Entering the Fray Jonathan Daniel Wells, Sheila R. Phipps, 2009-12-01 The study of the New South has in recent decades been greatly enriched by research into gender reshaping our understanding of the struggle for woman suffrage the conflicted nature of race and class in the South the complex story of politics and the role of family and motherhood in black and white society This book brings together nine essays that examine the importance of gender race and culture in the New South offering a rich and varied analysis of the multifaceted role of gender in the lives of black and white southerners in the troubled decades of the late nineteenth and early twentieth centuries Ranging widely from conservative activism by white women in 1920s Georgia to political involvement by black women in 1950s Memphis many of these essays focus on southern women s increasing public activities and high profile images in the twentieth century They tell how women shouldered responsibilities for local national and international interests but just as nineteenth century women s status could be at risk from too much public presence women of the New South stepped gingerly into the public arena taking care to work within what they considered their current gender limitations The authors both established and up and coming scholars take on subjects that reflect wide ranging sophisticated and diverse scholarship on black and white women in the New South They include the efforts of female Home Demonstration Agents to defeat debilitating diseases in rural Florida and the increasing participation of women in historic preservation at Monticello They also reflect unique personal stories as diverse as lobbyist Kathryn Dunaway s efforts to defeat the Equal Rights Amendment in Georgia and Susan Smith s depiction by the national media as a racist southerner during coverage of her children s deaths Taken together these nine essays contribute to the picture of women increasing their movement into political and economic life while all too often still maintaining their gendered place as determined by society Their rich insights provide new ways to consider the meaning and role of gender in the post Civil War South

The White Man's World Bill Schwarz, 2011-10-27 Memories of Empire is a trilogy which explores the complex subterranean political currents which emerged in English society during the years of postwar decolonization Bill Schwarz shows that through the medium of memory the empire was to continue to possess strange afterlives long after imperial rule itself had vanished The White Man s World the first volume in the trilogy explores ideas of the white man as they evolved during the time of the British Empire from the mid nineteenth century to the mid twentieth century looking particularly at the transactions between the colonies and the home society of England The story works back from the popular response to Enoch Powell s Rivers of Blood speech in 1968 in which identifications with racial whiteness came to be highly charged Driving this new racial politics Bill Schwarz proposes were unappeased memories of Britain s imperial past The White Man s World surveys the founding of the so called white colonies looking in particular at Australia South Africa and Rhodesia and argues that it was in this experience that contemporary meanings of racial whiteness first cohered These colonial nations white men s countries as they were popularly known embodied the conviction

that the future of humankind lay in the hands of white men The systems of thought which underwrote the ideas of the white man and of the white man s country worked as a form of ethnic populism which gave life to the concept of Greater Britain But if during the Victorian and Edwardian period the empire was largely narrated in heroic terms in the masculine mode by the time of decolonization in the 1960s racial whiteness had come to signify defeat and desperation not only in the colonies but in the metropole too Identifications with racial whiteness did not disappear in England in the moment of decolonization they came alive again fuelled by memories of what whiteness had once represented recalling the empire as a lost racial utopia

Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph Ds in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today s disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history

Gatekeepers Franca Iacovetta, 2006-10-01 An in depth study of European immigrants to Canada during the Cold War Gatekeepers explores the interactions among these immigrants and the gatekeepers mostly middle class individuals and institutions whose definitions of citizenship significantly shaped the immigrant experience

Iacovetta's deft discussion examines how dominant bourgeois gender and Cold War ideologies of the day shaped attitudes towards new Canadians. She shows how the newcomers themselves were significant actors who influenced Canadian culture and society even as their own behaviour was being modified. Generously illustrated, *Gatekeepers* explores a side of Cold War history that has been left largely untapped. It offers a long overdue Canadian perspective on one of the defining eras of the last century.
