Practical Image Processing In C Acquisition Manipulation Storage:

Practical Image Processing in C Craig A. Lindley, 1991-01-16 In light of the revolution in imaging technology this book brings image acquisition and processing capabilities within the reach of the individual It presents the hardware design and fabrication of what may be the world s lowest cost video digitizer input device for the PC allowing still video images to be imported into a PC from a low cost television camera for display or manipulation The book then shows how to display images on PCs and discusses the software required to make a digitizer produce images Useful example programs illustrate the concepts presented Because digitized images must be put into a form to be manipulated by other application programs in order to be useful the book covers PCX and TIFF graphic file formats and provides C code for reading and writing each format Employing a practical rather than rigorous mathematical approach the book also discusses classical image processing Each major class of algorithm is illustrated with example C codes and images that show the effect of the algorithm

Practical Image Processing in C Craig A. Lindley, 1991-01-16 The video digitizer project Classical image processing Additional information Graphics programming with GDI+ and DirectX Alex Polyakov, Vitaly Brusentsev, 2005 Providing a look ahead at some of the most promising innovations in graphics technologies this guide covers the GDI graphical library the NET Framework platform C and the DirectX library Theoretical aspects of graphics algorithms for solving common problems and examples of their practical implementation are covered The support of popular graphic file formats such as BMP GIF TIFF JPEG EXI PNG ICO WMF and EMF as well as bitmap redrawing with the application of the external alpha channel are discussed Resizing stretching distorting and rotating bitmaps are addressed in detail as is gradient filling

Thierauf,1992-05-20 A common complaint heard in today's business office is There is paper everywhere but I cannot find the document that I'm looking for It is estimated that 90 percent of all data and information currently being processed and distributed within offices and between organizations resides on paper Finding the physical space to store this paper can be a key problem To overcome this problem and others there is a need for a dramatic new approach to information processing found in business Such an approach is found in this unique and useful volume Essentially image processing systems in business use today's computer technology to solve paper processing and storage problems Their main means of processing is performed electronically that is documents are captured initially on an electronic medium and forwarded to other users in the same mode In this manner their essential means of communicating with users is in an electronic format versus a paper one Also image processing systems in business are much more flexible in meeting changing user needs especially when the data is stored on optical disk Computer Language ,1992 **UNIX Review** ,1991 *Second IEEE International Conference on Fuzzy Systems* ,1993 **Subject Guide to Books in Print** ,1996 *Dr. Dobb's Journal of Software Tools for the Professional Programmer* ,2001 **New Technical Books** New York Public Library,1992
