

PRACTICAL GUIDE TO THE CARE OF THE CRITICALLY ILL PATIENT

Joseph Varon

Practical Guide To The Care Of The Critically Ill Parent

Dennis Klass

Practical Guide To The Care Of The Critically Ill Parent:

The Spiritual Lives of Bereaved Parents Dennis Klass, 2013-11-12 This book describes how parents lose and find or relocate spiritual anchors after the death of their child. It describes how ordinary people reconstruct their lives after their foundations have shifted and how they make sense of their world after one of their centers of meaning has been removed. Klass grounds his descriptions of spirituality in his scholarly study of comparative religions and in his two decades studying the lives of bereaved parents. He argues that continuing bonds with their dead children can give parents a new transcendent reality. Deceased children like saints or bodhisattvas can offer a bridge between the profane and sacred worlds, support parents as they find meaning in a world made forever poorer, and bind together a community adequate to parents' grief. The book reports Klass's clinical practice and his work as advisor to a bereaved parents self-help support group. Ward-based Critical Care: a guide for health professionals Ann M Price, Dr Sally A Smith, Dr Alistair Challiner, 2016-01-01 Like the original Ward based Critical Care, this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting. It should be of value to a wide range of healthcare professionals including junior doctors, nurses, physiotherapists, and students. It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients. This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections. The book is still structured around the ABCDE approach to assessing and managing patients, as this is promoted in critical care and resuscitation care training. The focus on practical examples and 'hot tips' to aid memory of key points continues. All the chapters have been updated with the most recent guidance as available at the time of writing. This has meant that some chapters have required major revisions while others have remained relatively unchanged. Some new chapters have been included, such as the ones on anaphylactic shock, patient safety, dealing with pregnant women in the ward setting, and massive blood transfusion. In addition, each section now starts with a chapter giving an overview of the A-E approach in order to provide more detail about assessing and managing those aspects of patient care. This informative book contains many useful features, such as clinical scenarios, 'hot tips', and practical skills, and the text is richly illustrated and cross-referenced throughout. **Implementing the Evidence-Based Practice (EBP) Competencies in Healthcare: A Practical Guide for Improving Quality, Safety, and Outcomes** Bernadette Mazurek Melnyk, PhD, RN, CPNP/PMHNP, FAANP, FNAP, FAAN, Lynn Gallagher-Ford, PhD, RN, DPFNAP, NE-BC, Ellen Fineout-Overholt, PhD, RN, FNAP, FAAN, 2016-06-09 Hospitals and healthcare systems around the world have attempted to build and sustain evidence-based practice (EBP) cultures and environments, yet they have struggled to clearly understand what EBP competency means. Implementing the Evidence-Based Practice (EBP) Competencies in Healthcare clears up that confusion and serves as a guide for clinicians, leaders, faculty, EBP mentors, and students in achieving EBP competency, facilitating evidence-based decision making in daily practice, and accelerating the speed at which research knowledge is translated into real-world settings to

improve health outcomes and decrease healthcare costs Authors Bernadette Mazurek Melnyk Lynn Gallagher Ford and Ellen Fineout Overholt provide step by step explanations and case scenarios that illustrate realistic advice and ready to use resources to help organizations integrate EBP broadly and deeply across their infrastructure to improve patient care quality and safety

Parenting After the Death of a Child Jennifer L. Buckle, Stephen J. Fleming, 2011-01-19 The death of a child has a tremendous and overwhelming impact on parents and siblings completely altering the psychological landscape of the family In the aftermath of such a tragedy parents face the challenge of not only dealing with their own grief but also that of their surviving children How can someone attempt to cease parenting a deceased child while maintaining this role with his her other children Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children Parenting After the Death of a Child A Practitioner s Guide addresses this complex and daunting dilemma Following on the heels of a qualitative research study that involved interviewing bereaved parents both fathers and mothers Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians students and grieving parents The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way demonstrating the strength and importance of their book for the counseling field

