National Environmental Accounting Bridging The Gap Between Ecology And Economy:

National Environmental Accounting Joy E. Hecht, 2005 Publisher Description [National Environmental Accounting](#)
Joy E Hecht, 2012-05-04 This book presents national environmental or green accounting as it has developed in Europe and other parts of the world. It introduces the most recent methods developed through the United Nations Statistical Department and other international organizations but bridges the gap between the superficial treatment of environmental accounting in economics textbooks and environmental literature on the one hand and the highly technical manuals of international organizations on the other. Joy Hecht begins with a history and introduction to national income accounting. The first part of her book explains how the environmental accounts build on the structure of the 1993 System of National Accounts. She then shows the UN approach to accounting applied to pollution, recycling and the management of natural resources such as forests, minerals and fisheries. The third section discusses how the accounts approach green GDP and other macroeconomic indicators. The book concludes by going beyond the UN structures to discuss other adjusted macroeconomic measures and how accounting data can be used to build them. National Environmental Accounting is a non-technical introduction to an increasingly important field. It is a must-read for anyone interested in how environmental accounts can help society move towards greater sustainability.
