Religion in Modern Europe Grace Davie,2000-08-03

Religion in Modern Europe examines religion as a form of collective memory This is a memory held in place by Europe s institutional churches educational systems and the mass media all of which are themselves responding to rapid social and economic change Europe s religious memory is approached in the following ways as vicarious a particularly European characteristic as precarious especially among young people and as it is portrayed by the media The memory may fragment be disputed and in extreme cases disappear Alternatives may emerge The challenge for European societies is to affirm healthy mutations in religious memory and discourage others The book also examines the increasing diversity of Europe s religious life European Societies Series Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent

Religions, Beliefs and Education in the European Court of Human Rights Nigel Fancourt,2024-02-20 This book represents an exposition of judicial pedagogies as a new concept and discusses juridical educational issues in detail through an analysis of the educational claims and assumptions of judges decisions in the European Court of Human Rights ECtHR It sheds light on how within courtrooms around the world judges are increasingly being asked to decide upon issues of religion and belief in schooling whether about admissions policies curriculum planning or pupils and teachers dress and jewellery With key human rights principles at stake these proceedings are often fraught clashing with strong opinions about education and schooling Focusing on decisions made in the European Court of Human Rights ECtHR the author considers how the supranational court looks at these issues and considers the ECtHR s role within the European Education space Drawing upon research and scholarship surrounding these questions the book surveys a series of educational issues including curriculum and assessment and takes a comparative approach in the discussion of case studies to demonstrate the variety and depth of judges thinking Thus rather than considering the national or supranational legal principles and questions as jurisprudential issues typically about religion or human rights it reviews them from an educational perspective as folk theories of teaching and learning Finally it considers the implications of a theory of judicial pedagogy for the courts educational competence in deciding on these matters for education and educational policy research the European education space legal scholarship and

for legal and judicial education Developing a novel and innovative approach to the pedagogies at play in a courtroom and providing fresh insights into the courts as agents of social change it will appeal to scholars and researchers working across the disciplines of education law and religious studies *The Oxford Handbook of Religion and Europe* Grace Davie, Lucian Leuștean, 2022 Features contributions from leading scholars providing crucial insight into the role of religious ideas structures and institutions in the making of Europe Introduces the building blocks of Europe's religious and the part that they played in the formation of the continent Explores the relationship between religious communities and ideologies in the twentieth century connections that play out very differently in East and West Europe Examines the role of religion in the construction of the European Union from the end of the Second World War until the present day Assesses the relationship between the major world religions and the idea of Europe Book jacket *Integrative Religious Education in Europe* Wanda Alberts, 2012-02-14 This book is a contribution to the development of the young discipline of the didactics of the Study of Religions Religionswissenschaft in international perspective Integrative religious education refers to education about different religions in classrooms with children of various religious and non religious backgrounds Cornerstones of recent debates about theory and methodology in the academic study of religions and in education are discussed in the first chapter They form the basis of the following analysis and evaluation of current approaches to integrative religious education in Europe with a special focus on England and Sweden Particular attention is paid to the different underlying concepts of religion education and ways of representing religious plurality in these approaches Building on a discussion of the current situation of teaching and learning about religions in schools in Europe in the context of wider cultural social and political debates the book concludes with the suggestion of a framework for integrative religious education in Europe from a perspective that combines insights from the study of religions and education *The Routledge Handbook of Religion and Politics in Europe* Effie Fokas, Alberta Giorgi, 2025-12-30 The Routledge Handbook of Religion and Politics in Europe is an outstanding reference source to this engaging subject area A number of developments at the intersection between religion and politics in Europe including the terrorist attacks echoing that of 9 11 the rise of the far right and populism linked to anti Islamic rhetoric in the context of migration of Muslims into Europe and a series of controversies to do with free speech and hate speech have served as a catalyst for a surge in interdisciplinary scholarship The relationships between religion and politics are increasingly recognised as central to our understanding of contemporary European life and are investigated from a growing variety of approaches and perspectives Comprising 31 chapters by a team of international contributors this handbook is divided into three parts Theoretical underpinnings and methodological perspectives Actors policies and institutions Emerging themes and current debates Within these sections central issues debates and problems to religion and politics are examined including migration religion in the city digital religion environmentalism humour celebrity and leadership activism authority citizenship mediatisation secularism judicialisation marketisation political economy security

