Religion In Primitive Culture Part 2:

Religion in Primitive Cultures Wilhelm Dupré, 2011-10-10 Since its founding by Jacques Waardenburg in 1971 *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include among others category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. **Birding and Mysticism Volume 2** George E. Lowe, 2009-09-29 In volume 2 of *Birding and Mysticism: Enlightenment Through Bird Watching* there is no traditional table of contents; rather there are the five main parts and their sections and subsections which contain the substantive ideas and memes of volume 2, followed by six appendices. The main thrust of volume 2 concerns the many aspects, faces and forms of mysticism: religious, spiritual, rational, scientific, personal and practical. **The Routledge Companion to the Study of Religion** John Hinnells, 2005-06-21 Providing a genuinely full guide to the theory and methods related to religious studies, this text, written entirely by world-renowned specialists, is the ideal resource for those studying the discipline. **Interpretation and Dionysos** Park McGinty, 2011-07-19 Since its founding by Jacques Waardenburg in 1971 *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include among others category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. Communicating Christ in Animistic Contexts Gailyn Van Rhee, 1991 Whether in New Age mysticism, occultism, Haitian voodooism, Chinese ancestor veneration or Japanese Shintoism, animistic beliefs are widespread even today. Gailyn Van Rhee presents a rigorous biblical, theological and anthropological foundation for ministering in animistic contexts. The Adventure of the Human Intellect Kurt A. Raaflaub, 2016-04-27 *The Adventure of the Human Intellect* presents the latest scholarship on the beginnings of intellectual history on a broad scope encompassing ten eminent ancient or early civilizations from both the Old and New Worlds. It borrows themes from *The Intellectual Adventure of Ancient Man* (1946), updating an old topic with a new approach and up-to-date theoretical underpinning, evidence and scholarship. It provides a broad scope of studies including discussion of highly developed ancient or early civilizations in China, India, West Asia, the Mediterranean and the Americas. It examines the world view of ten ancient or early societies reconstructed from their own texts concerning the place of human beings in society and state in nature and cosmos in space and time in life and death and in relation to those in power and the world of the divine. It considers a diversity of sources representing a wide array of particular responses to differing environments, circumstances and intellectual challenges. It reflects a more inclusive and nuanced historiographical attitude with respect to non-elites, gender and local variations. It brings together leading specialists

in the field and is edited by an internationally renowned scholar Primitive Culture Edward Burnett Tylor, 1871 Tylor's ideology is best described in his most famous work the two volume *Primitive Culture* The first volume *The Origins of Culture* deals with various aspects of ethnography including social evolution linguistics and myth The second volume titled *Religion in Primitive Culture* deals mainly with his interpretation of animism On the first page of *Primitive Culture* Tylor provides an all inclusive definition which is one of his most widely recognized contributions to anthropology Culture or civilization taken in its broad ethnographic sense is that complex whole which includes knowledge belief art morals law custom and any other capabilities and habits acquired by man as a member of society *Primitive Culture* remained the pinnacle of Tylor's career important not only for its thorough study of human civilization and contributions to the emergent field of anthropology but also for its undeniable influence on a handful of young scholars *Last Essays* Friedrich Max Müller, 1901 **Myth and Method** Laurie L. Patton, Wendy Doniger, 1996 In confronting these tensions they provide an outline of the most troubling questions in the field and offer a variety of responses to them **Some Aspects of the Life of Jesus from the Psychological and Psycho-analytic Point of View** Georges Berguer, 1923 **State of Nature, Stages of Society** Frank Palmeri, 2016-03-29 Frank Palmeri sees the conjectural histories of Rousseau Hume Herder and other Enlightenment philosophers as a template for the development of the social sciences in the nineteenth and early twentieth centuries Without documents or memorials these thinkers he argues employed conjecture to formulate a naturalistic account of society's commercial and secular progression Palmeri finds evidence of speculative frameworks in the political economy of Malthus Martineau Mill and Marx He traces the influence of speculative thought in the development of anthropology and ethnography in the 1860s the foundational sociology of Comte and Spencer and the sociology of religion pioneered by Weber Durkheim and Freud Conjectural histories reveal a surprising ambivalence toward progress modernity and secularization among leading thinkers of the time an attitude that affected texts as varied as Darwin's *Descent of Man* Nietzsche's *Genealogy of Morality* and the novels of Walter Scott George Eliot and H G Wells Establishing the critical value of conjectural thinking in the study of modern forms of knowledge Palmeri concludes his investigation with its return in the work of Foucault and in recent histories on early religion political organization and material life Edward Burnett Tylor, Religion and Culture Paul-François Tremlett, Graham Harvey, Liam T. Sutherland, 2017-09-21 Through revisiting and challenging what we think we know about the work of Edward Burnett Tylor a founding figure of anthropology this volume explores new connections and insights that link Tylor and his work to present concerns in new and important ways At the publication of *Primitive Culture* in 1871 Tylor was at the centre of anthropological research on religion and culture but today Tylor's position in the anthropological canon is rarely acknowledged Edward Burnett Tylor *Religion and Culture* does not claim to present a definitive new Tylor The old Tylor the founder of British anthropology the definer of religion the intellectualist the evolutionist the liberal the utilitarian the avatar of white Protestant rationalism the Tylor of the canon remains Part I explore

