## **Nationalist Exclusion And Ethnic Conflict Shadows Of Modernity:**

**Nationalist Exclusion and Ethnic Conflict** Andreas Wimmer, 2002-06-06 Andreas Wimmer argues that nationalist and ethnic politics have shaped modern societies to a far greater extent than has been acknowledged by social scientists. The modern state governs in the name of a people defined in ethnic and national terms. Democratic participation, equality before the law, and protection from arbitrary violence were offered only to the ethnic group in a privileged relationship with the emerging nation state. Depending on circumstances, the dynamics of exclusion took on different forms. Where nation building was successful, immigrants and ethnic minorities are excluded from full participation; they risk being targets of xenophobia and racism. In weaker states, political closure proceeded along ethnic rather than national lines and leads to corresponding forms of conflict and violence. In chapters on Mexico, Iraq, and Switzerland, Wimmer provides extended case studies that support and contextualize this argument.

**Waves of War** Andreas Wimmer, 2012-11-22 Why did the nation state emerge and proliferate across the globe? How is this process related to the wars fought in the modern era? Analyzing datasets that cover the entire world over long stretches of time, Andreas Wimmer focuses on changing configurations of power and legitimacy to answer these questions. The nationalist ideal of self-rule gradually diffused over the world and delegitimized empire after empire. Nationalists created nation states wherever the power configuration favored them, often at the end of prolonged wars of secession. The elites of many of these new states were institutionally too weak for nation building and favored their own ethnic communities. Ethnic rebels challenged such exclusionary power structures in violation of the principles of self-rule, and neighboring governments sometimes intervened into these struggles over the state. *Waves of War* demonstrates why nation state formation and ethnic politics are crucial to understand the civil and international wars of the past 200 years.

**Collective Equality** Limor Yehuda, 2023-04-27 In recent decades, international and regional human rights norms have been increasingly applied to constitutional provisions, revealing significant tensions between primary political arrangements such as power sharing, institutions, and human rights norms. This book argues that these tensions, generally framed as a peace versus justice dilemma, are built on an individualistic conception of justice that fails to account for the empirical reality in places characterized by ethnically based political exclusion and inequalities. By introducing the concept of Collective Equality as a new theoretical basis for the law of peace, this timely book proposes a new approach for dealing with the tensions between peace-related arrangements and human rights norms. Through principled, pragmatic, and legal reasoning, the book develops a new paradigm that captures more accurately what equality and human rights mean and require in the context of ethno-national conflicts and provides potent guidance for advancing justice and peace in such places.

**Genocidal Nightmares** Abdelwahab El-Affendi, 2016-07-28 This book offers a novel and productive explanation of why ordinary people can be moved to engage in destructive mass violence or terrorism and the abuse of rights, often in large numbers and in unexpected ways. Its argument is that narratives of insecurity, powerful horror stories people tell and believe

about their world and others can easily make extreme acts appear acceptable even necessary and heroic As in action or horror movies the script dictates how the hero acts The book provides theoretical justifications for this analysis building on earlier studies but going beyond them in what amount to a breakthrough in mapping the context of mass violence It backs its argument with a large number of case studies covering four continents written by prominent scholars from the relevant countries or with deep knowledge of them A substantial introduction by the UN s Special Advisor on the Prevention of Genocide demonstrates the policy relevance of this path breaking work      **Regional Politics and State Secession** Nelson, Elizabeth A.,2021-09-14 While a number of movements seek state secession the majority never achieves internationally recognized statehood Paradoxically some movements that have succeeded have had weaker claims to statehood than many movements that have failed Regional Politics and State Secession seeks to explain the variation in outcomes for secessionist movements Why do some movements succeed when so many fail      Nationalism and Intra-State Conflicts in the Postcolonial World Fonkem Achankeng,2015-09-28 This book highlights the complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles      *What Do We Know about Civil Wars?* T. David Mason,Sara McLaughlin Mitchell,2016-05-05 In this timely book leading scholars guide us through what the latest research tells us about the onset duration outcomes and recurrence of civil wars as well as the ongoing consequences of conflicts in war torn countries such as Syria Sudan and Rwanda      **Alliance Formation in Civil Wars** Fotini Christia,2012-11-12 This book argues power balances rather than shared identities explain why warring Afghan groups aligned with and double crossed each other      **A Companion to Ethnicity in the Ancient Mediterranean** Jeremy McInerney,2014-06-13 A Companion to Ethnicity in the Ancient Mediterranean presents a comprehensive collection of essays contributed by Classical Studies scholars that explore questions relating to ethnicity in the ancient Mediterranean world Covers topics of ethnicity in civilizations ranging from ancient Egypt and Israel to Greece and Rome and into Late Antiquity Features cutting edge research on ethnicity relating to Philistine Etruscan and Phoenician identities Reveals the explicit relationships between

