**Solutions for Sustainable Energy and Food Security** Mourad Amer, Mohamed El Kaftangui, Ibrahim El-Sayed Maarouf, Nauman Khalid, Sharul Sham Bin Dol, 2025-07-09 This book introduces a model for the built environment designed to incorporate sustainability at every level. It emphasizes the integration of environmental, social, and economic factors to create resilient urban spaces. Also, it presents a decision support system that optimizes energy management for sustainability, enabling real-time adjustments and reducing carbon footprints. It discusses innovative strategies for managing water and wastewater in swampland areas, offering insights from UIN Raden Fatah Palembang's adaptation efforts. Also, this book provides a thorough review of bio-based business models, examining their agility and adaptability in fostering sustainable innovations that respond to market and environmental changes. Moreover, the book explores a novel approach to renewable energy; this chapter assesses the feasibility of using vortex bladeless wind turbines for energy generation at airport runways, offering both conceptual and economic analyses. In addition, it discusses the creation and role of multi-actor forums in promoting a sustainable blue economy in the Black Sea region, emphasizing collaborative efforts to preserve marine resources. This book investigates the use of halophyte biochar as a sustainable soil amendment for sandy soils, demonstrating its potential to improve soil quality and promote sustainable agriculture. Also, the book aims to assess the sustainability of food-energy-water systems at the household level, advocating for integrated solutions that enhance resource efficiency and sustainability. This book delves into societal perceptions of climate change adaptation using interaction analysis to better understand public attitudes and their implications for policy and communication strategies. This book presents a case study from Istanbul, offering insights into how local identity can strengthen community resilience and sustainability efforts. Finally, the book provides a comprehensive guide to understanding and implementing sustainable practices across various sectors, from energy management and water resources to food systems and environmental education. It emphasizes the importance of interdisciplinary approaches and innovation agility in addressing global sustainability challenges.

**Musical Worlds in Yogyakarta** Max M. Richter, 2013 Musical Worlds in Yogyakarta is an ethnographic account of a vibrant Indonesian city during the turbulent early post-Soeharto years. The book examines musical performance in public contexts ranging from the street and neighbourhood through to commercial venues and state environments such as Yogyakarta's regional parliament, its military institutions, universities, and the Sultan's palace. It focuses on the musical tastes and practices of street workers, artists, students, and others. From street corner jam sessions to large-scale concerts, a range of genres emerge that cohere around notions of *campursari* (mixed essences) and *jalanan* (of the street). Musical worlds addresses themes of social identity and power, counterpoising Pierre Bourdieu's theories on class, gender, and nation with the author's alternative perspectives of inter-group, social capital, physicality, and grounded cosmopolitanism. The author argues that Yogyakarta is exemplary of how everyday people make use of music to negotiate issues of power and, at the same time, promote peace and intergroup appreciation in culturally diverse inner-city settings.
