Introduction to the Theory of Knowledge Dan O'Brien, 2016-12-16 An Introduction to the Theory of Knowledge 2nd Edition guides the reader through the key issues and debates in contemporary epistemology. Lucid, comprehensive and accessible, it is an ideal textbook for students who are new to the subject and for university undergraduates. The book is divided into five parts. Part I discusses the concept of knowledge and distinguishes between different types of knowledge. Part II surveys the sources of knowledge, considering both a priori and a posteriori knowledge. Parts III and IV provide an in-depth discussion of justification and scepticism. The final part of the book examines our alleged knowledge of the past, other minds, morality and God. In this extensively revised second edition, there are expanded sections on epistemic luck, social epistemology and contextualism, and there are new sections on the contemporary debates concerning the lottery paradox, pragmatic encroachment, peer disagreement, safety, sensitivity and virtue epistemology. Engaging examples are used throughout the book, many taken from literature and the cinema. Complex issues such as those concerning the private language argument, non-conceptual content and the new riddle of induction are explained in a clear and accessible way. This textbook is an invaluable guide to contemporary epistemology.

The Art of Remembering Yat Ming Loo, Hua Li, Jing Xie, Eugenio Mangi, 2024-05-31 Focusing on the non-Western context and case studies, this book explores theories of interdisciplinary architectural thinking and the construction of urban memory in Chinese cities, with an emphasis on contemporary architecture and the diversity of agencies. China has undergone one of the fastest urbanisation and urban renewal processes in human history, but discussions of urban memory in China have tended to be practice-oriented and lack theoretical reflection. This book brings together interdisciplinary architectural scholarship to interrogate the production of urban memory and examine experiences in China. The 14 chapters explore different processes, projects, materials, architecture and urban spaces in different Chinese cities by analysing cityscapes such as temples, bridges, conservation projects, architectural design, historical architecture, memorial hall, market street, city images, custom bike, food market and so on. The book deals with different agencies and methods, tangible and intangible, in the construction of memories aimed at promoting hybridised multiple identities and explores the interplay of different versions of memory, i.e. state, public, regional, local, individual and collective memory. This book will be essential reading for scholars and students of architecture and urbanism, cultural studies and China studies, as well as architects, urban planners and historians interested in these fields.