ancient and modern ethnicities Introduces an interpretation of ethnicity as an active component of social identity Represents a fundamental questioning of formally accepted and fixed categories in the field *Amoral Communities* Mila Dragojević, 2019-10-15 In *Amoral Communities* Mila Dragojević examines how conditions conducive to atrocities against civilians are created during wartime in some communities She identifies the exclusion of moderates and the production of borders as the main processes In these places political and ethnic identities become linked and targeted violence against civilians becomes both tolerated and justified by the respective authorities as a necessary sacrifice for a greater political goal Dragojević augments the literature on genocide and civil wars by demonstrating how violence can be used as a political strategy and how communities as well as individuals remember episodes of violence against civilians The communities on which she focuses are Croatia in the 1990s and Uganda and Guatemala in the 1980s In each case Dragojević considers how people who have lived peacefully as neighbors for many years are suddenly transformed into enemies yet intracommunal violence is not ubiquitous throughout the conflict zone rather it is specific to particular regions or villages within those zones Reporting on the varying wartime experiences of individuals she adds depth emotion and objectivity to the historical and socioeconomic conditions that shaped each conflict Furthermore as *Amoral Communities* describes the exclusion of moderates and the production of borders limit individuals freedom to express their views work to prevent the possible defection of members of an in group and facilitate identification of individuals who are purportedly a threat Even before mass killings begin Dragojević finds these and similar changes will have transformed particular villages or regions into amoral communities places where the definition of crime changes and violence is justified as a form of self defense by perpetrators

and diagrams the text is both engaging and highly informative Nationalism Ethnicity and the State Making and Breaking Nations will prove an insightful read for both undergraduate and postgraduate students and researchers in the area of Politics and International Relations *Riots, Coups and Civil War: Revisting the Greed and Grievance Debate* , **The Making of Modern Turkey** Ugur Ümit Üngör,2012-03-01 The eastern provinces of the Ottoman Empire used to be a multi ethnic region where Armenians Kurds Syriacs Turks and Arabs lived together in the same villages and cities The disintegration of the Ottoman Empire and rise of the nation state violently altered this situation Nationalist elites intervened in heterogeneous populations they identified as objects of knowledge management and change These often violent processes of state formation destroyed historical regions and emptied multicultural cities clearing the way for modern nation states The Making of Modern Turkey highlights how the Young Turk regime from 1913 to 1950 subjected Eastern Turkey to various forms of nationalist population policies aimed at ethnically homogenizing the region and incorporating it in the Turkish nation state It examines how the regime utilized technologies of social engineering such as physical destruction deportation spatial planning forced assimilation and memory politics to increase ethnic and cultural homogeneity within the nation state Drawing on secret files and unexamined records Ugur mit ng r demonstrates that concerns of state security ethnocultural identity and national purity were behind these policies The eastern provinces the heartland of Armenian and Kurdish life became an epicenter of Young Turk population policies and the theatre of unprecedented levels of mass violence

