The New Institutional Economics of Corruption Graf Johann Lambsdorff, 2005 **The New Institutional Economics of Corruption** Johann Graf Lambsdorff, Markus Taube, Matthias Schramm, 2004-09-16 This book constitutes a thorough analysis of the phenomenon of corruption as seen from the perspective of New Institutional Economics one of the most influential new schools of thought in the social sciences of the past decade **The New Institutional Economics of Corruption**, 2005

The Institutional Economics of Corruption and Reform Johann Graf Lambsdorff, 2007-03-08 Corruption has been a feature of public institutions for centuries yet only relatively recently has it been made the subject of sustained scientific analysis Lambsdorff shows how insights from institutional economics can be used to develop a better understanding of why corruption occurs and the best policies to combat it He argues that rather than being deterred by penalties corrupt actors are more influenced by other factors such as the opportunism of their criminal counterparts and the danger of acquiring an unreliable reputation This suggests a novel strategy for fighting corruption similar to the invisible hand that governs competitive markets This strategy the invisible foot shows that the unreliability of corrupt counterparts induces honesty and good governance even in the absence of good intentions Combining theoretical research with state of the art empirical investigations this book will be an invaluable resource for researchers and policy makers concerned with anti corruption reform **International Handbook on the Economics of Corruption** Susan Rose-Ackerman, 2007-01-01 This collection of articles offers a comprehensive assessment of the subtle but nevertheless pervasive economic infrastructure of corruption It provides suitable core or adjunct reading for law school graduate and undergraduate courses on international economics international relations and international law American Society of International Law This exhaustive collection edited by Rose Ackerman cannot be called anything but excellent Overall a wonderful addition to the literature Highly recommended C J Talele Choice Susan Rose Ackerman is a world class economist and an authority on the economics of corruption This is a fine reference volume that every economist interested in this important subject will want to have as a ready reference Jagdish Bhagwati Columbia University US Economic research on corruption aims both to isolate the economic effects of quid pro quo deals between agents and third parties and to suggest how legal and institutional reforms might curb harms and enhance benefits In this comprehensive Handbook top scholars in the field provide specially commissioned essays both theoretical and empirical exploring both types of research The Handbook begins with an introductory essay by the editor followed by two chapters written by leading exponents of cross country research However the focus of the Handbook is on research at the micro level where policy can be made and evaluated These microeconomic studies fall into several overlapping categories The first group includes studies that link corrupt incentives to institutional structures particularly the organization of the state The second draws implications from surveys of households or businesses and from controlled experiments The third concentrates on particular sectors such as education tax administration public works customs services and pharmaceuticals

Finally two chapters assess corruption in the transition away from socialism in Europe and Asia

Development Models in Muslim Contexts Robert Springborg, 2009-09-30 Recent discussions of the Chinese economic development model the emergence of an alternative Muslim model over the past quarter century and the faltering globalisation of the Washington Consensus all point to the need to investigate more systematically the nature of these models and their competitive attractions This is especially the case in the Muslim world which both spans different economic and geographic categories and is itself the progenitor of a development model The Chinese model has attracted the greatest attention in step with that country's phenomenal growth and therefore provides the primary focus for this book This volume examines the characteristics of this model and its reception in two major regions of the world Africa and Latin America It also investigates the current competition over development models across Muslim contexts The question of which model or models if any will guide development in Muslim majority countries is vital not only for them but for the world as a whole This is the first political economy study to address this vital question as well as the closely related issue of the centrality of governance to development
