Our Historic Desert:

Our historic desert Diana Lindsay,1973 Full history of the region from prehistory to present day paved roads and resort areas **Our historic desert** Diana Elaine Lindsay,1973 *Our Historic Desert* Diana Lindsay,1974 **Curiosities of**

the California Desert: Historic, Offbeat & Forgotten Attractions Claudia Heller,2015-10-05 One might not expect to find much in the middle of California's hot dry deserts. But to the curious explorer they're scattered with strange and extraordinary sights. On old Route 66 the desert traveler can find quirky roadside art and mementos left by motorists. In the El Paso Mountains of the Mojave the daring adventurer can crawl through a tunnel that was hand-dug by an old prospector named Burro Schmidt. In Landers the weary wanderer can enjoy a rejuvenating sound bath in an acoustically perfect dome supposedly designed by aliens. From astounding natural wonders to remnants of ancient civilizations and the Wild West discover treasures of history, puzzling mystery and uncommon eccentricity alongside seasoned road trippers. Alan and Claudia Heller Marshal South and the Ghost Mountain Chronicles Marshal South,2005 In the 1940s Marshal South chronicled his family's controversial primitive lifestyle on Ghost Mountain in what is now Anza-Borrego Desert State Park in southern California through popular monthly articles written for *Desert Magazine*. This is the complete collection along with never before published photos of the family Gateways to the Southwest Jay M. Price,2016-05-26 Arizona is home to some of the region's most stunning national parks and monuments and has had a long tradition of strong federal agencies along with effective local governments developing and managing parklands. Before World War II protecting sites from development seemed counterproductive to a state government dominated by extractive industries. By the late 1950s this state that prided itself on being a tourist destination found its lack of state parks to be an embarrassment. *Gateways to the Southwest* is a history of the creation of state parks in Arizona examining the ways in which different types of parks were created in the face of changing social values. Jay Price tells how Arizona's parks emerged from the recreation and tourism boom of the 1950s and 1960s, were shaped by the environmental movement of the 1970s and 1980s and have been affected by the financial challenges that arose in the 1990s. He also explains how changing political realities led to different methods of creating parks like Catalina, Homolovi Ruins and Kartchner Caverns. In addition, places that did not become state parks have as much to tell us as those that did. By the time the need for state parks was recognized in Arizona, most choice sites had already been developed and Price reveals how acquiring land often proved difficult and expensive. State parks were of necessity developed in cooperation with the federal government, other state agencies, community leaders and private organizations. As a result, parks born from land exchanges, partnerships, conservation easements and other cooperative ventures are more complicated entities than the state park designation might suggest. Price's study shows that the key issue for parks has not been who owns a place but who manages it, and today Arizona's state parks are a network of lake-based recreation, historic sites and environmental education areas reflecting issues just as complex as those of the region's better known national parks.

Gateways to the Southwest is a case study of resource stewardship in the Intermountain West that offers new insights into environmental history as it illustrates the challenges and opportunities facing public lands all over America **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976 Sundesert Nuclear Power Plant Units 1-2, Construction ,1978 **Encyclopedia of Ecology** Brian D. Fath,2018-08-23 Encyclopedia of Ecology Second Edition Four Volume Set continues the acclaimed work of the previous edition published in 2008 It covers all scales of biological organization from organisms to populations to communities and ecosystems Laboratory field simulation modelling and theoretical approaches are presented to show how living systems sustain structure and function in space and time New areas of focus include micro and macro scales molecular and genetic ecology and global ecology e g climate change earth transformations ecosystem services and the food water energy nexus are included In addition new international experts in ecology contribute on a variety of topics Offers the most broad ranging and comprehensive resource available in the field of ecology Provides foundational content and suggests further reading Incorporates the expertise of over 500 outstanding investigators in the field of ecology including top young scientists with both research and teaching experience Includes multimedia resources such as an Interactive Map Viewer and links to a CSDMS Community Surface Dynamics Modeling System an open source platform for modelers to share and link models dealing with earth system processes **Department of the Interior and Related Agencies Appropriations for Fiscal Year 1991** United States.
