and practical orientation. Second, comparative religious ethics offers to interreligious dialogue an arsenal of critical tools and methods which will enhance the sophistication of its practical work. In this way, both theory, a dominant concern and strength of comparative religious ethics and praxis, a dominant concern and strength of interreligious moral dialogue are joined together in mutual effort, each contributing to the benefit of the other. The volume's contributors share this vision of collaboration, drawing explicitly from both communities of discourse in a manner that crosses disciplinary and professional boundaries to deal creatively and constructively with important methodological and global moral issues. Although theory and practice cannot easily be separated in such a collaborative project, for the purpose of clarity the volume is divided into two main parts. The first specifically engages questions of method, theory and the social role of the public intellectual; the second on substantive moral themes and issues, many of which were raised at the 1993 Parliament. Taken together, the volume's essays articulate and illustrate new ways of approaching contemporary moral concerns cross-culturally yet with a rigor appropriate to our complex and pluralistic world.

The Way of the Lord Patrick D. Miller, 2007-02 The Way of the Lord contains twenty-one of respected biblical scholar Patrick Miller's best essays on Old Testament theology. In this work Miller focuses on the Commandments and the Psalms but also discusses what other parts of the Old Testament have to say to our theology today. In the first section Miller portrays the rich complexities of the Ten Commandments and asserts that aspects of them appear in expanded form throughout Scripture. His second section shifts to the Psalms, revealing them to be as much a book of theology as a book of poetry and song, pointing to a way of faith and life. The final section expands to consider more wide-ranging topics on theology and anthropology, contemplating the character of God and the nature of human beings. **Christians in Active Politics**

Yokoniah Mvula, 2022-09-16 Some Christians may be uncomfortable to think of Jesus as being political since the word politics or political has evolved to have negative overtones and connotations in our world today, particularly in Africa where this monograph from the Department of Theology and Religious Studies of the University of Malawi has originated. Christians often argue that their commission or job description does not include the political process, which is the way a society conducts its public affairs. However, Jesus, beginning with his temptation as in the gospels of Matthew and Luke, showed the

people who would follow him what it means to do God's will The third temptation conceived of in this study as a political temptation for power is the rational behind the arguments made in this study which begins by positing that the message of Jesus was not politically neutral and therefore Christianity as a super culture must be active in all sectors affecting social concerns if it is to truly be the change agent who Christ believes it to be It goes on to define and describe what it means to say that the message of Jesus was political and lays out the biblical theological ethical and experiential rationale for Christians active participation in the secular political arena The Mission of Today's Church R. Stanton

Norman, 2007-03-01 The Mission of Today's Church features twelve essays written by Baptist leaders addressing what it means to be a Christian today how believers best work together and what their future holds The Problem of Omnipotence in Current Theology Riichirō Hoashi, 1918 **Models of God and Alternative Ultimate Realities** Jeanine Diller, Asa

Kasher, 2013-06-13 The envisioned volume is a collection of recent essays about the philosophical exploration critique and comparison of a the major philosophical models of God gods and other ultimate realities implicit in the world's philosophical schools and religions and of b the ideas of such models and doing such modeling per se The aim is to identify exactly what a model of ultimate reality is create a comprehensive and accessible collection of extant models and determine how best philosophically to model ultimate reality if possible and desirable