Techniques of Grief Therapy Robert A. Neimeyer, 2012-05-23 *Techniques of Grief Therapy* is an indispensable guidebook to the most inventive and inspirational interventions in grief and bereavement counseling and therapy Individually each technique emphasizes creativity and practicality As a whole they capture the richness of practices in the field and the innovative approaches that clinicians in diverse settings have developed in some cases over decades to effectively address the needs of the bereaved New professionals and seasoned clinicians will find dozens of ideas that are ready to implement and are packed with useful features including Careful discussion of the therapeutic relationship that provides a container for specific procedures An intuitive thematic organization that makes it easy to find the right technique for a particular situation Detailed explanations of when to use and when not to use particular techniques Expert guidance on implementing each technique and tips on avoiding common pitfalls Sample worksheets and activities for use in session and as homework assignments Illustrative case studies and transcripts Recommended readings to learn more about theory research and practice associated with each technique *When Professionals Weep* Renee S. Katz, Therese A. Johnson, 2016-01-22 *When Professionals Weep* speaks to the humbling and often transformational moments that clinicians experience in their careers as caregivers and healers moments when it is often hard to separate the influence of our own emotional responses and worldviews from the patient's or family's When Professionals Weep addresses these poignant moments when the professional's personal experiences with trauma illness death and loss can subtly often stealthily surface and affect the helping process This edition like the first both validates clinicians' experiences and also helps them process and productively address compassion fatigue burnout and secondary traumatic stress New material in the second edition includes increased emphasis on the burgeoning fields of hospice and palliative care organizational countertransference mindfulness and compassionate practice It includes thought provoking cases self assessments and exercises that can be used on an individual dyadic or group basis This volume is an invaluable handbook for practitioners in the fields of medicine mental health social work nursing chaplaincy the allied health sciences psychology and psychiatry *Palliative Care: A Practical Guide for the Health Professional* Kathryn Boog, Claire Tester, 2007-10-23 This book encourages health professionals to reconceptualise their practice in the light of the fact that their patients are deteriorating and dying supporting them in their dichotomous role which involves affirming that person's life whilst acknowledging that that life is ending Professionals are encouraged to think laterally to be creative in their use of their core skills and to use their life skills and experience to change the focus of their interventions By making these changes those involved with caring for the dying will be able to address issues related to

burnout and feeling de skilled The authors share their considerable experience with the reader what works for both patient and carer professional when working in this field By providing workable solutions they empower those in disempowering situations such as when working with terminally ill children and adults The book is truly holistic and client centred in its approach upholding the philosophy of palliative care Aimed at all who interact with children and adults who have a life limiting condition or who are dying Offers practical examples of approaches to dilemmas and emotional issues commonly face by those working in palliative care Encourages professionals to think laterally to be creative in their use of core skills and to use their life skills and experience to change the focus of their interventions Moves the emphasis away from the medical model to the emotional and spiritual influences on quality of life Offers clear workable guidelines and demonstrates practical solutions based on proven theory and experience to problems encountered on a day to day basis by patients and those coming into contact with them

Neonatology Giuseppe Buonocore, Rodolfo Bracci, Michael Weindling, 2012-01-28 This new textbook wants to offer to neonatologists and pediatricians a modern and complete view of the various problems and aspects of neonatology currently one of the most complex and advanced fields of pediatrics The first chapters will be dedicated to the epidemiology of neonatal mortality and morbidity and to the conditions responsible for neonatal risk A section will be devoted to organizational problems of hospitals and home services for efficient modern neonatal and infant care Particular attention will be paid to neonatal care medico legal questions examination of newborns and current availability of laboratory facilities and instrumentation for identification of perinatal abnormalities Neonatal nutritional problems will also be examined outlining current knowledge of the needs of sick and healthy babies Conditions jeopardizing fetal health such as diabetes maternal drug abuse and smoking will be discussed New advances in neonatal pharmacology will be extensively examined Various diseases of the neonate involving lungs heart gastrointestinal tract blood immune system endocrine system and kidneys will be also expounded in special chapters Fetal and neonatal infections will be extensively discussed Fetal and neonatal neurological abnormalities will be discussed by highly specialized authors There will be chapters on neonatal ophthalmology dermatology and orthopedics Each chapter has been written by a well recognized international expert in his or her field As the opinion leader in their field the Author is responsible for giving the most up to date information in terms of what is known what is still being researched and what has become evidence based medicine Underlying causes and mechanisms of neonatal diseases will be presented in an immediate form The use of summaries tables and accurately selected guidelines or recommendations that will accompany the text will supply quick references and instant solutions to the concerned neonatologists during their daily practice

A Practical Guide to Cluster Randomised Trials in Health Services Research Sandra Eldridge, Sally Kerry, 2012-02-20 Cluster randomised trials are trials in which groups or clusters of individuals are randomly allocated to different forms of treatment In health care these trials often compare different ways of managing a disease or promoting healthy living in contrast to conventional randomised trials which randomise individuals to

different treatments classically comparing new drugs with a placebo They are increasingly common in health services research This book addresses the statistical practical and ethical issues arising from allocating groups of individuals or clusters to different interventions Key features Guides readers through the stages of conducting a trial from recruitment to reporting Presents a wide range of examples with particular emphasis on trials in health services research and primary care with both principles and techniques explained Topics are specifically presented in the order in which investigators think about issues when they are designing a trial Combines information on the latest developments in the field together with a practical guide to the design and implementation of cluster randomised trials Explains principles and techniques through numerous examples including many from the authors own experience Includes a wide range of references for those who wish to read further This book is intended as a practical guide written for researchers from the health professions including doctors psychologists and allied health professionals as well as statisticians involved in the design execution analysis and reporting of cluster randomised trials Those with a more general interest will find the plentiful examples illuminating
