Religious Studies Theology And The University Conflicting Maps Changing Terrain:

Religious Studies, Theology, and the University Linell E. Cady, Delwin Brown, 2002-10-10 Explores the relationship between religious studies and theology and the place of each in the modern secular university **Discourse in Ritual Studies** Hans Schilderman, 2007 Discourse in Ritual Studies offers an introduction into the study of public worship from the perspective of ritual studies The contributing authors confront an action oriented and empirical approach of ritual studies with perennial and normative questions that characterize the study of liturgy **The Dialogical Spirit** Amos Yong, 2015-04-30 Contemporary proposals for Christian theology from post liberalism to Radical Orthodoxy and beyond have espoused their own methodological paradigms Those who have ventured into this domain of theological method however have usually had to stake their claims vis a vis trends in what may be called the contemporary post al age whether of the post modern post Christendom post Enlightenment post Western or post colonial varieties This volume is unique among offerings in this arena in suggesting a way forward that engages on each of these fronts and does so from a particularistic Christian perspective without giving up on Christian theology's traditional claims to universality This is accomplished through the articulation of a distinctive dialogical methodology informed by both Pentecostalism and Evangelicalism one rooted in the Christian salvation history narrative of Incarnation and Pentecost that is yet open to the world in its many and various cultural ethnic religious and disciplinary discourses Amos Yong here engages with twelve different interlocutors representing different ecumenical religious and disciplinary perspectives The Dialogical Spirit thus not only proffers a model for Christian theological method suitable for the twenty first century global context but also exemplifies this methodological approach through its interactions across the contemporary scholarly inter religious and theological landscape **Teaching Civic Engagement** Forrest Clingerman, Reid B. Locklin, 2017-08 Teaching Civic Engagement offers a new conceptual model an examination of theoretical questions and concerns and a variety of concrete teaching strategies to assist faculty in engaging questions of civic belonging and social activism in religion classrooms The book explores the civic relevance of the academic study of religion What is Religion? Nigel Ajay Kumar, 2014-01-15 What Is Religion is one of those questions rarely asked by Christian theologians who engage in interreligious discourse Nigel Ajay Kumar makes the case however that to answer this question is critical for Christian scholars who want to negotiate multiple religious identities as well as for those who want a clearer understanding of their own faith as religion Kumar takes a historical and theological approach to answering this question The history of the concept of religion is traced from biblical times to the Indian independence era Then a theological answer is offered not only by looking at the classical Indian theologian Pandipeddi Chenchiah but also by listening to other contemporary secular and theological voices This is the South Asian Edition of the original Wipf Stock edition 2013 with the same name **Reinventing Religious Studies** Scott S. Elliott, 2014-10-20 Reinventing Religious Studies offers readers an opportunity to trace the important trends and developments in Religious Studies over the last forty

years Over this time the study of religion has been transformed into a critical discipline informed by a wide range of perspectives from sociology to anthropology politics to material culture and economics to cultural theory Reinventing Religious Studies brings together key writings which have helped shape scholarship teaching and learning in the field All the essays are drawn from the CSSR Bulletin a provocative occasionally irreverent and always critical journal which has long been at the centre of debates in Religious Studies This collection will prove invaluable for students and scholars of theory and method in Religious Studies It offers readers a unique opportunity to understand the history of key issues in the study of religion and what remains central to the study of religion today

Comparative Secularisms in a Global Age L. Cady,E.

Hurd,2010-05-10 The history and politics of secularism and the public role of religion in France India Turkey and the United States It interprets the varieties of secularism as a series of evolving and contested processes of defining and remaking religion rather than a static solution to the challenges posed by religious and political difference

Theology and Prayer

Gary Eaborn,2023-06-26 What does it mean for rigorous thought about God to be guided by prayer What do Ignatius of Loyola s Spiritual Exercises teach us about discernment How can that discernment become a spiritual discipline which guides our choices throughout life How can that discipline guide the theological choices we all make including those of academic theologians This book moves beyond the abstract notion that theology should be prayerful to bring theology together with a particular spiritual practice It argues that the Spiritual Exercises are a system of prayerful discernment which already provide for reason to be used alongside an openness to all experience and all the ways that we can be guided by the Holy Spirit This book provides a constructive interpretation of the Exercises as a path of prayerful discernment which can be used throughout life It sees in the Exercises a way of active receptivity to all experience treating all experience as worthy of attention but also approaching that experience with humility and caution This book sees theology practiced in this way as a discerning spiritual discipline as more resistant to the challenges of modernity than theology which has been sundered from our spiritual life

