## **Native Plants Of Southern Nevada An Ethnobotany:**

Native Plants of Southern Nevada David Rhode, 2002 A field guide to the traditional plant knowledge of the Paiute and Shoshone people living in the southern Great Basin and northern Mojave Desert region Sections cover trees large shrubs and woody vines small shrubs and subshrubs yuccas and agaves cacti herbaceous plants grasses and grass like plants and bulbs Each entry includes a morphological description habitat and uses for food medicine textiles and construction Most but not all plants are photographed in color Annotation copyrighted by Book News Inc Portland OR Woody Plants of Utah Renee Van

Buren, Janet G. Cooper, Leila M. Shultz, Kimball T. Harper, 2012-01-06 A comprehensive guide that includes a vast range of species and plant communities and employs thorough original keys Based primarily on vegetative characteristics the keys don't require that flowers or other reproductive features be present like many plant guides And this guide's attention to woody plants as a whole allows one to identify a much greater variety of plants That especially suits an arid region such as Utah with less diverse native trees Woody plants are those that have stems that persist above ground even through seasons that don't favor growth due to low precipitation or temperatures Woody Plants of Utah employs dichotomous identification keys that are comparable to a game of twenty questions They work through a process of elimination by choosing sequential alternatives Detailed illustrated plant descriptions complement the keys and provide additional botanical and environmental information in relation to a useful introductory categorization of Utah plant communities Supplementary tools include photos distribution maps and an illustrated glossary **Afoot and Afield: Las Vegas and Southern Nevada** Brian

Beffort, 2010-10-01 Beyond the bright lights of one of the city's fastest growing metropolitan areas is some of the most rugged beautiful and remote country around Popular destinations such as Red Rock Canyon Valley of Fire Death Valley and Mt Charles are covered plus lesser known areas such as Anniversary Narrows Arrow Canyon Bowl of Fire and the Wee Thump Joshua Tree Wilderness Each trip showcases the diversity of this region from the geological wonders and rare life forms surviving in Mojave National Preserve to ancient petroglyphs The hikes range from easy strolls to challenging treks and include distance time elevation change difficulty and trail use notes A custom map accompanies every description and GPS waypoints are given for key locations **SP035: A Geologic and Natural History Tour Through Nevada and**

**Households on the Mimbres Horizon** Barbara J. Roth, 2023-03-28 Pithouse sites represent the basic form of occupation in the Mimbres Mogollon region of southwestern New Mexico from AD 200 to the late 900s This study presents the results of excavations of one such site called La Gila Encantada Little is known about the variability present at pithouse sites away from the major Mimbres and Gila River Valleys Nonriverine occupations have been understudied until now This book describes subsistence and settlement practices and compares the results with recent research conducted at the larger

villages in the Mimbres River Valley Despite basic similarities in material culture households at La Gila Encantada appear to have followed different trajectories than those along the rivers Examining these differences archaeologist Barbara J Roth provides insights into some of the reasons why they existed and shows that the variability present in pithouse occupations over the years was tied to multiple factors including environmental differences economic practices and the social composition of groups occupying the sites With chapters assessing ceramic data chipped and groundstone analysis shell and mineral jewelry and regional context this look at the past offers relevant insights into current issues in Southwest archaeology including identity interaction and household organization

### **Interaction and Connectivity in the Greater Southwest**

Karen Harry, Barbara J. Roth, 2019-03-21 This volume of proceedings from the fourteenth biennial Southwest Symposium explores different kinds of social interaction that occurred prehistorically across the Southwest The authors use diverse and innovative approaches and a variety of different data sets to examine the economic social and ideological implications of the different forms of interaction presenting new ways to examine how social interaction and connectivity influenced cultural developments in the Southwest The book observes social interactions role in the diffusion of ideas and material culture the way different social units especially households interacted within and between communities and the importance of interaction and interconnectivity in understanding the archaeology of the Southwest's northern periphery Chapters demonstrate a movement away from strictly economic driven models of social connectivity and interaction and illustrate that members of social groups lived in dynamic situations that did not always have clear cut and unwavering boundaries Social connectivity and interaction were often fluid changing over time Interaction and Connectivity in the Greater Southwest is an impressive collection of established and up and coming Southwestern archaeologists collaborating to strengthen the theoretical underpinnings of the discipline It will be of interest to professional and academic archaeologists as well as researchers with interests in diffusion identity cultural transmission borders large scale interaction or social organization Contributors Richard V N Ahlstrom James R Allison Jean H Ballagh Catherine M Cameron Richard Ciolek Torello John G Douglass Suzanne L Eckert Hayward H Franklin Patricia A Gilman Dennis A Gilpin William M Graves Kelley A Hays Gilpin Lindsay D Johansson Eric Eugene Klucas Phillip O Leckman Myles R Miller Barbara J Mills Matthew A Peebles David A Phillips Jr Katie Richards Heidi Roberts Thomas R Rocek Tammy Stone Richard K Talbot Marc Thompson David T Unruh John A Ware Kristina C Wyckoff

### **Native American**

**Food Plants** Daniel E. Moerman, 2010-10-27 Based on 25 years of research that combed every historical and anthropological record of Native American ways this unprecedented culinary dictionary documents the food uses of 1500 plants by 220 Native American tribes from early times to the present Like anthropologist Daniel E Moerman's previous volume Native

American Medicinal Plants this extensive compilation draws on the same research as his monumental Native American Ethnobotany this time culling 32 categories of food uses from an extraordinary range of species Hundreds of plants both native and introduced are described The usage categories include beverages breads fruits spices desserts snacks dried foods and condiments as well as curdling agents dietary aids preservatives and even foods specifically for emergencies Each example of tribal use includes a brief description of how the food was prepared In addition multiple indexes are arranged by tribe type of food and common names to make it easy to pursue specific research An essential reference for anthropologists ethnobotanists and food scientists this will also make fascinating reading for anyone interested in the history of wild and cultivated local foods and the remarkable practical botanical knowledge of Native American forbears

**Medicinal Plants of Native America, Vols. 1 and 2** Daniel E. Moerman, 1987-01-01 In this encyclopedia of North American ethnobotany thousands of native plants are organized by family genus use illness tribal culture and common name Foreword by Richard I Ford *Journal of California and Great Basin Anthropology* ,2005 *Baboquivari Mountain Plants* Daniel F. Austin, 2022-05-03 The Baboquivari Mountains long considered to be a sacred space by the Tohono O odham people who are native to the area are the westernmost of the so called Sky Islands The mountains form the border between the floristic regions of Chihuahua and Sonora This encyclopedic work describes the flora of this unique area in detail It includes descriptions identifications ecology and extensive etymologies of plant names in European and indigenous languages Daniel Austin also describes pollination biology and seed dispersal and explains how plants in the area have been used by humans beginning with Native Americans The term sky island was first used by Weldon Heald in 1967 to describe mountain ranges that are separated from each other by valleys of grassland or desert The valleys create barriers to the spread of plant species in a way that is similar to the separation of islands in an ocean The 70 000 square mile Sky Islands region of southeastern Arizona southwestern New Mexico and northwestern Mexico is of particular interest to botanists because of its striking diversity of plant species and habitats With more than 3 000 species of plants the region offers a surprising range of tropical and temperate zones Although others have written about the region this is the first book to focus exclusively on the plant life of the Baboquivari Mountains The book offers an introduction to the history of the region along with a discussion of human influences and includes a useful appendix that lists all of the plants known to be growing in the Baboquivari Mountain chain
