Exotic Nuclei - Exon-2001, Proceedings Of The International Symposium Evgeni A Cherepanov, Yuri Erastovich Penionzhkevich, 2002-05-15 This book is a collection of talks presented at the International Symposium on Exotic Nuclei held at Lake Baikal Russia on 24-28 July 2001. The talks were given by the leading scientists in the physics of exotic nuclei. Among the topics of the Symposium were the following: production and study of properties of nuclei in extreme states, strongly deformed nuclei, highly excited nuclei, and nuclei far from the line of stability, as well as nuclei having large angular momenta. New results of investigations are presented in the book, in particular the data on new nuclei with proton or neutron haloes, on the changes in the shell structure of nuclei near the drip lines, and on the structure of exotic nuclei, including information on the island of inversion. The latest results on the synthesis of new superheavy elements are also provided, and existing detecting devices and accelerators of exotic nuclei, as well as future projects for the creation of similar set-ups, are presented.

Exotic Nuclei and Atomic Masses Juha Äystö, Peter Dendooven, Ari Jokinen, Matti Leino, 2013-11-11 The ENAM2001 Conference was held on July 2-7 2001 at the Rantasipi Aulanko Hotel in Hämeenlinna in southern Finland. The conference was organized by the Department of Physics and the Accelerator Laboratory of the University of Jyväskylä with support from the Physics Departments of the Universities of Helsinki and Turku. This conference, Exotic Nuclei and Atomic Masses, has now gained the status of a major nuclear physics serial conference. The previous conference was held in Bellaire, Michigan, USA. The conference was first held in 1967 in Lysekil, Sweden, then entitled Conference on Nuclei Far from Stability. ENAM2001 welcomed 270 participants from 34 countries, including 17 accompanying persons. The content of the program was selected based on the advice of the International Advisory Committee. The Committee members read and considered 253 submitted abstracts in selecting oral contributions. During the conference week 76 invited and oral talks were given. The rest of the contributions were presented in dedicated poster sessions. Many thanks go to the speakers of oral and poster presentations for their enthusiasm and for the high quality of their work, which demonstrated the liveliness of the field. Participation in the lectures was high and

contributions from the audience were important towards the success of this conference The organizers would like to especially thank Cary Davids of Argonne National Laboratory for his comprehensive summary talk which is also included in these Proceedings *Nuclear and Radiochemistry, 2 Volume Set* Jens-Volker Kratz, Karl Heinrich Lieser, 2013-12-04 The third edition of this classic in the field is completely updated and revised with approximately 30% new content so as to include the latest developments The handbook and ready reference comprehensively covers nuclear and radiochemistry in a well structured and readily accessible manner dealing with the theory and fundamentals in the first half followed by chapters devoted to such specific topics as nuclear energy and reactors radiotracers and radionuclides in the life sciences The result is a valuable resource for both newcomers as well as established scientists in the field Atomic Masses and Fundamental Constants 6 Jerry A. Nolen, 2012-12-06 The Sixth International Conference on Atomic Masses was held in East Lansing Michigan Sept 18 21 1979 The conference was initiated organized and sponsored by the Commission on Atomic Masses and Fundamental Constants of the International Union of Pure and Applied Physics The members of the conference committee are listed below W Benenson Chairman Michigan State University R C Barber University of Manitoba E R Cohen Rockwell International Institute of Chemical Physics V I Goldanskii Moscow J C Hardy Chalk River Canada W H Johnson University of Minnesota E Kashy Michigan State University Orsay France R Klapisch J A Nolen Jr Michigan State University R G H Robertson Michigan State University E Roeckl G S I Darmstadt B N Taylor National Bureau of Standards O Schult IKF Jülich A H Wapstra IFO Amsterdam N Zeldes Racah Institute Jerusalem The conference was a little different from the preceding one in Paris 1975 in that the fundamental constant aspects were limited to those directly related to atomic masses The gap is to be filled by the second International Conference on Precision Measurement and Fundamental Constants which is now scheduled for June 1981 in Gaithersburg Maryland Only one of the seven sessions in this conference was devoted to fundamental constant determinations The conference was very strongly supported by the Department of Energy the National Science Foundation and the International Union of Pure and Applied Physics **Condensed Matter Nuclear Science - Proceedings Of The 12th International Conference On Cold Fusion** Akito Takahashi, Ken-ichiro Ota, Yasuhiro Iwamura, 2006-12-09 Recent progress in the emerging field of condensed matter nuclear science CMNS is presented as a combination of basic nuclear science energy nanomaterials science electro chemistry and nuclear physics Key and selected papers from an important conference in this exciting area provide the latest advances in CMNS studies Current results from cold fusion and condensed matter nuclear science are included Atomic Masses and Fundamental Constants 4 J. Sanders, 2012-12-06 The Conference on Nuclear Masses and their Determination which was held at the Max Planck Institute in Mainz from 10 to 12 July 1956 resulted in the formation by the International Union of Pure and Applied Physics of a Commission on Atomic Masses and Related Constants Under the auspices of this Commission conferences covering these subjects were held in Hamilton Ontario 12 16 September 1960 in Vienna 15 19 July 1963 and in Winnipeg 28 August 1

September 1967 After the last of these conferences the Commission felt that the position regarding nuclear masses was reasonably good and that as a consequence the fundamental constants should get more emphasis in future conferences For this reason they were very pleased to accept an offer from the National Physical Laboratory to accept the main burden of organizing the Fourth International Conference on Atomic Masses and Fundamental Constants An Organizing Committee was appointed with the members J H Sanders Chairman B W Petley Secretary A Horsfield Treasurer P Dean A H Wapstra They were assisted by a Program Committee consisting of A H Wapstra Chairman E R Cohen A Horsfield W H Johnson Jr J H Sanders J Terrien

Condensed Matter Nuclear Science - Proceedings Of The 11th International Conference On Cold Fusion Jean-paul Biberian,2006-02-15 The International Conference on Condensed Matter Nuclear Science is held annually on a different continent every time This volume documents the proceedings of the 11th conference held in Marseilles France It includes articles that indicate the current position of the condensed matter nuclear science field With an extensive collection of articles this volume is indispensable since very few papers related to this field are published in scientific journals

Condensed Matter Nuclear Science - Proceedings Of The 10th International Conference On Cold Fusion Peter L Hagelstein,Scott R Chubb,2005-12-09 This volume is a collection of papers from the Tenth International Conference on Cold Fusion attended by most of the important groups around the world that are active in the field New results are presented in the area of excess heat production including observations of excess heat correlation of excess heat and helium and laser stimulation of excess heat Nuclear emissions from metal deuterides are put forth by several groups Observations of transmutation including the Iwamura experiment and others are also discussed Updates on theoretical efforts from the different groups are included as well
