Natural Connections:

Natural Connections David Western, Michael Wright, 2013-03-19 Both realism and justice demand that efforts to conserve biological diversity address human needs as well. The most promising hope of accomplishing such a goal lies in locally based conservation efforts: an approach that seeks ways to make local communities the beneficiaries and custodians of conservation efforts. *Natural Connections* focuses on rural societies and the conservation of biodiversity in rural areas. It represents the first systematic analysis of locally based efforts and includes a comprehensive examination of cases from around the world where the community based approach is used. The book provides an overview of community based conservation in the context of the debate over sustainable development, poverty and environmental decline; case studies from the developed and developing worlds: Indonesia, Peru, Australia, Zimbabwe, Costa Rica, the United Kingdom; that present detailed examples of the locally based approach to conservation; a review of the principal issues arising from community based programs; an agenda for future action.

Natural Connections 2 Emily M. Stone, 2019-03-15 Do you also love finding adventure and intrigue in strange places? Emily Stone's second book transports you across the moat into a magical world where nature is better than fiction. Elfin skimmer dragonflies dart above the incredible community cupped inside a single leaf. A leaf miner grows up before your eyes. Lichens surrender in order to survive. By using science to tell stories, Emily wields a magic that makes the whole world feel more alive.

Stepping Up To Science and Math: Exploring the Natural Connections National Science Teachers Association, 2009-07-06

Parabolic Geometries I Andreas Čap, Jan Slovák, 2024-07-29 Parabolic geometries encompass a very diverse class of geometric structures including such important examples as conformal projective and almost quaternionic structures, hypersurface type CR structures and various types of generic distributions. The characteristic feature of parabolic geometries is an equivalent description by a Cartan geometry modeled on a generalized flag manifold: the quotient of a semisimple Lie group by a parabolic subgroup. Background on differential geometry with a view towards Cartan connections and on semisimple Lie algebras and their representations which play a crucial role in the theory is collected in two introductory chapters. The main part discusses the equivalence between Cartan connections and underlying structures including a complete proof of Kostant's version of the Bott-Borel-Weil theorem which is used as an important tool. For many examples the complete description of the geometry and its basic invariants is worked out in detail. The constructions of correspondence spaces and twistor spaces and analogs of the Fefferman construction are presented both in general and in several examples. The last chapter studies Weyl structures which provide classes of distinguished connections as well as an equivalent description of the Cartan connection in terms of data associated to the underlying geometry. Several applications are discussed throughout the text.

Emerging Approaches in Design and New Connections With Nature Özdamar, Esen Gökçe, Tandoğan, Okşan, 2021-12-03 In today's changing and transforming socio-economic, political, cultural and technological paradigms we encounter many methodologies, approaches, proposals and

practices in reconsidering the disappearing or emerging relations in the human nonhuman environment nature interaction These approaches proposals and practices range from new methods of urban gardening to biophilic design and augmented immersive environments However these human centric approaches which only aim to meet their needs or emerge as technology oriented replicas and representations of nature lead to a departure from a holistic approach to the natural and artificial environment Therefore how can new and emerging approaches or methodologies draw a holistic framework for environmental health sustainability wellness and co existence between environments for all living beings Emerging Approaches in Design and New Connections With Nature covers a variety of topics related to the intersection between nature environment and ways of living and provides a comprehensive guide to biophilic design and the idea of design and nature including benefits theories and effects Covering topics such as biophilic design and sustainability soundscapes and landscapes and urban environments and design it is ideal for architects designers urban planners landscape designers policymakers engineers interior designers practitioners students academicians and researchers

Contemporary Debates in Moral Theory James Dreier, 2009-02-04 Contemporary Debates in Moral Theory features pairs of newly commissioned essays by some of the leading theorists working in the field today Brings together fresh debates on the most controversial issues in moral theory Questions include Are moral requirements derived from reason How demanding is morality Are virtues the proper starting point for moral theorizing Lively debate format sharply defines the issues and paves the way for further discussion Will serve as an accessible introduction to the major topics in contemporary moral theory while also capturing the imagination of professional philosophers

