Fruit Fly Research and Development in Africa - Towards a Sustainable Management Strategy to Improve Horticulture Sunday Ekesi,Samira A. Mohamed,Marc De Meyer,2016-12-01 Horticultural sector presents many opportunities for economic development and improving livelihood of growers but several factors constrain production and limit the potential for trade of fruits and vegetables Tephritid fruit flies constitute a major constraint They cause enormous losses through direct feeding

damage and loss of market opportunities through imposition of quarantine restrictions by importing countries to prevent entry and their establishment In Africa several native *Ceratitis* and *Dacus* spp and exotic *Bactrocera* and *Zeugodacus* spp species inflict considerable losses to horticulture causing losses ranging from 30 90% Over the past 10 years of R coverage of African native species has been limited largely to *Bactrocera oleae* and *Ceratitis capitata* which are not economically important species in many Africa countries Indeed no book exist that have explicitly addressed economically important African fruit flies and none of the various reviews have specifically focused on the status of the bioecology economic impact and management of exotic and native fruit flies including several potentially invasive *Dacus* species attacking vegetables in Africa This book consolidates this status of knowledge and socio economic impact of various intervention techniques that are currently being applied across Africa The timing of the book is especially pertinent due to the changing fruit fly landscape in Africa caused by arrivals of the highly destructive alien invasives *Bactrocera dorsalis* B zonata and B latifrons and the priorities African countries have placed recently on export of fruits and vegetables to international markets This is an important reference material for researchers academics and students that are keen at improving horticulture and enhancing food and nutrition security in Africa and beyond *Fruit Fly Pests* Bruce A. McPherson, Gary J. Steck, 2020-03-10 A book of national and international importance *Fruit Fly Pests* is an exhaustive compendium of information with data provided by more than 100 contributors that will appeal to a wide variety of readers With huge losses experienced annually from fruit fly devastation information on these high profile insects is important to commercial fruit and vegetable growers marketing exporters government regulatory agencies and the scientific community Fruit flies impose a considerable resource tax and the ones who suffer range from shippers to end users The demand for world wide plant protection requires up to date research information This book meets that need This book contains the proceedings from the most recent International Symposium on Fruit Flies of Economic Importance Here you will find the major presentations given at the symposium with an added feature overviews from experts on topics not covered directly by participants in the symposium filling in gaps in the current literature The resulting publication is the most up to date and readable text to be found anywhere on the subject of tephritids **Biographical Memoirs** National Academy of Sciences, 2003-12-07 Biographic Memoirs Volume 83 contains the biographies of deceased members of the National Academy of Sciences and bibliographies of their published works Each biographical essay was written by a member of the Academy familiar with the professional career of the deceased For historical and bibliographical purposes these volumes are worth returning to time and again Areawide Pest Management Opende Koul, Gerit W. Cuperus, Norman Elliott, 2008 This book aims 1 to lay out the historical underpinnings of the areawide pest including weeds plant and stored grain insect pests management AWPM and to highlight current activity in the field 2 to delve into concepts that have direct impact on the successful implementation of AWPM which include i biological and ecological concepts important for understanding the dynamics of populations in spatially heterogeneous

environments ii the critical role of inter agency and multidisciplinary interactions in the development and implementation of AWPM programmes which are often complex inter agency and intergovernmental endeavours iii the roles of modelling meteorology and databases in AWPM programmes which by their nature are information intensive and iv the importance of economic and sociological evaluation in successful AWPM implementation and 3 to compile recent case examples of pest management programmes that have used the AWPM approach A survey in presented on a wide variety of programmes developed for protecting agricultural and natural resource systems and which use a wide range of pest management tactics