European parliament human rights party politics populism feminism political violence hate speech bioethics pandemics and health cults race equality and inequality The Routledge Handbook of Religion and Politics in Europe is essential reading for students and researchers in religious studies and politics This handbook will also be very useful for those in related fields such as cultural studies media studies anthropology and sociology Religious Diversity in Europe Riho Altnurme, Elena Arigita, Patrick Pasture, 2022-03-10 Drawing on research funded by the European Commission this book explores how religious diversity has been and continues to be represented in cultural contexts in Western Europe particularly to teenagers in textbooks museums and exhibitions popular youth culture including TV and online as well as in political speech Topics include the findings from focus group interviews with teenagers in schools across Europe the representation of minority religions in museums migration and youth subculture *The European Wars of Religion* Wolfgang Palaver, Harriet Rudolph, Dietmar Regensburger, 2016-12-05 In recent years religion has resurfaced amongst academics in many ways replacing class as the key to understanding Europe's historical development This has resulted in an explosion of studies revisiting issues of religious change confessional violence and holy war during the early modern period But the interpretation of the European wars of religion still remains largely defined by national boundaries tied to specific processes of state building as well as nation building In order to more thoroughly interrogate these concepts and assumptions this volume focusses on terms repeatedly used and misused in public debates such as religious violence and holy warfare within the context of military conflicts commonly labelled religious wars The chapters not only focus on the role of religion but also on the emerging state as a driver of the escalation of violence in the so called age of religious war By using different methodological and theoretical approaches historians philosophers and theologians engage in an interdisciplinary debate that contributes to a better understanding of the religio political situation of early modern Europe and the interpretation of violent conflicts interpreted as religious conflicts today By adopting a multi disciplinary approach new and innovative perspectives are opened up that question if in fact religion was a primary driving force behind these conflicts Christian Pilgrimage in Modern Western Europe Mary Lee Nolan, Sidney Nolan, 2018-06-15 Christian Pilgrimage in Modern Western Europe is a commanding exploration of the importance of religious shrines in modern Roman Catholicism By analyzing more than 6 000 active shrines and contemporary patterns of pilgrimage to them the authors establish the cultural significance of a religious tradition that today touches the lives of millions of people Roman Catholic pilgrimage sites in Western Europe range from obscure chapels and holy wells that draw visitors only from their immediate vicinity to the world famous often thronged shrines at Rome Lourdes and Fátima These shrines generate at least 70 million religiously motivated visits each year with total annual visitation exceeding 100 million Substantial numbers of pilgrims at major shrines come from the Americas and other areas outside Western Europe Mary Lee Nolan and Sidney Nolan describe and interpret the dimensions of Western European pilgrimage in time and space a cultural geographic approach that reveals regional variations in types of

shrines and pilgrimages in the sixteen countries of Western Europe They examine numerous legends and historical accounts associated with cult images and shrines showing how these reflect ideas about humanity divinity and environment The Nolans demonstrate that the dynamic fluctuations in Christian pilgrimage activities over the past 2 000 years reflect socioeconomic changes and technological transformations as well as shifting intellectual orientations Increases and decreases in the number of shrines established coincide with major turning points in European history for pilgrimage no less than wars revolutions and the advent of urban industrial society is an integral part of that history Pilgrimage traditions have been influenced by and have influenced science literature philosophy and the arts Christian Pilgrimage in Modern Western Europe is based on ten years of research The Nolans collected information on 6 150 shrines from published material correspondence with bishops and shrine administrators and interviews They visited 852 Western European shrines in person Their book will be of interest to many general readers and of special value to historians cultural geographers students of comparative religion anthropologists social psychologists and shrine administrators

The European Court of Human Rights and Minority Religions Effie Fokas, James T Richardson, 2020-04-28 This book includes a collection of studies focused on engagements of religious minorities with the European Court of Human Rights ECtHR Beginning with an introduction of the global importance of the ECtHR as a standard setter in the protection of religious minority rights the subsequent five chapters entail critical assessments of some of the Court s case law dealing with religious minority claims exploring their clarity and consistency or lack thereof and controversiality In the process these texts impart a nuanced perspective on the challenges the Court faces in striking the

right balance between protecting individual freedoms and respecting state rights to manage nationally and culturally sensitive matters The second set of contributions makes readers privy to the varied results of this balancing act on the ground Specifically it offers empirically based insight into the impact of the Court's religion related case law on grassroots religious minority groups working to defend their individual and communal rights The chapters taken together deepen our understanding of the ECtHR in its approach to and impact on religious minorities and offer a rare vantage point on the Court from the messages it generates to the messages received by religious minorities at the grassroots level The chapters in this book were originally published in Religion State Society the Journal of Muslim Minority Affairs and Democratization

Religion and Politics in Europe and Latin America Andrés

Pérez-Baltodano,2025-09-22 This book presents a comparative interpretation of the socio emotional histories of Europe and Latin America offering a novel perspective on the roles of religion and politics in managing collective fear and insecurity in these two regions Emphasizing the historical fears and insecurities faced by underprivileged sectors of Latin American society the book draws on cognitive and social sciences to compile political socioeconomic and cultural landmarks identifying continuities and ruptures in European and Latin American histories The volume highlights Europe s success and Latin America s relative failure in crafting political visions capable of taming fear and insecurity It shows how this largely correlates with how meticulous providentialism the belief that God governs history has been supplanted by general providentialism the belief that God does not intervene in history in the religious cultures of the two regions This shift corresponds to the degree of control individuals feel they have over their history and destiny which typically aligns with their actual social affordances At the heart of these discussions is the notion that the authenticity of the theoretical foundations of political visions is conditioned by society s view of the divine which ultimately determines the capacity of these visions potential to impact history Religion and Politics in Europe and Latin America is a useful resource for students and academics interested in Latin American and European history politics and culture *Freedom of Religion or Belief in the European Convention on Human Rights* Caroline K.