Explorations in Post-Secular Metaphysics Josef Bengtson,2015-11-02 This book explores the metaphysical assumptions that underlie different interpretations of the relationship between religion and the secular faith and reason and transcendence and immanence It explores different answers to the question of how people of diverse religious and cultural identities can live together peacefully

Religion within the Limits of History Alone Demian

Wheeler,2020-09-01 Among the greatest challenges facing religious thinkers today is that created by historicism the notion that human beings and their myriad understandings of reality are utterly historical conditioned by contingent circumstances and tied to particular contexts In this book Demian Wheeler confronts the historicist challenge by delineating and defending a particular trajectory of historicist thought known as pragmatic historicism Rooted in the German Enlightenment and fully developed within the early Chicago school of theology pragmatic historicism is a predominantly American tradition that was philosophically nurtured by classical pragmatism and its intellectual siblings naturalism and radical empiricism Religion

within the Limits of History Alone not only undertakes a detailed genealogy of this pragmatic historicist lineage but also sets forth a constructive program for contemporary theology by charting a path for its future development Wheeler shows that pragmatic historicism is an underdeveloped resource for contemporary theology since it offers a model for normative religious thought that is theologically compelling yet wholly nonsupernaturalistic deeply pluralistic unflinchingly liberal and radically historicist

Religion and Politics Johann P. Arnason, 2014-04-23 Combining theoretical and empirical research these 12 essays examine the role of religion and its prospects in Europe On the one hand the volume discusses growing Islamic presence in Europe as a reminder of enduring religious pluralism not least in view of the high prominence given to Islamic experience in arguments against over generalised notions of secularisation On the other hand it explores the question of Christian motivated extremism and religious nationalism Against this background the contributors discuss the role of religion in other countries throughout the world including China Japan Russia and the MENA region

Analytic Theology and the Academic Study of Religion William Wood, 2021-01-28 Analytic theology can flourish in the secular academy and flourish as authentically Christian theology Analytic Theology and the Academic Study of Religion explains analytic theology to other theologians and scholars of religion while simultaneously explaining those other fields to analytic theologians William Wood defends analytic theology from some common criticisms but also argues that analytic theologians have much to learn from other forms of inquiry Analytic theology is a legitimate form of theology and a legitimate form of academic inquiry and it can be a valuable conversation partner within the wider religious studies academy Analytic Theology and the Academic Study of Religion articulates an attractive vision of analytic theology fosters a more fruitful inter disciplinary conversation and enables scholars across the religious studies academy to understand one another better

Theology and the End of Doctrine Christine Helmer, 2014-08-22 This book is about the crisis brought about by doctrine's estrangement from reality that is from actual lives experiences histories and from God By invoking the end of doctrine Christine Helmer opens a new discussion of doctrinal production that is engaged with the challenges and possibilities of modernity The end of doctrine refers on the one hand to unquestioning doctrinal reception which Helmer critiques and on the other represents an invitation to a new way of understanding the aim of doctrine in deeper connection to the reality that it seeks The book's first section offers an analysis of the current situation in theology by reconstructing a trajectory of Protestant theology from the turn of the twentieth century to today This history focuses primarily on the status of the word in theology and explains how changes in theology in the context of the political and social crisis in Europe in the 1920s and 1930s led to a distancing of the word from reality Helmer then turns to the constructive section of the book to propose a repositioning of theology to the world and to God Helmer's powerful work will inspire revitalized interest in both doctrine and theological inquiry itself

Empirical Theology in Texts and Tables Leslie J. Francis, Jeff Astley, Mandy Robbins, 2009-01-31 Empirical theology offers fresh and stimulating insights into the concerns of both the Church and the Academy It does this by accessing relevant empirical

evidence using the tools of the social sciences and placing this evidence in the context of theological critique and contemporary debate In this pioneering collection of focused essays leading experts of empirical theology illustrate key perspectives within this rapidly expanding discipline The first section of the book explores theoretical issues underpinning the main methods of obtaining empirical data and the use of these data within theology The other two sections display the role both of qualitative studies and of the analysis of quantitative data in exploring a range of theological beliefs and religious social and educational concerns Encyclopedia of Christian Education George Thomas Kurian, Mark A.

