National Security Affairs B. Thomas Trout, James E. Harf, 1982 **National Security Issues**, 1986 **Rethinking National Security** Frances Scott, 1990 **Networks, Terrorism and Global Insurgency** Robert J. Bunker, 2014-01-14

This new book brings together leading terrorism scholars and defence professionals to discuss the impact of networks on conflict and war. Post modern terrorism and topics of global insurgency are also comprehensively covered. The text is divided into four sections to cover the key areas: introductory overview, theory, terrorism and global insurgency, Al Qaeda focus and networks. Eminent contributors include John Arquilla and David Ronfeldt, Brian Jenkins, Stephen Sloan, Graham Turbiville and Max Manwaring. This book was previously published as a special issue of the leading journal *Low Intensity Conflict and Law Enforcement*.

The Nonproliferation Predicament Joseph F. Pilat, 1985-01-01. The Nonproliferation Predicament is an authoritative and comprehensive look at U.S. nonproliferation policy. Top U.S. scholars, analysts and policymakers focus on the period since the Reagan administration took office and address several questions about the current state of nuclear proliferation. As the international non proliferation regime evolves, will it continue to be responsive to the problem of proliferation? Or will it become superannuated by new technologies or enmeshed in domestic and international political controversies and conflicting interests? What nonproliferation policies are likely to be effective in the 1980s and beyond as nations continue efforts to establish and expand nuclear industrial bases providing them with capabilities useful for the pursuit of weapons options in the future? Does the stagnation of the international nuclear market and the difficulties of nuclear threshold states like India give reasons for hope? Or will the limited proliferation of the past prove to have been a passing anomaly in military history?

Analyzing Strategic Nuclear Policy Charles L. Glaser, 2014-07-14. With sweeping changes in the Soviet Union and East Europe having shaken core assumptions of U.S. defense policy, it is time to reassess basic questions of American nuclear strategy and force requirements. In a comprehensive analysis of these issues, Charles Glaser argues that even before the recent easing of tension with the Soviet Union, the United States should have revised its nuclear strategy, rejecting deterrent threats that require the ability to destroy Soviet nuclear forces and forgoing entirely efforts to limit damage if all out nuclear war occurs. Changes in the Soviet Union suggests Glaser may be best viewed as creating an opportunity to make revisions that are more than twenty years overdue. Glaser's provocative work is organized in three parts. *The Questions* behind the Questions evaluates the basic factual and theoretical disputes that underlie disagreements about U.S. nuclear weapons policy. *Alternative Nuclear Worlds* compares mutual assured destruction, capabilities, MAD, a world in which both superpowers societies are highly vulnerable to nuclear retaliation, to the basic alternatives: mutual perfect defenses, U.S. superiority and nuclear disarmament. Would any basic alternatives be preferable to MAD? Drawing on the earlier sections of the book, *Decisions in MAD* addresses key choices facing American decision makers. Pfaltzgraff,Richard H. Shultz,1992 This collection of essays reflects the proceedings of a 1991 conference on The United States Air Force Aerospace Challenges and Missions in the 1990s sponsored by the USAF and Tufts University The 20 contributors comment on the pivotal role of airpower in the war with Iraq and address issues and choices facing the USAF such as the factors that are reshaping strategies and missions the future role and structure of airpower as an element of US power projection and the aerospace industry s views on what the Air Force of the future will set as its acquisition priorities and strategies The authors agree that aerospace forces will be an essential and formidable tool in US security policies into the next century The contributors include academics high level military leaders government officials journalists and top executives from aerospace and defense contractors *Weapons Under Fire* Lauren Holland,2013-11-26 First Published in 1997 In an effort to find the validity of middle ground this book offers a comprehensive analysis that looks further than the House Committee on National Security s actions on the B 2 bomber President Clinton s campaign promise to support the Seawolf submarine and the Pentagon s use of a concurrent and risky management strategy for the 71 6 billion F 22 fighter aircraft program It provides a dissection of the decision making process for a representative sample of major weapons systems to invalidate the claims that pork and malfeasance are both pervasive and determinate **Ambassador Stephen Krasner's Orienting Principle for Foreign Policy (and Military Management)** Max G. Manwaring,2012 The principle security threat of the past several centuries war between or among major powers is gone Two new types of threats have been introduced into the global
