Family Law and Personal Life John Eekelaar, 2006 How should our most intimate personal relationships be governed in a liberal society Should the state encourage a particular model of family life or support individuals in their pursuit of personal happiness To what extent do people have the right to shape the lives of their offspring This book examines the questions at the heart of family law rethinking the ideas that shape our understanding of the family as a social unit its purpose and the obligations and rights that belong to family members The book explores how the governance of personal relationships has depended on the exercise of power from the traditional assumptions of patriarchy where the male head of the family enjoyed full control over his dependents and descendants to the ideology of welfarism where state institutions protect the interests of the vulnerable at the expense of their close relations Emerging from these conflicting ideologies comes today's rights based culture where traditional expectations for behavior within a family sit within a new emphasis on the ability of minorities and traditional dependents to determine the shape of their own lives Against this background of shifting power relations the book explores the inter relationship between the legal regulation of people's personal lives and the values of friendship truth respect and responsibility In doing this a variety of controversial issues are examined in the light of those values including the legal regulation of gay and unmarried heterosexual relationships freedom of procreation state supervision over the exercise of parenthood the role of fault in divorce law the way parenthood is allocated the rights and responsibilities of parents to control their children the place of religion in the family the rights of separated partners regarding property and of separated parents regarding their children Throughout the book offers a new picture of the intimacy at the center of personal relationships and argues that only by understanding this intimacy and its role in human happiness can we arrive at a true framework for respecting and governing the personal lives of other people

Kleijkamp, 1999-09-23 4 Dutch Filiation Law **Aviation Security, Privacy, Data Protection and Other Human Rights: Technologies and Legal Principles** Olga Mironenko Enerstvedt, 2017-09-18 This book sheds light on aviation security considering both technologies and legal principles. It considers the protection of individuals in particular their rights to privacy and data protection and raises aspects of international law, human rights and data security among other relevant topics. Technologies and practices which arise in this volume include body scanners, camera surveillance, biometrics, profiling, behaviour analysis and the transfer of air passenger personal data from airlines to state authorities. Readers are invited to explore questions such as: What right to privacy and data protection do air passengers have? How can air passenger rights be safeguarded whilst also dealing appropriately with security threats at airports and in airplanes? Chapters explore these dilemmas and examine approaches to aviation security which may be transferred to other areas of transport or management of public spaces, thus making the issues dealt with here of paramount importance to privacy and human rights more broadly. The work presented here reveals current processes and tendencies in aviation security such as globalization, harmonization of regulation, modernization of existing data privacy regulation mechanisms, self-regulation, the growing use of Privacy by Design and improving passenger experience.
