DiMillio, Geraldine C. Prince, United States. Federal Highway Administration, 1993 The Federal Highway Administration's Geotechnical Research Program strives to develop practical cost effective technology for bridge foundations retaining walls and embankments A major focus of this program is the development of a designated system of national geotechnical experimentation sites NGES to improve our ability to find and evaluate new techniques for constructing safer and more economical highways and bridges With this objective in mind FHWA teamed up with the National Science Foundation to establish a system with a national management board and individual site managers This article describes the system to accelerate geotechnical research to solve many serious foundation engineering problems and difficult soil support problems facing the highway community today

Selection and Management of National Geotechnical Experimentation Sites Jean Benoît, Pedro De Alba, National Science Foundation (U.S.), United States. Federal Highway Administration, 1991* *Probabilistic Approaches for Geotechnical Site Characterization and Slope Stability Analysis* Zijun Cao, Yu Wang, Dianqing Li, 2016-08-06 This is the first book to revisit geotechnical site characterization from a probabilistic point of view and provide rational tools

to probabilistically characterize geotechnical properties and underground stratigraphy using limited information obtained from a specific site This book not only provides new probabilistic approaches for geotechnical site characterization and slope stability analysis but also tackles the difficulties in practical implementation of these approaches In addition this book also develops efficient Monte Carlo simulation approaches for slope stability analysis and implements these approaches in a commonly available spreadsheet environment These approaches and the software package are readily available to geotechnical practitioners and alleviate them from reliability computational algorithms The readers will find useful information for a non specialist to determine project specific statistics of geotechnical properties and to perform probabilistic analysis of slope stability **Public Roads** ,1997 *Geotechnical Engineering* Jean-Louis Briaud,2023-08-15
