Dabrowski, Zdzislaw E. Sikorski, 2004-11-15 While systems such as GMP and HACCP assure a high standard of food quality foodborne poisonings still pose a serious hazard to the consumer s health The lack of knowledge among some producers and consumers regarding the risks and benefits related to food makes it imperative to provide updated information in order to improve food safety To **Toxins and Other Harmful Compounds in Foods** A. Witczak, Zdzislaw Sikorski, 2017-01-12 Presents information based on scientific evidence on the contents of harmful compounds in food raw materials and products such as grains fruits and vegetables mushrooms seafood milk and dairy products meats and various processed foods Shows the effects of environmental pollution and the conditions of harvesting and storage of the raw materials on food contamination Discusses the real food safety hazards to the consumers caused by toxins of microbial origin and chemical contamination Describes the beneficial role of processing to decrease the contents of harmful components in food products Presents the role of legislation quality assurance systems and available analytical techniques in assuring food safety Public Health Response to Biological and Chemical Weapons World Health Organization, 2004-01-21 This is the second edition of this publication which focuses on the public health aspects of the possible deliberate use of biological or chemical agents Issues discussed include the key principles for public health planning risk assessment hazard identification and evaluation risk management strategies and response planning as part of existing national emergency plans disease surveillance and early warning systems the national and international legal framework and international sources of assistance Technical annexes cover a range of issues including chemical agents toxins biological agents principles of protection precautions against the sabotage of drinking water food and other products information resources and the affiliation of WHO Member States to the international treaties on biological and chemical weapons *Safety evaluation of certain food additives and contaminants* , 2020-07-15 Analysis of Food Toxins and Toxicants Yiu-Chung Wong, Richard J. Lewis, Sr., 2017-07-03 Analysis of Food Toxins and Toxicants consists of five sections providing up to date descriptions of the analytical approaches used to detect a range of food toxins Part I reviews the recent developments in analytical technology including sample pre treatment and food additives Part II covers the novel analysis of microbial and plant toxins including plant pyrrolizidine alkaloids Part III focuses on marine toxins in fish and shellfish Part IV discusses biogenic amines and common food toxicants such as pesticides and heavy metals Part V summarizes quality assurance and the recent developments in regulatory limits for toxins toxicants and allergens including discussions on laboratory accreditation and reference materials *Chemical Warfare Agents* Timothy T.
