Drawing on the author's extensive experience as a senior lecturer in Islamic Psychology and Counseling, this book delves into the rich and nuanced intersection of faith, spirituality, and mental health. The book is divided into 20 engaging chapters, each offering a deep dive into critical aspects of Islamic psychology. It begins by exploring the foundational interface between psychology and religion, emphasizing the often overlooked dimension of spirituality. Early chapters introduce key Islamic concepts such as *al Ruh* (the spirit), *al Qalb* (the heart), *al Nafs* (the self), and *al Aql* (the intellect), providing readers with a thorough understanding of the Islamic view of human nature, *Fitrah*, and personality. As the book progresses, it offers a detailed examination of the development of embryonic stages, the significant contributions of five eminent scholars of Islamic psychology, and the profound implications of the pillars of faith, *iman*, and Islam on individual well-being. The discussion extends to the spiritual science of *Tasawwuf*, exploring spiritual heart diseases and the illnesses of the soul, and providing insights into their spiritual cures. The book also addresses practical applications of Islamic psychology in therapeutic settings, with dedicated chapters on Islamic counseling, psychotherapy, and mental health. These sections highlight how Islamic teachings can be effectively utilized in counseling and therapy, considering the cultural and religious contexts of the patients. A unique exploration of the connection between *Jinn Ruqyah*, spiritual healing, and mental health further enriches this discussion. In the final chapters, the book turns its focus to the emotional aspects of the human experience. It examines emotions such as patience, gratitude, acceptance, trust in Allah, bravery, fear, happiness, sadness, love, and hate, all through the lens of Islamic teachings. These discussions offer a holistic view of how emotions are understood, managed, and nurtured in Islam. *Islam Psychology Principles and Practices* is a valuable resource for students, scholars, and professionals in the fields of psychology and Islamic studies, as well as for anyone interested in the ways in which faith and spirituality influence mental health and well-being. By bridging classical Islamic knowledge with modern psychological practices, this book offers a unique perspective that not only enhances our understanding of psychology but also enriches our approach to mental health in a way that is deeply rooted in faith and spirituality. Fascinating insights into modern strategic management from an Islamic perspective. While strategic management is a cornerstone of any MBA program, it's almost always taught from conventional theories and typically American case studies. This book takes those traditional theories and interprets them from an Islamic perspective, using more international case studies. Though primarily intended as a textbook for business students, the book is also extremely useful for

any Muslim business leaders who want to transform their businesses while complying with Shariah with a particular focus on developing corporate cultures and structures in sync with Islamic values Offers a critical review of conventional strategic management theory suggesting more effective alternatives based on a combination of conventional and Islamic theories Includes international case studies each with a particularly Islamic angle Written by a successful author team that has written extensively on the subject of business management from an Islamic perspective **Islamic Cognitive Behavioural**
