National Security Strategy Of The United States 1991 199:

The Pentagon, Climate Change, and War Neta C. Crawford, 2022-10-04 How the Pentagon became the world's largest single greenhouse gas emitter and why it's not too late to break the link between national security and fossil fuel consumption The military has for years unlike many politicians acknowledged that climate change is real creating conditions so extreme that some military officials fear future climate wars At the same time the U S Department of Defense military forces and DOD agencies is the largest single energy consumer in the United States and the world's largest institutional greenhouse gas emitter In this eye opening book Neta Crawford traces the U S military's growing consumption of energy and calls for a reconceptualization of foreign policy and military doctrine Only such a rethinking she argues will break the link between national security and fossil fuels The Pentagon Climate Change and War shows how the U S economy and military together have created a deep and long term cycle of economic growth fossil fuel use and dependency This cycle has shaped U S military doctrine and over the past fifty years has driven the mission to protect access to Persian Gulf oil Crawford shows that even as the U S military acknowledged and adapted to human caused climate change it resisted reporting its own greenhouse gas emissions Examining the idea of climate change as a threat multiplier in national security she argues that the United States faces more risk from climate change than from lost access to Persian Gulf oil or from most military conflicts The most effective way to cut military emissions Crawford suggests provocatively is to rethink U S grand strategy which would enable the United States to reduce the size and operations of the military Encyclopedia of United States National Security Richard J. Samuels, 2006 Covers the origin development and results of all major national security policies over the last seven decades A thoroughly interdisciplinary work the encyclopedia views national security from a historical economic political and technological perspective **NATO -- the 1990s**, 1993 **US Foreign Policy** Michael Cox, Doug Stokes, 2012-02-09 This textbook provides a comprehensive introduction to US foreign policy Bringing together a number of the world's leading experts the text deals with the rise of America US foreign policy during and after the Cold War and the complex issues facing the US since September 11th **U.S. Foreign Policy Discourse and the Israel Lobby** Keith Peter Kiely, 2017-08-01 This book seeks to debunk the popular myth of an all powerful pro Israel lobby Here Kiely demonstrates how discourses surrounding American Identity and US foreign policy towards the Israeli Palestinian conflict which has deep roots in American historicity have constructed an understanding of the conflict which is inherently more susceptible to the Israeli narrative Kiely argues that the so called power of what other researchers such as Mearsheimer and Walt 2006 2007 call The Israel Lobby are limited by these discourses It is the author's contention that groups such as The American Israel Public Affairs Committee AIPAC serve to amplify and reproduce existing representations within these discourses which align the United States and Israel in terms of cultural historical and political values while simultaneously reinforcing dominant representations of the Palestinian Other **Export Controls** Bert Chapman, 2013-10-30 International trade plays an

enormous role in economic growth and prosperity This activity can also be used to transfer military equipment knowledge and technology to hostile governments and transnational terrorist and criminal organizations seeking to attack and destroy their enemies The U S and other countries have used economic sanctions such as export controls to try to restrict and eliminate the transfer of weapons and financial assets to these governments and organizations This work examines how the U S has attempted to restrict the export of national security sensitive equipment finance knowledge and technology since World War II with varying degrees of success and failure It also examines how multiple U S Government agencies nongovernmental organizations and international government organizations seek to influence U S international trade foreign and security policies while concluding that some export controls are essential for promoting and defending U S national security interests

In Uncertain Times Melvyn P. Leffler, Jeffrey W. Legro, 2011-05-15 In *Uncertain Times* considers how policymakers react to dramatic developments on the world stage Few expected the Berlin Wall to come down in November 1989 no one anticipated the devastating attacks on the World Trade Center and the Pentagon in September 2001 American foreign policy had to adjust quickly to an international arena that was completely transformed Melvyn P Leffler and Jeffrey W Legro have assembled an illustrious roster of officials from the George H W Bush Clinton and George W Bush administrations Robert B Zoellick Paul Wolfowitz Eric S Edelman Walter B Slocombe and Philip Zelikow These policymakers describe how they went about making strategy for a world fraught with possibility and peril They offer provocative reinterpretations of the economic strategy advanced by the George H W Bush administration the bureaucratic clashes over policy toward the breakup of the USSR the creation of the Defense Policy Guidance of 1992 the expansion of NATO the writing of the National Security Strategy Statement of 2002 and the invasion of Iraq in 2003 A group of eminent scholars address these same topics Bruce Cumings John Mueller Mary Elise Sarotte Odd Arne Westad and William C Wohlforth probe the unstated assumptions the cultural values and the psychological makeup of the policymakers They examine whether opportunities were seized and whether threats were magnified and distorted They assess whether academicians and independent experts would have done a better job than the policymakers did Together policymakers and scholars impel us to rethink how our world has changed and how policy can be improved in the future

