Perspectives on Strategic Change Luca Zan,Stefano Zambon,Andrew M. Pettigrew,2007-09-04 Luca Zan Stefano Zambon Andrew M Pettigrew This book has developed from an international research workshop organized by the Dipartimento di Economia e Direzione Aziendale University of Venice and the Centre for Corporate Strategy and Change

Warwick Business School University of Warwick The purpose of the workshop was to foster the growth of a European network of scholars and to help create a European perspective in studying strategic change The ten chapters in this book were first presented in Venice in May 1991 and have been substantially revised since then The ten commentaries on the chapters are in most cases substantial developments of the oral responses made at the workshop as indeed is the final review chapter by Andrew Van de Ven The theme of this book the study of strategic change processes remains as theoretically alive and empirically real in the 1990s as it did in the 1980s For many organizations in the European and North American context the 1980s was an era of radical change In this respect there is a wide array of examples Structural changes in old industries such as coal shipbuilding steel and heavy engineering led to a great employment loss and the impoverishment of certain regional economies that had remained dependent on those industries But it was not just the old industries that X INTRODUCTION experienced major change during the 1980s Futures Thinking and Organizational Policy, Volume 2 Deborah A. Schreiber, Zane L. Berge, 2024-06-01 The case studies in this Volume 2 book support the premise that organizational policies are what ensure institutionalization and sustainability of futures thinking in corporations non profits and educational institutions Futures thinking here reflects a systems approach utilized by organizational leaders to observe and interpret signals of change or disruption identify trigger points of impact employ foresight methodologies to build scenarios of the future and plan action and then ultimately translate actualize the most viable scenarios into successful business outcomes What is new in the field of futures thinking today is not the general source of change i e technology globalization and workforce well being but the tumultuous level of disruption occurring due to three phenomena explosive use of social media shift in great wealth and government instability Scholars and practitioners alike will find the case studies in this book provide nuanced insights into such disruptions as well as discussion of best practices to ensure successful business solutions *Journal of Health Care Interior Design*, 1989
