Age Matters Toni M. Calasanti, Kathleen F. Slevin, 2013-10-11 This volume of original chapters is designed to bring attention to a neglected area of feminist scholarship aging After several decades of feminist studies we are now well informed of the complex ways that gender shapes the lives of women and men Similarly we know more about how gendered power relations interface with race and ethnicity class and sexual orientation Serious theorizing of old age and age relations to gender represents the next frontier of feminist scholarship In this volume leading national and international feminist scholars of aging take first steps in this direction illuminating how age relations interact with other social inequalities particularly gender In doing so the authors challenge and transform feminist scholarship and many taken for granted concepts in gender studies

Following Charcot Julien Bogousslavsky, 2011 Jean Martin Charcot the iconic 19th century French scientist is still regarded today as the most famous and celebrated neurologist in the world Despite the development of strong independent schools of thought in the USA UK and Germany his Salpêtrière school has become symbolic of the early development and rise of neurological practice and research This book presents a fresh look at the origins of nervous system medicine and at the fate of Charcot's school and pupils Special emphasis is placed upon the parallels and interactions between developments in neurology and mental medicine clearly demonstrating that Charcot is not only the father of clinical neurology but also wielded enormous influence upon the field we would come to know as psychiatry Providing new insights into the life and work of Charcot and his pupils this book will make fascinating reading for neurologists psychiatrists physicians and historians

Families in Jeopardy Roddey Reid, 1993 This interdisciplinary study shows how a new commercial and learned print culture attempted to write and

regulate individual and collective practices in terms of a master idiom of family sexuality and gender upon which a post revolutionary national community would turn Offering a radical new approach to family and textuality in the field of cultural and literary studies the author argues that from its very inception this print culture from domestic manuals to public health reports and most notably prose fiction promoted new norms of behavior and selfhood not through narratives of idealized family life but instead by means of a rhetoric of danger lack and pathology The book follows familial discourse as it assigns deficient or illicit behaviors to ever wider social groups from the Old Regime nobility and the traditional bourgeoisie to the new middle classes urban workers and the peasants in the countryside to finally the new social elites of the late nineteenth century The author describes how the lack of normative family and sexuality became the primary tactic for designating social others within the social body and for reworking social and gender identities so as to authorize new knowing practices and expertise and new objects of knowledge and discipline Furthermore through analyses of novels by Bernardin de Saint Pierre Sue Balzac Sand Zola and Gide the author demonstrates that the peculiar force of the French novel resided in its power to reach wide newly literate audiences and to inscribe new identities and desires through the reading process Finally the book proposes the provocative thesis that because of these tales of threatened or failed family life the domestic conjugal household has never worked even down to our time it has always been in crisis endangered by forces from without and within and thus in constant need of protection and renewal *The Radicalism of Romantic Love* Renata Grossi, David West, 2017-03-31

Undoubtedly Romantic love has come to saturate our culture and is often considered to be a or even the major existential goal of our lives capable of providing us with both our sense of worth and way of being in the world The Radicalism of Romantic Love interrogates the purported radicalism of Romantic love from philosophical cultural and psychoanalytic perspectives exploring whether it is a subversive force capable of breaking down entrenched social political and cultural norms and structures or whether in spite of its role in the fight against certain barriers it is in fact a highly conservative impulse Exploring both the grounds for the central place of Romantic love in contemporary lives and the meaning extent and nature of its supposed radicalism this volume considers love from a variety of theoretical perspectives with attention to matters of gender sexuality class and ethnicity With authors examining a range of questions including the role of love in the same sex marriage debate polyamory and the notion of love as a political force The Radicalism of Romantic Love illuminates a fundamental but perplexing aspect of our contemporary lives and will appeal to scholars across the social sciences and humanities with interests in the emotions and love as a social and political phenomenon [Index-catalogue of the Library of the Surgeon General's Office, United States Army \(Army Medical Library\)](#) National Library of Medicine (U.S.), 1959 [From the Sexologists to Sexual Liberation](#) Cornell University. REALITY Just a Thought Gregory P. Lomb, 2022-05-04 What is reality Is there an absolute reality or is reality merely relative in nature If Isaac Newton were alive today could Newton make claim to reality as he did gravity space and time or has Einsteinium thought overruled Newtonian thoughts on reality as well as our thoughts on gravity space and time Many make claim reality is nothing more than their personal interpretation of the world but just about everyone interprets the world differently Are there really a multitude of realities Many of us men and women alike perceive and then define the world as it best fits their desire of what they wish the world to be Most people only see and hear what they want to see and hear they almost never agree as to the objective truth of things as they really are they almost never agree as to what is reality This book is not a scientific study objectively testing reality The thoughts I put forth herein are merely my attempt at objectively postulating what I believe to be an absolute reality pertaining to sometimes specific and sometimes general situations in life