Peacekeeping in the Abyss Robert M. Cassidy, 2004-04-30 Military organizations are cultures and such cultures have ingrained preferences and predilections for how and when to employ force This is the first study to use a comparative framework to understand what happened with the U S military endeavor in Somalia and the British effort in Bosnia up to 1995 Both regions were potential quagmires and no doctrine for armed humanitarian operations during ongoing conflicts existed at the outset of these efforts After detailing the impact of military culture on operations Cassidy draws conclusions about which military cultural traits and force structures are more suitable and adaptable for peace operations and asymmetric conflicts He also offers some military cultural implications for the U S Army s ongoing transformation The first part of the study offers an in depth assessment of the military cultural preferences

and characteristics of the British and American militaries It shows that Britain's geography its regimental system and a long history of imperial policing have helped embed a small war predilection in British military culture This distinguishes it from American military culture which has exhibited a preference for the big war paradigm since the second half of the 19th century The second part of the book examines how cultural preferences influenced the conduct of operations and the development of the first post Cold War doctrine for peace operations

Cocaine Quagmire Sewall H. Menzel, 2000-03
Written from the perspective of a former active participant in the U S anti drug policy formulation and implementation efforts Cocaine Quagmire is an in depth analysis of why the U S drug war in Colombia is failing While frequent anti drug battles are won dynamic socioeconomic and political factors have created a quagmire of countervailing obstacles leading to strategic foreign policy defeat in the North Andes The Clinton Administration focused on combating narcotrafficking and yet misunderstood how a strong international demand and immense profits provide the basic incentives that keep the Colombian cocaine traffickers in business This book is important in that it fills a significant gap in our knowledge of U S foreign policy and its application in the drug wars of the South American country of Colombia

Cheap Threats Dianne Pfundstein Chamberlain, 2016-04-15 Why do weak states resist threats of force from the United States especially when history shows that this superpower carries out its ultimatums Cheap Threats upends conventional notions of power politics and challenges assumptions about the use of compellent military threats in international politics Drawing on an original dataset of US compellence from 1945 to 2007 and four in depth case studies the Cuban Missile Crisis the 2011 confrontation with Libya and the 1991 and 2003 showdowns with Iraq Dianne Pfundstein Chamberlain finds that US compellent threats often fail because threatening and using force became comparatively cheap for the United States after the Cold War Becoming the world s only superpower and adopting a new light footprint model of war which relied heavily on airpower and now drones have reduced the political economic and human costs that US policymakers face when they go to war Paradoxically this lower cost model of war has cheapened US threats and fails to signal to opponents that the United States is resolved to bear the high costs of a protracted conflict The result small states gamble often unwisely that the United States will move on to a new target before achieving its goals Cheap Threats resets the bar for scholars and planners grappling with questions of state resolve hegemonic stability effective coercion and other issues pertinent in this new era of US warfighting and diplomacy

Oceans Rise Empires Fall Gerard Toal, 2024 A powerful explanation of why geopolitical competition makes implementing effective climate change policies so difficult As the Russia Ukraine war has shown great power competition drives states to prioritize fossil fuel acquisition over working toward a zero carbon future In the last few years it has become abundantly clear that the effects of accelerating climate change will be catastrophic from rising seas to more violent storms to desertification Yet why do nation states find it so difficult to implement transnational policies that can reduce carbon output and slow global warming In *Oceans Rise Empires Fall* Gerard Toal identifies geopolitics as the culprit States would prefer to reduce emissions in the abstract but in the great global competition for geopolitical power states always prioritize access to carbon based fuels necessary for generating the sort of economic growth that helps them compete with rival states Despite what we now know about the long term impacts of climate change geopolitical contests continue to sideline attempts to halt or slow down the process The Ukraine conflict in particular exposes our priorities To escape reliance on Russia s vast oil and gas reserves states have expanded fossil fuel production that necessarily increases the amount of carbon in the atmosphere The territorial control imperatives of great powers preclude collaborative behavior to address common challenges Competitive territorial resource and technological dramas across the geopolitical chessboard currently obscure the deterioration of the planet s life support systems In the contest between geopolitics and sustainable climate policies the former takes precedence especially when competition shifts to outright conflict In this book Toal interrogates that

relationship and its stakes for the ongoing acceleration of climate change **Professional Journal of the United States**
