The Borghese Collections and the Display of Art in the Age of the Grand Tour Carole Paul, 2017-07-05 The redecoration of the exhibition spaces at the Borghese palace and villa undertaken together with the reinstallation of the family's vast art collections was one of the most important events in the cultural life of eighteenth century Rome In this comprehensive study Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance its place in the history of Italian art architecture and interior design at a complex moment of transition from baroque to neoclassical style as well as its unrecognized but profound influence on the development of the modern art museum The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways Addressed primarily to a new audience of tourists from abroad the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition while their stylistic diversity and sophistication made a case for the continued vitality even modernity of Roman art and culture Designed for the exercise of a highly refined social performance these sites helped to model the experience of art as a form of enlightened modern civility

The Magazine of Art, 1897 Academy notes. Notes on Prout and Hunt John Ruskin, 1902 **Towers in the Void** S. E. Kile, 2023-05-30 The maverick cultural entrepreneur Li Yu survived the tumultuous Ming Qing dynastic transition of the mid seventeenth century through a commercially successful practice founded on intermedial experimentation He engaged an astonishingly broad variety of cultural forms from theatrical performance and literary production to fashion and wellness from garden and interior design to the composition of letters

and administrative documents Drawing on his nonliterary work to reshape his writing he translated this wide ranging expertise into easily transmittable woodblock printed form *Towers in the Void* is a groundbreaking analysis of Li Yu s work across these varied fields It uses the concept of media to traverse them revealing Li Yu s creative enterprise as a remaking of early modern media forms S E Kile argues that Li Yu s cultural experimentation exploits the seams between language and the tangible world He draws attention to the materiality of particular media forms expanding the scope of early modern media by interweaving books buildings and bodies Within and across these media Li Yu s cultural entrepreneurship with the technology of the printed book embraced its reproducibility while retaining a personal touch His literary practice informed his garden design and conversely he drew on garden design to transform the vernacular short story Ideas for extreme body modification in Li Yu s fiction remade the possibilities of real human bodies in his nonfiction writing *Towers in the Void* calls for seeing books bodies and buildings as interlinked media forms both in early modern China and in today s media saturated world positioning the Ming and Qing as a crucial site of global early modern cultural change

The Birth of Western Painting (Routledge Revivals) Robert Byron, David Talbot Rice, 2013-12-17 First published in 1930 this book deals with Byzantine art not as an isolated province but as one intimately connected with the subsequent history of European painting After a summary of the whole question in its relation to modern art the second chapter opens with a novel analysis of the iconoclast controversy and shows how it was only by this movement that Hellenistic naturalism was finally vanquished and the seed of interpretational art planted in Europe in its stead The third chapter reveals how this seed was nourished by the Constantinopolitan Renaissance and how that event combined with the increasing humanisation of religious emotion culminated not only in Duccio and Giotto but in the equally important work of their contemporaries at Mistra and Mount Athos A detailed account of these works is given and in the last part of the book the mystery of El Greco is finally resolved The book is based not only on extensive research but on personal observation of nearly all the works mentioned in Constantinople Greece Crete Italy and Spain It is an important and exciting addition to the history of European Art and establishes scientifically theories which only existed in conjecture before its publication The book includes 94 black and white plates