Lamport, 2015-05-07 Christianity regards teaching as one of the most foundational and critically sustaining ministries of the Church As a result Christian education remains one of the largest and oldest continuously functioning educational systems in the world comprising both formal day schools and higher education institutions as well as informal church study groups and parachurch ministries in more than 140 countries In The Encyclopedia of Christian Education contributors explore the many facets of Christian education in terms of its impact on curriculum literacy teacher training outcomes and professional standards This encyclopedia is the first reference work devoted exclusively to chronicling the unique history of Christian education across the globe illustrating how Christian educators pioneered such educational institutions and reforms as universal literacy home schooling Sunday schools women's education graded schools compulsory education of the deaf and blind and kindergarten With an editorial advisory board of more than 30 distinguished scholars and five consulting editors The Encyclopedia of Christian Education contains more than 1 200 entries by 400 contributors from 75 countries These volumes covers a vast range of topics from Christian education History spanning from the church's founding through the Middle Ages to the modern day Denominational and institutional profiles Intellectual traditions in Christian education Biblical and theological frameworks curricula missions adolescent and higher education theological training and Christian pedagogy Biographies of distinguished Christian educators This work is ideal for scholars of both the history of Christianity and education as well as researchers and students of contemporary Christianity and modern religious education *Regional, Critical, and Historical Approaches* Peter Antes, Armin W. Geertz, Randi R. Warne, 2008-12-19 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications *Classical Approaches to the Study of Religion* edited by Jacques Waardenburg 1973 and *Contemporary Approaches to the Study of Religion* edited by Frank Whaling 1984 85 *New Approaches to the Study of Religion* completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches **For the Civic Good** Walter Feinberg, Richard A. Layton, 2014-01-28 A case for teaching classes on world religion and the Bible in public schools *Christian Theology and the Secular University* Paul A. Macdonald, Jr., 2017-02-24 If the secular university by definition is non sectarian or non denominational then how can it accommodate a

discipline like Christian theology Doesn't the traditional goal of theological study which is to attain knowledge of the divine fundamentally conflict with the main goal of secular academic study which is to attain knowledge about ourselves and the world in which we live So why should theology be admitted or even care about being admitted into secular academic life And even if theology were admitted what contribution to secular academic life could it make Working from a Christian philosophical and theological perspective but also engaging a wide range of theologians philosophers and religious studies scholars Christian Theology and the Secular University takes on these questions arguing that Christian theology does belong in the secular university because it provides distinct resources that the secular university needs if it is going to fulfill what should be its main epistemic and educative ends This book offers a fresh and unique perspective to scholars working in the disciplines of theology philosophy and religious studies and to those in other academic disciplines who are interested in thinking critically and creatively about the place and nature of theological study within the secular university *The Gift of Theology* Rosemary P. Carbine, Hilda P. Koster, 2015-12-01 Kathryn Tanner is undoubtedly one of the most important contemporary North American theologians From landmark studies in systematic and constructive theology to economics Tanner's work is a contribution of inestimable value hallmarked by its depth precision provocativeness and grace Unifying the immense scope of her work is the particular vision of God's self-gift an internal dynamic communal reality that is expressed outward in acts of love and generosity that are creation incarnation and capacious life in the Spirit This vision as the grounding matrix of Tanner's theology has been extended beyond the disciplinary boundaries of theology in constructive explorations of economics social and political theory cultural studies and ethics This volume celebrates the vision and breadth of Tanner's unique contribution Essays by established scholars colleagues and former students trace out the key loci and themes from theological method the Trinity Christology creation to economics environmental and social ethics and politics to generate constructive and ecumenical conversation that presents Tanner as an important contemporary public theologian **In Academia for the Church** Ábrahám Kovács, Zoltán Schwáb, 2014-08-14 Tension between theory and practice in theological education is an unfortunate yet common occurrence with educators sometimes finding themselves on one extreme or the other Some academics can be so immersed in high level theological discourse that they hardly interact with the main questions of the average churchgoer while others are so keen to be engaging and relevant they fail to be rigorous in their scholarship Regardless of the reasons the results are the same failure to present the good news with a powerful credible voice To address this tension between academia and the church a group of Eastern European theologians came together in the spring of 2013 in Berekfő Hungary This publication is a collection of 10 edited papers presented at that conference While topics are addressed from a European context the principles behind them are far reaching providing important insight for the global church and academy alike