*Religious Politics in Turkey* Ceren Lord,2018-11-08 Presents an account of the rise of Erdogan s AKP showing how the politicisation of religion has roots in the period of early nation building in Turkey Cultures and Globalization Helmut K Anheier,Yudhishtir Raj Isar,2007-03-27 In the age of globalization we are no longer home alone Migration brings other worlds into our own just as the global reach of the media transmits our world into the hearts and minds of others Often incommensurate values are crammed together in the same public square Increasingly we all today live in the kind of edge cultures we used to see only on the frontiers of civilizations in places like Hong Kong or Istanbul The resulting frictions and fusions are shaping the soul of the coming world order I can think of no other project with the ambitious scope of defining this emergent reality than The Cultures and Globalization project I can think of no more capable minds than Raj Isar and Helmut Anheier who can pull it off Nathan Gardels Editor in Chief NPQ Global Services Los Angeles Times Syndicate Tribune Media This series represents an innovative approach to the central issues of globalization that phenomenon of such undefined contours Lupwishi Mbuyumba Director of the Observatory of Cultural Policies in Africa The world s cultures and their forms of creation presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood The Cultures and Globalization Series is designed to fill this void in our knowledge Analyzing the relationship between globalization and cultures is the aim of the Series In each volume leading experts as well as young scholars will track cultural trends connected to globalization throughout the world covering issues ranging from the role of

cultural difference in politics and governance to the evolution of the cultural economy and the changing patterns of creativity and artistic expression Each volume will also include an innovative presentation of newly developed indicator suites on cultures and globalization that will be presented in a user friendly form with a high graphics content to facilitate accessibility and understanding Like so many phenomena linked to globalization conflicts over and within the cultural realms crystallize great anxieties and illusions through misplaced assumptions inadequate concepts unwarranted simplifications and instrumental readings The aim here is to marshal evidence from different disciplines and perspectives about the culture conflict and globalization relationships in conceptually sensitive ways

*Inequality, Grievances, and Civil War* Lars-Erik Cederman, Kristian Skrede Gleditsch, Halvard Buhaug, 2013-08-26 This book argues that political and economic inequalities following group lines generate grievances that in turn can motivate civil war Lars Erik Cederman Kristian Skrede Gleditsch and Halvard Buhaug offer a theoretical approach that highlights ethnonationalism and how the relationship between group identities and inequalities are fundamental for successful mobilization to resort to violence Although previous research highlighted grievances as a key motivation for political violence contemporary research on civil war has largely dismissed grievances as irrelevant emphasizing instead the role of opportunities This book shows that the alleged non results for grievances in previous research stemmed primarily from atheoretical measures typically based on individual data The authors develop new indicators of political and economic exclusion at the group level and show that these exert strong effects on the risk of civil war They provide new analyses of the effects of transnational ethnic links and the duration of civil wars and extended case discussions illustrating causal mechanisms

Strategic Implications of Intercommunal Warfare in Iraq W. Andrew Terrill, 2005

**The Israeli-Palestinian Conflict** Karl Cordell, Brendan O'Leary, Stefan Wolff, 2018-10-11 The conflict between Israel and the Palestinians is one of the longest unresolved conflicts of modern times It has brought about the early and violent deaths of tens of thousands of people and blighted the lives of millions more It is symbiotically linked to the wider crises that continue to engulf the wider region The purpose of this volume is to elucidate both the nature of the conflict but perhaps more importantly to make some tentative proposals with regard to how the conflict may eventually be peacefully concluded The contributors offer their prognosis in light of the fact that both Israeli and Palestinian society is becoming increasingly polarised and prey to fanatics who argue that the conflict will and should be solved by the complete destruction of one side by the other In short this volume seeks to provide rational counter arguments to fundamentalist bile that questions the fundamental humanity of the opposing side This book was originally published as a special issue of the journal *Ethnopolitics*

**The Politics of Nation-Building** Harris Mylonas, 2013-02-18 What drives a state's choice to assimilate accommodate or exclude ethnic groups within its territory In this innovative work on the international politics of nation building Harris Mylonas argues that a state's nation building policies toward non core groups individuals perceived as an ethnic group by the ruling elite of a state are influenced by both its foreign policy goals and its relations with the external

patrons of these groups Through a detailed study of the Balkans Mylonas shows that how a state treats a non core group within its own borders is determined largely by whether the state s foreign policy is revisionist or cleaves to the international status quo and whether it is allied or in rivalry with that group s external patrons Mylonas injects international politics into the study of nation building building a bridge between international relations and the comparative politics of ethnicity and nationalism