debates and contexts of Tylor's lifetime while the chapters in Part II explore a series of new Tylors including Tylor the ethnographer and Tylor the Spiritualist re-writing the legacy of the founder of anthropology in the process. Edward Burnett Tylor, *Religion and Culture* is essential reading for anyone interested in the study of religion and the anthropology of religion.

The Dream in Native American and Other Primitive Cultures Jackson Steward Lincoln, 2003-04-14 This analysis opens with a historical review of dream interpretation exploring the structure, theory and function of dreams in primitive cultures and examining their predominant symbols, types and forms. Focusing on Native American dreams, the study defines their significance to the individual and their relationship to the culture pattern.

Clifford Geertz in Morocco Susan Slyomovics, 2013-09-13 Between 1963 and 1986, eminent American anthropologists Clifford and Hildred Geertz together and alone conducted ethnographic fieldwork for varying periods in Sefrou, a town situated in north-central Morocco south of Fez. This book considers Geertz's contributions to sociocultural theory and symbolic anthropology. Clifford Geertz made an immense impact on the American academy; his interpretative and symbolic approaches reoriented anthropology analytically away from classic social science presuppositions while his publications profoundly influenced both North American and Maghribi researchers alike. After his death at the age of 80 on October 30, 2006, scholars from local, national and international universities gathered at the University of California, Los Angeles to analyze his contributions to sociocultural theory and symbolic anthropology in relation to Islam, ideas of the sacred, Morocco's cityscapes, notably Sefrou's bazaar or suq, colonialism and post-independence economic development, gender and political structures at the household and village levels. This book looks back to a specific era of American anthropology beginning in the 1960s as it unfolded in Morocco and at the same time, the contributions examine new lines of enquiry that opened up after key texts by Geertz were translated into French and introduced to generations of francophone Maghribi researchers who sustain lively and inventive meditations on his Moroccan writings. This book was published as a special issue of *Journal of North African Studies*.

Studying Religions with the Iron Curtain Closed and Opened, 2015-03-31 *Studying Religions with the Iron Curtain Closed and Opened: The Academic Study of Religion in Eastern Europe* offers an account of the research focused on the origins, development and the current situation of the Study of Religions in the 20th century in countries such as the Czech Republic, Poland, Slovakia, Hungary, Estonia, Latvia, Ukraine and Russia. Special attention is devoted to the ideological influences determining the interpretation of religion, especially connected with the rise of Marxist-Leninist criticism of religion.

The Idea of Semitic Monotheism Guy G. Stroumsa, 2021 *The Idea of Semitic Monotheism* examines some major aspects of the scholarly study of religion in the long nineteenth century, from the Enlightenment to the First World War. It aims to understand the new status of Judaism and Islam in the formative period of the new discipline. Guy G. Stroumsa focuses on the concept of Semitic monotheism, a concept developed by Ernest Renan around the mid-nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan

and Semitic families of peoples cultures and religions This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages at the time of the Enlightenment and Romanticism Together with the rise of scholarly Orientalism this discovery offered new perspectives on the East as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations This innovative work studies a central issue in the modern study of religion Doing so however it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century up to the present day