Sacred Natural Sites Bas Verschuuren, Robert Wild, Jeffrey McNeely, Gonzalo Oviedo, 2012-06-25 Sacred Natural Sites are the world s oldest protected places This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats India Sagarmatha Chomolongma Mt Everest Nepal Tibet and China the Golden Mountains of Altai Russia Holy Island of Lindisfarne UK and the sacred lakes of the Niger Delta Nigeria The book illustrates that sacred natural sites although often under threat exist within and outside formally recognised protected areas heritage sites Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes They also form important nodes for maintaining a dynamic socio cultural fabric in the face of global change The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio economic interests of the custodian communities and other relevant stakeholders

Trends In Differential Geometry, Complex Analysis And Mathematical Physics - Proceedings Of 9th International Workshop On Complex Structures, Integrability And Vector Fields Stancho Dimiev, Vladimir S Gerdjikov, Kouei Sekigawa, 2009-08-21 This book contains the contributions by the participants in the nine of a series of workshops Throughout the series of workshops the contributors are consistently aiming at higher achievements of studies of the current topics in complex analysis differential geometry and mathematical physics

and further in any intermediate areas with expectation of discovery of new research directions Concerning the present one it is worthwhile to mention that in addition to the new developments of the traditional trends many attractive and pioneering works were presented and their results were contributed to the present volume The contents of this volume therefore will provide not only significant and useful information for researchers in complex analysis differential geometry and mathematical physics including their related areas but also interesting mathematics for non specialists and a broad audience The present volume contains new developments and trends in the studies on constructions of holomorphic Cliffordian functions the swelling constructions of minimal surfaces with higher genus in flat tori the spectral properties of soliton equations on symmetric spaces new types of shallow water waves described by Camassa Holm type equations the properties of pseudo hermitian boson and fermion coherent states fractals and chaos on orthorhombic lattices and even an ambitious proposal of a graph model for Kaehler manifolds with Kaehler magnetic fields

Children Learning Outside the Classroom Sue Waite, 2017-02-13 The new edition of this bestselling textbook continues to help students and professionals understand the importance of getting children learning outside the traditional classroom and is packed full of creative information and ideas for teachers and practitioners to incorporate outdoor activities throughout the school curriculum Significantly revised and updated the second edition now includes 7 brand new chapters on Methods of assessment and evaluation Global perspectives on outdoor learning Developing whole school approaches to indoor and outdoor teaching Technology and its role outside the classroom Special Education Needs and Disabilities SEND and learning outdoors Forest School The environmental sector and outdoor learning Whether you re training to become a teacher or already working in the classroom this book demonstrates how the outdoor environment is enriching learning opportunities for children and deepening their connections with the natural world NOW FEATURING Online resources that include free SAGE journal articles weblinks annotated further readings and video to help translate theory into real life practice Sue Waite will be discussing key ideas from Children Learning Outside the Classroom From Birth to Eleven in the SAGE Early Years Masterclass a free professional development experience hosted by Kathy Brodie To sign up or for more information

Inspiring Primary Curriculum Design James Biddulph, Julia Flutter, 2020-06-10 This new book from the only university run primary school in the UK helps schools design their own curricula by providing access to the latest education research along with supporting ideas and questions for how this can be applied successfully Co written by practising teachers and research academics it combines practitioner expertise with the latest world class academic research Each chapter includes examples of how schools approached designing their own curricula and shows how an evidence informed approach can lead to new ideas that are bold innovative and imaginative Packed with innovative ideas and practical suggestions this book highlights the importance of using research evidence to develop teachers practice in the realities of their own classrooms and schools It is a key read for teachers school leaders teaching assistants and student teachers especially those who recognise the

