National Schools Of Singing English French German And Italian Techniques Of Singing Revisited:

National Schools of Singing Richard Miller, 2002 In 1977 Scarecrow Press published Richard Miller's study English French German and Italian Techniques of Singing A Study in National Tonal Preferences and How They Relate to Functional Efficiency He compared the historic and then current techniques practiced in the four major Western European schools of vocalism and evaluated technical maneuvers found within each Recent years have placed greater demands on the vocal talents of professional singers with the growth of performance spaces the emergence of the stage director louder orchestral sound and even the infusion of pop culture sounds into traditional music As world culture continues to expand and vocal talent becomes more homogenous the need for continued recognition of lingering national and regional vocal training techniques becomes more important for the singer's quest to develop a certain style This update of Miller's original study incorporates these new concerns with a continued investigation into which techniques within the national schools are common to them all and which idiosyncratic regional tendencies remain

Vocal Virtuosity Sean M. Parr, 2021-04-06 Nothing strikes the ear quite like a soprano singing in the sonic stratosphere Whether thrilling chilling or repellent to the listener the reaction to cascades of coloratura with climaxing high notes is strong Coloratura agile rapid fire singing was originally essential for all singers but its function changed greatly when it became the specialty of particular sopranos over the course of the nineteenth century The central argument of Vocal Virtuosity challenges the historical commonplace that coloratura became an anachronism in nineteenth century opera Instead the book demonstrates that melismas at mid century were made modern Coloratura became an increasingly marked musical gesture during the century with a correspondingly more specific

dramaturgical function In exploring this transformation the book reveals the instigators of this change in vocal practice and examines the historical traces of Parisian singers who were the period's greatest exponents of vertiginous vocality as archetypes of the modern coloratura soprano The book constructs the historical trajectory of coloratura as it became gendered the provenance of the female singer while also considering what melismas can signify in operatic performance As a whole it argues that vocal virtuosity was a source of power for women generating space for female authorship and creativity In so doing the book reclaims a place in history for the coloratura soprano National Schools of Singing Richard Miller, 1997-03-13 A comprehensive update of a 1977 study of historical and current techniques practiced in four major Western European schools of vocalism investigating which techniques within the national schools are common to them all and which idiosyncratic regional tendencies remain Contains chapters on breath management techniques techniques of vowel formation vibrato and national tendencies vocal registration and national attitudes the different types of voices and international tonal ideals Also discusses the North American singer and the national schools Annotation copyrighted by Book News Inc Portland OR *The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education* Helga R. Gudmundsdottir, Carol Beynon, Karen Ludke, Annabel J. Cohen, 2020-05-19 The Routledge Companion to Interdisciplinary Studies in Singing Volume II Education examines the many methods and motivations for vocal pedagogy promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of communication with social psychological and didactic functions Presenting research from myriad fields of study beyond music including psychology education sociology computer science linguistics physiology and neuroscience the contributors address singing in three parts Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009 the Social Sciences and Humanities Research Council of Canada funded a seven year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing AIRS Together global researchers from a broad range of disciplines addressed three challenging questions How does singing develop in every human being How should singing be taught and used to teach How does singing impact wellbeing Across three volumes The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions defining the current state of theory and research in the field Volume II Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer wishes to become a singer works with singers or is interested in the application of singing for the purposes of education Classical and Romantic Music David Milsom, 2017-07-05 This volume brings together twenty two of the most diverse and stimulating journal articles on classical and romantic performing practice representing a rich vein of enquiry into epochs of music still very much at the forefront of current concert repertoire In so doing it provides a wide range of subject based scholarship It also reveals a fascinating window upon the historical performance debate of the last few decades in music where such matters still stimulate controversy **Voicing Girlhood in Popular Music**
