

From BETTER NUTRITION Magazine . . .

"The most valuable book in the world, from the point of view of the health seeker, would be a volume by a distinguished scientist, who is preferably also a physician, describing ways of preventing the merciless killer diseases of our time. He would draw his knowledge from accessible scientific sources which would show what kind of diet and way of life would be most likely to prevent these diseases.

"Such a volume has been published. It is likely to become, over the years, the most valuable guide to good health which anyone can have. The book is **New Hope for Incurable Diseases**. We guarantee that it will save many lives. You have never before read in simple easy-to-understand language such thorough, helpful information this book contains.

"We feel this is a historic book. We have waited for years of the nutritional basis of many diseases now known to be curable, which simply cannot be turned aside. We can and must send copies of this book to our congressmen and senators. We must insist that our family doctors and our ministers can give it to our ministers. donate copies to our public libraries and our schools. This is a must book."