important role of research in developing excellence in their practice *Language, Culture and Cognition from Descartes to Lewes* Timo Kaitaro,2022-02-28 This volume describes how the significance of language and culture in forming human cognition has been understood from the mid sixteenth century to the mid nineteenth century It discusses thinkers who realized that the human mind and brain is in fact a cultural artefact and that language is not merely a means to communicate thoughts but also to form them in the first place It presents a novel perspective on the history of philosophy in which the narrative is no longer centered on the question of whether knowledge results from experience or reason but whether experience and reason are in fact possible without language *Philosophy And Philosophers* John Shand,2002-09-10 First published in 1994 Routledge is an imprint of Taylor Francis an informa company *A History of the Modern Fact* Mary Poovey,2009-11-30 How did the fact become modernity s most favored unit of knowledge How did description come to seem separable from theory in the precursors of economics and the social sciences Mary Poovey explores these questions in *A History of the Modern Fact* ranging across an astonishing array of texts and ideas from the publication of the first British manual on double entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s She shows how the production of systematic knowledge from descriptions of observed particulars influenced government how numerical representation became the privileged vehicle for generating useful facts and how belief whether figured as credit credibility or credulity remained essential to the production of knowledge Illuminating the epistemological conditions that have made modern social and economic knowledge possible *A History of the Modern Fact* provides important contributions to the history of political thought economics science and philosophy as well as to literary and cultural criticism *The SAGE Handbook of Outdoor Play and Learning* Tim Waller,Eva Årlemalm-Hagsér,Ellen Beate Hansen Sandseter,Libby Lee-Hammond,Kristi Lekies,Shirley Wyver,2017-06-19 There has been a growing academic interest in the role of outdoor spaces for play in a child s development This text represents a coordinated and comprehensive volume of international research on this subject edited by members of the well established European Early Childhood Education Research Association Outdoor Play and Learning SIG OPAL Chapters written by authors from Europe North and South America Australasia and Asia Pacific countries are organised into six sections Theoretical Frameworks and Conceptual Approaches for Understanding Outdoor Play Learning Critical Reflections on Policy and Regulation in Outdoor Play Learning Children s Engagement with Nature Sustainability and Children s Geographies Diverse Contexts and Inclusion in Children s Outdoor Play Environments Methodologies for Researching Outdoor Play and Learning Links Between Research and Practice

Nature Unbound Dan Brockington, Rosaleen Duffy, Jim Igoe, 2012-07-26 This groundbreaking volume is the first comprehensive critical examination of the rise of protected areas and their current social and economic position in our world It examines the social impacts of protected areas the conflicts that surround them the alternatives to them and the conceptual categories they impose The book explores key debates on devolution participation and democracy the role and uniqueness of indigenous peoples and other local communities institutions and resource management hegemony myth and symbolic power in conservation success stories tourism poverty and conservation and the transformation of social and material relations which community conservation entails For conservation practitioners and protected area professionals not accustomed to criticisms of their work or students new to this complex field the book will provide an understanding of the history and current state of affairs in the rise of protected areas It introduces the concepts theories and writers on which critiques of conservation have been built and provides the means by which practitioners can understand problems with which they are wrestling For advanced researchers the book will present a critique of the current debates on protected areas and provide a host of jumping off points for an array of research avenues

Spiritual Wellness and the Built Environment Phillip James Tabb, 2025-08-29 Imagine a world where buildings and cities actively nurture our well being not just physically but spiritually There is a growing awareness of the need for a more inclusive and comprehensive approach to wellness strategies in everyday life This book explores spiritual wellness as a foundational attribute of urban planning and design with the hope of influencing a more flourishing trajectory of development with the built environment Chapters reflect the beginning of this evolving movement in home and community design that tackles our uniquely modern problems of sedentary lives unhealthy diets stress social isolation pollution nature deprivation and inaccessibility to spiritually nurturing places The attributes of spiritual wellness are presented as defining characteristics informing design strategies These specific planning and design strategies are presented through case studies from around the globe that highlight the importance of spiritual wellness considerations at all scales of the built environment from rooms to cities This book is essential to help architects planners designers engineers healthcare providers project stakeholders and graduate students embrace and implement a successful wellness design approach

Children in Sustainable and Responsible Tourism Hugues Seraphin, 2022-03-07 Children in Sustainable and Responsible Tourism fills an absence of research in the sustainable and responsible tourism field involving children as stakeholders arguing that children s empowerment should be core to responsible tourism initiatives and that their involvement should be a requirement in sustainable development

A Realist Theory of Science Roy

Bhaskar, 2008-01-17 A Realist Theory of Science is one of the few books that have changed our understanding of the philosophy of science. In this analysis of the natural sciences with a particular focus on the experimental process itself, Roy Bhaskar provides a definitive critique of the traditional positivist conception of science and stakes out an alternative realist position. Since its original publication in 1975, a movement known as Critical Realism, which is both intellectually diverse and international in scope, has developed on the basis of key concepts outlined in the text. The book has been hailed in many quarters as a Copernican Revolution in the study of the nature of science, and the implications of its account have been far reaching for many fields of the humanities and social sciences. **Debunking Moral Generalism** Dominikus
