Fugitive Poses Gerald Robert Vizenor,2000-01-01 Native sovereignty Gerald Vizenor contends is not possessed but expressed It emerges not from practicing vengeful and exclusionary policies and politics or by simple recourse to territoriality but by turning to Native transmotion the forces and processes of creativity and imagination lying at the heart of Native world views and actions Overturning long held scholarly and popular assumptions Vizenor offers a vigorous examination of tragic cultures and victimry

National Minorities and the European Nation-states System Jennifer Jackson Preece,1998 The collapse of Yugoslavia Czechoslovakia and the Soviet Union has resulted in a proliferation of discontented national minorities Thus the possibility for destabilizing ethnic conflict has become acute National minorities have

accordingly emerged as a major focus of international relations in post Cold War Europe Jennifer Jackson Preece's powerful new study offers an innovative analysis of these developments Scrutinizing them within the historical context of changing practices and evolving norms she reveals that the European national minority question is nothing new rather its foundations extend deep into contemporary history Moreover the problem is intrinsically derivative of the nation states system itself a system which potentially intensifies minority disaffection Examining these issues against the backdrop of relevant treaties diplomatic negotiations and international practices Jackson Preece presents the definitive assessment of the fate of national minorities in the European states system

Post-Cold War Identity Politics Marko Lehti, David J Smith, 2004-11-23 During the past decade northern Europe has started to assume an identity of its own Categories of East and West have become blurred challenging as well the idea of what it means to be Nordic Post Cold War Identity Politics maps this process in Scandinavia Looking at projects designed to help regional development in the Nordic countries it assesses whether a new way of defining Northernness is emerging The book highlights the existence of co existing and to some extent competing region building projects in northern Europe It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future

Focusing especially on post 1950 Tibet under Chinese Communist rule Smith analyzes Marxist Leninist and Chinese Communist Party nationalities theory and policy their application in Tibet and the consequent rise of Tibetan nationalism Concluding that the essence of the Tibetan issue is self determination Smith bolsters his argument with a comprehensive analysis of modern Tibetan and Chinese political histories Tribal Territory, Sovereignty, and Governance Erin Fouberg, 2018-10-24 The author explores how tribal governments have worked through the constraints of their eroded territory and sovereignty to provide effective leadership and governance Africa and U.S. National Interests Frances K. Scott, 1997 The State, War, and the State of War Kalevi Jaakko Holsti, 1996 War has traditionally been studied as a problem deriving from the relations between states Strategic doctrines arms control agreements and the foundation of international organizations such as the United Nations are designed to prevent wars between states Since 1945 however the incidence of interstate war has actually been declining rapidly while the incidence of internal wars has been increasing The author argues that in order to understand this significant change in historical patterns we should jettison many of the analytical devices derived from international relations studies and shift attention to the problems of weak states those states unable to sustain domestic legitimacy and peace This book surveys some of the foundations of state legitimacy and demonstrates why many weak states will be the locales of war in the future Finally the author asks what the United Nations can do about the problems of weak and failed states *Forgetting Ourselves* Linda S. Bishai, 2006-12-01 In *Forgetting Ourselves* Linda Bishai thoroughly examines why secession has been ignored by international relations both in theory and practice Mainstream perspectives in international relations theory have up to this point questioned neither state formation nor the inside outside divide of state sovereignty Bishai however historicizes and questions the concept of secession itself and the component assumptions of territoriality and identity upon which it rests Sovereign Rights and Territorial Space in Sino-Japanese Relations Unryu Suganuma, 2001-03-01 In September 1996 members of the right wing Japan Youth Federation repaired a lighthouse on one of the Diaoyu J Senkaku Islands a small group of uninhabited islets north of Taiwan in the Liuqiu J Ryukyu chain known today as Okinawa For months outraged ethnic Chinese in Hong Kong and Taiwan protested Japan's presence in the islands and violent confrontations between protesters and the Japanese Marine Self Defense Force resulted Tension over these incidents has subsided since 1996 but the sovereignty of the islands remains a concern for both China and Japan The long and complex history of relations between the two countries has made the problem difficult to resolve This volatile situation has been further complicated by the involvement of other countries including the U S Although the Diaoyu Senkaku matter may be characterized as a simple territorial dispute between two nations it exposes complicated geopolitical relations among Japan China Taiwan and the U S in the Asia Pacific region *Sovereign Rights and Territorial Space in Sino Japanese Relations* is an investigation of the highly topical issues involved in the Diaoyu Senkaku confrontation It begins by addressing the issue of the historical development of the dispute To whom do the islands belong When did China and Japan

become involved Does historical evidence prove who has sovereignty over the islands How has irredentism the claim to territory based on one or another historical right become a major state policy in both countries Other issues center on Chinese views of sovereignty and methods of delimiting territorial boundaries during the Ming and Qing periods the Chinese concept of hegemony and the history behind the deep mistrust that permeates Sino Japanese relations Finally the author discloses the interwoven relationship between geography and history in East Asia Chinese and Japanese geographers have for centuries been engaged in historical analyses of the islands Their work which has been used in the development of national security and diplomatic policies is an important resource and one that this book makes available to Western scholars for the first time In addition to his careful examination of these and other sources Suganuma utilizes theoretical writings on geographical irredentism to expose the biases of recent work on the Diaoyu Senkaku dispute This volume is the fullest scholarly treatment that the contested issue of the Diaoyu Senkaku Islands has received to date in any language It contains much of interest for historians of modern China and Japan as well as for political scientists looking for new insights into international relations and Sino Japanese interactions No one who reads it will look at sovereignty in the same way again

The Republican Legacy in International Thought Nicholas Greenwood Onuf, 1998-01-08 Republicanism has enjoyed a revival of scholarly interest in several fields In this book Nicholas Onuf provides the first major treatment of the republican way of thinking about law politics and society in the context of international thought The author tells two stories about republicanism starting with Aristotle and culminating in the eighteenth century when international thought became a distinctive enterprise These two stories surround the thought of Vattel and Kant and by telling them side by side the author identifies a substantial but little acknowledged legacy of republicanism in contemporary discussions of sovereignty intervention international society peace levels of analysis and the global economy In identifying this legacy in contemporary thought Nicholas Onuf develops his constructivist approach to international theory
